CASINO

(Halifax Recorder, June 28) other parts of Canada, is arranging to have them produced in Halfax. A private exhibition of the picture

was given at the Empire Theatre thi morning before a number of news paper men and others. They are cer tainly not surpassed by any picture of the kind every shown here; the are remarkably clear, every blow : distinctly seen, and the men ar clearly outlined, while at times the are brought close to the carera, givin particularly good views of the men. The pictures are also of unusua interest, as they give a different im pression as to what was conveyed by the press reports, which gave the idea that Willard was simply standing of

his opponent until he wore him down but instead, Willard was arways ag gressive; he was not dismayed by Johnson's rushes or attacks, but al ways cams back forcing the fighting The result is the public are given a different idea of the bout to what they had anticipated, and the pictures thus grow in interest with every round. They certainly give everybody a better opinion of Willard as a fighter than they have had before. There are also splendid views of scenes before and after the fight.

These pictures are to be shown at the Casino on Thursday, Friday and Saturday.-Advt.

THE PROBLEM OF TO-MORROW'S FOOD

"By putting back under the plough the 4,000,000 acres that have gone to grass since 1872, the nation could add \$50,000,000 worth of food to its production. and thus diminish its annual im. ports by that large sum."

"The farmers are doing too well to dream of taking such a step voluntarily," says the New States.

"But \$50,000,000 worth of ad. ditional human food per annum. at the moment when we must somehow keep down our indebt. ness to other countries, it is well worth striving for."

"If anything valuable is to be done in the way of organising a greater production of food in this country in the times immediately ahead of us, it has to be done in the next three months," says the Telegraph.

Our Great Wheat Import

"The problem is to expand as much as may be the production at home of foodstuffs and of meat in the time available, and with the land, the farming experience, and the labour available; also to do what is possible—and we believe it is much—to secure the supplementing of our home supplies from the sources upon which we can most fully rely; sources, that is to say, within the Empire."

Here are some of the vital figures which show how matters

"Great Britain imports 30,000-000 quarters of wheat-37 per cent of all the wheat exported by all the exporting countries in the world put together," says the

Germany imports ten millions. France imports three or four

Italy and Belgium import seven millions each.

Russia, on the other hand, exports sixteen million quarters, 20 per cent. of the total export of the world.

The food problem can be put in another way.

Great Britain only produces read on 3 per cent. of its soil. Germany produces 25 per cent. of her bread.

France produces 30 per cent. of her bread.

What of the Next Harvest? But what will the next harvest

"Belgium, and some of the richest wheat ground of France have been in German occupation, and the most important corn-growing areas in Germany and Austria-Hungary have been the battle-Excellency Sir Walter Davidson fields of the Eastern war-East Prussia and Galicia," says the Nation.

"Elsewhere, agriculture has been carried on under the difficulties caused by war and mobilisation. There, must, then, be a considerable shortage in the European harvest, and it may be as much as sixty or seventy million

This defficiency cannot possibly be made good by extra-European sources. Canada is expected to increase her output by five million quarters, but the Australian crop is a failure.

"It is, therefore," argued the Nation, "our duty to ourselves, to our allies, and, indeed, to the whole world, which is threatened with the primitive plague of fam-Patk. Stamp of Curling arrived Miss Whiteway, Mrs. Oakley, Rev. and ines in the train of the primitive here by the Bruce express to-day Mrs. R. H. Mercer, Dr. Whiteway, Miss plague of war, to see that the waste of all our resources, which has been a national weakness and a national scandal in times of peace, shall now be ended."

> Many a good reputation has been stabbed by a pointed tongue.

> A man seldom knows what he doesn't want until after he acquires it. * * * But let the sluggard attend a picnic

> * * * No wonder a womain seldom knows her own mind; she changes it so of-

and the ant will surely come to him.
