Buy this DAIN PRESS for Heaviest Work

BUILT with particular attention to the needs of the man doing custom baling, it will stand the knocks of transportation and hard wear. Best of material gives strength, and durability.

The Dain Belt Power Press has large capacity and combines many time and labor-saving devices, which makes it the most profitable hay press to operate. It makes neat, smooth square-ended bales.

One of the greatest advances in hay press construction is the Dain automatic condenser hopper.

The feature of condenser hopper and self-feed working together increases capacity and decreases cost of operation by requiring less labor than other machines.

Pitman is I-beam steel, rigid and substantial. Plunger is all iron and steel, therefore not affected by damp weather or wet hay.

Gears are large and have strong heavy teeth. Pitman is operated by twin drive gears insuring

true, perfect application of power. Long shaft bearings of the finest quality of babbit metal hold shafts in perfect line and insure proper meshing of gears, which lessens friction and saves power.

Fly wheel runs smoothly. Is large and heavy so it carries plunger over heavy part of stroke. Friction clutch gives perfect control.

The Dain automatic tucker folds every charge of hay, making smooth, neat and square-ended bales.

Blocks are inserted automatically by self-feeder, and are conveniently located for operator.

Baling case is carefully constructed as it must stand terrific strain in forming bales. Heavy steel angles and plates are used reinforced with trusses, and all liberally riveted and bolted.
