## OUR FARMERS' CLUB

Correspondence invited  
PRINCE EDWARD ISLAND  
KINGS CO., P. E. I.

MONTAGUE, Sept. 26.—All this week has been very firm for the grain, but to-day has brought very heavy rain, a large percentage of the grain is already sown; most of the late grain is rusted very badly; the Potatoes are a great crop and are doing well. Apples are a draw on the market this year. Apples are thin at all. Oats, 50c; potatoes, 30c—G. A.

QUEBEC  
COMPTON CO., QUE.

COMPTON, Sept. 26.—We are having rainy, cold weather just now, but have been having fine warm weather, which has given farmers a good chance to clean up their corn and grain. Potatoes are a good crop, but are rotting badly. Cattle are very scarce and high in price. H. G. C.

MISSISSOUI CO., QUE.

PRELIMINARY, Sept. 25.—During the first ten days of this month we have been practically at a standstill owing to the rain; a considerable amount of grain has been damaged. From then until the 21st, exceptionally fine weather prevailed, giving silos and fields a good crop and many silos were filled with the most fine corn grown for several years, as the corn for husking year. Much of the grain has been lost to the frost, as there have been no killing frosts to date.

ONTARIO  
HASTINGS CO., ONT.

TRINTON, Sept. 25.—Farmers are sowing quick. The 21st appeared to be working fine. Sifted wheat to the west. Very bad corn country. Some apples were bought early in the season, but the buyers dropped their deposits and left the orchards so—J. E.

HALIBURTON CO., ONT.

KINMOUNT, Sept. 25.—Gawley Agricultural Society held its annual meeting on Sept. 14 and 15. The weather was fine and warm although the crowd was not as large as previous years. The rails did not give fair rates or grant a number of good horses and apples. The display of canned goods and sodas work would be hard to beat at larger fairs. Potatoes are doing well. What can be done in that line—A. A. T.

WATERLOO CO., ONT.

WATERLOO, Sept. 25.—Fall wheat has been sown and about the same acreage was put out as other years. Wheat is 40 per bush at present. We have had a lot of rain lately, which helped fall pastures, roots and potatoes. Silo filling has commenced in a few sections. Frost will be general in a week or so. Planting has held off. Corn cutting affords a splendid chance for cooperation and the interchange of labor, which makes a heavy job lighter. Apples seem to be very plentiful. The evaporator at St. Jacob's is paying 30c per cwt. for apples two inches up for drying purposes. On August 29 the United Farmers' Club of Waterloo Co. held a very successful picnic in the Waterloo Park. The address were on cooperation—C. H.

NORFOLK CO., ONT.

HEMLOCK, Sept. 25.—After a heavy electric storm the weather has turned fine and cool. The general crop of buckwheat is out. Evaporators in the surrounding country are taking in apples. Hogs are \$2.75 per lb.; corn, 25c; butter, 25c; rye, which is fairly good crop, 30c; wheat, \$1.10. All stock doing well.—P. B. Z.

### HOLSTEIN NOTES

An editor of Farm and Dairy had an opportunity to look over some of the Holstein cattle owned by the Caldwell Estate, Bell's Corners, Ont., as shown at the Central Canadian Exposition, Ottawa, recently, where they captured a number of the awards. This herd comprises about fifty head. The herd bull, Franco de Keton De Kol, was pronounced by Judge Barton to be one of the typical bulls shown in the aged ones at Ottawa this year. Excepting four bulls he has sired nothing but heifer calves during the past year and four months. Two of his cows have milked 45% and 44 lbs. a day. His dam has tested as high as five per cent and has a record of 30 lbs. of milk a day. Only three of his bulls are for sale. Their dams produced 60 to 100 lbs. a day. In the herd are 30 heifers by Baron De Kol, whose dams produced 72 lbs. of milk in a day with an average of four per cent. Minnie May's Jewel, an eight-year-old cow that is for sale, has given 82 lbs. of milk in a day and averaged 67 lbs. and 30 days. The young stock in this herd gives promise of being great producers.
