Ontario's Population.

The municipal section of the report of the Bureau of Industries has been published. It shows that during the year 1902 the population of Ontario was 2,037,267, an increase of 8,378 over 1901. The total assessment of the province is \$859,943,263, an increase of \$24,245,656 over the previous year. The taxes imposed for all purposes last year were \$14,146,731, being an average of 16.5 mills on the dollar and \$6.94 per head.

per head. In 1901 the total taxes were \$13,-

The debenture debt, so far as obtainable, is \$50,496,850, or \$29,29 per head. The floating debt is \$7.223,901, and the interest paid en loans and debentures was \$2,709.554, or more than 20 per cent. of the taxes levied.

A GREAT DISTURBER.

ABBE M. MOVEUX, OSSERVATORY OF

gistering Instruments New Mark Ail the Varied Phases of Ris Existence.

nected with sun spots has shown the interest which attaches to studies of the sun. Not only is the sun the grand promoter of terrestrial accidents, but it is he who rules the life of planets and each of the tributaries of this giant world has its counter stroke on our tiny globe, in gravitation at a distance of thirty-seven milliards of leagues. We are then bound to his life and our registering instruments mark all the phases of his existence.

Many spots show themselves on the disk, of the greatest of which, we give a picture taken in the Observatory of Bourges, measuring no less than 40,000 kilometres. It is a very heautiful formation, quite regular in form. It broke up some few days after photograph was taken.

From all parts clouds of fire seem to try to encroach upon them, but the fiery furnace, where above all masses of hydrogen and of unknown gases are burning, resists every threatened invasion.

Everywhere distorted tongues of fire. Assist Reman all.

The destruction of Newgate brought to light another section of the ancient Roman wall which surrounded London and served as a fortification of the city. The whole extent of the wall has now been fairly well traced and parts of it are still used as collars and warehouses. The only pertion of it that is still above greund is a bastion in the Church of St. Giles, Cripplegate. The ground of London is estimated to have risen at the rate of nearly a foot a century, and doubtless from time to time many rich finds of antiquities will be found, especially if a start is made to construct high buildings on the American plan.

YOU MAY HAVE KIDNEY TROU-

threatened invasion.

Everywhere distorted tongues of fire, with ejections sparkling like gold infusion, dart their drops of gas, which are immediately consumed in contact with the mass.

On the 13th December it passed to the central meridian. That was the day on which one could experience.

If your back aches and you suffer from dragging pains it is an evidence of discased kidneys. "Get Ferrozone at once and take it regularly. Ferrozone makes kidney sufferers feel better at once. "I was bothered a great deal with my kidneys last year," writes S. G. Denton, of Everett, "but got quick relief from Ferrozone. My trouble manifested itself by pain in the back, dull, heavy feeling and constant headache. I quite recovered after using a few boxes of Ferrozone, which has given me more strength and better health than I ever had before. I can recommend Ferrozone as a positive eure." Price 50e, at all druggists. day on which one could expect some telegraphic troubles. The telephones alone implied a weak perturbation, but the magnetic needle, shaken anew, as on October 12 and 31, showed as on October 12 and 31, showed oscillations measured in the observatory of the Val-Joyeux at more than one degree.

In the article of M. Flammarion,

TYPE OF CLOUDS OF FIERY RAIN INVALING THY JUN'S FOLAR REGIONS AND GIVING RIS: (O MAGNETIC: TORMS ON THE BARTH.

RIS. CO MAGNETIC STORMS ON THE RAFTH.
haentiened above, the eminent astronomer asked whence proceeded
these manifestations, and be concluded that neither the snots nor the
rings gave an exact coincidence.

Our sun is a variable star of the
ine class as the stars of this kind
observed in the heavens. Before arriving at a definite condensation, at
its final incrustation, each star
seems to oscillate by emitting all
kinds of rays, by successive strokes,
so te speak. ONE OF THE VILEST DISEASES Is catarrh, which first attacks the nose and throat and finally spreads all through the system. The one sure cure is fragrant, healing Catarrhozone, which is sent by the air you breathe direct to the root of the trouble. Mr. T. Y. MacVicar, of Yarmouth, suffered for years from catarrh, and says, "in my long experience with this loathsome disease I never used any remedy that relieved and cured so promptly as Catarrhozone. When my nostrils were so stuffed up that I, couldn't breathe I found a few inhalations of Catarrhozone was sufficient to clear away the mucous. I am perfectly cured by Catarrhozone and free from the disease entirely." Use only Catarrho-

so te speak.

In the heavens are found examples of all periods from a few hours up to years. A star in the southern Fly has a period of scarcely a day, while Mira Ceti shows a period of nearly a

As the stars grow older these vital pulsations' seem to become weaker, as in an organic body, and the pulsations diminish while increasing their duration.

Everybody knows of the excellent apparatus, due to M. Marey, which registers the pulsations of the waves of blood. Well, the pulsations of the stars, considered proportionately, are of the same kind.

From time to time our pulsations hacrease, the heart beats faster, the temperature increases in our organs;

From time to time our pulsations increase, the heart beats faster, the temperature increases in our organs; it is the same way with the suns.

Our sun is a variable star of long period. The pulsations increase in amplitude about every eleven years, and the curves may be compared. At these epochs of maximum activity a sudden fever seizes upon our central star, and we have shown in the "Probleme Solaire" that the temperature undergoes the same increase. The labors of Sir Norman Lockyer have established these facts since then with an abundance of very convincing proofs.

Geseous bodies in the sun in its normal state break up at high temperatures and give to the spectrum analysis new rays of substances unknown on the earth.

The dates of the last maxims of activity are 1848.1, 1860.1, 1870.6, 1383 and 1893, and the next maximum will occur in 1905.

The minima have been 1855, 1867, 1889 and 1901.5, and the next minimam will occur about 1912. The increases, as in cardiac pulsations, are more abrupt than the decreases. But a point that is very curious and toward which attention should be directed is that the sun is attacked every thirty-three or thirty-five years by a veritable fever of eruptions.

We know that together with the sun spots are noted phenomens quitted. in the field of medicine is Hood's Sar-saparilla. It possesses actual and unequalled merit by which it cures all diseases caused or promoted by impure or impoverished blood. If you have rheumatism, dyspensia, scrofula or catarrh you may take Hood's Sarsaparilla and be cured. If you are run down and feel weak affil tired, you may be sure it will do you good.

To heat a house you must not only have good fuel but you must have a stove or furnace that will burn it to the best advantage. In the same way to get strength and energy you must not only have good feed but a stemach that will digest it properly. Take for example the experience of Mr. H. Bailey, of 256 Patrick street, Winnipeg. He gives it himself as follows:

"Before I began using Dodd's Dyspepsia Tablets no matter what I ate I never seemed to gaim much strength er put on much flesh, though my appetite seemed good. But since I began using the Tablets I have gaimed in weight eight pounds and have otherwise been greatly benefited. I think Dodd's Dyspepsia Tablets digested my food properly and turned it into strength and flesh."

Lassitude is weakness; so are many

tions.

We know that together with the sun spots are noted phenomena quite as interesting and much more general. These are the protuberances, a kind of eruption probably of electric origin.

BIBLE IN BIGAMY CASE. May Not Prove a Guide in Marriage-Criminal Code May Differ,

Precedents are familiar in courts, Precedents are familiar in courts, but there was one introduced in the Toronto Police Court at a recent session which was quite novel.

Reference to chap, so and so, section this, or that, sub section blank of the R.S.O, are familiar, but this morning the court was startled by citations from Holy Writ.

John Prentiss and Mary E. Worsley, were charged with bigamy, because they were wedded on Sept. 5th, 1903, while the latter had a husband living. Both are far beyond

5th, 1903, while the latter had a husband living. Both are far beyond the giddy age of youth, being about fifty years of age.

'I don't think I did anything wrong," said John, and the woman looked in a manner which seemed to say "me too."

Forthwith the lady produced a formidable leaking and the lady produced a formidable leaking and the say "me too." formidable looking paper which handed to the Crown Attorney, smiled.

Cures COUGHS, COLDS, BRONCHITIS HOARSENESS and all THROAT AND LUNG TROUBLES. Miss Florence I Mailman, New Germany, N.S., writes: I had a cold which left me with a very bad cough. I was afraid I was goin into consumption. I was advised to try DR. WOOD'S NORWAY PINE SYRUP. I had little faith in it, but hefore I had taken one bottle I began to feel better and after the second I felt as well as ever. My cough has completely disappeared.

handed to the Crown Attorney. He smiled.

'This is an order of separation,' he said,... 'but that doesn't give the right to marry again.'

'According to Deuteronomy it does,' replied the man, producing his little Bible.

'I am afraid, that is not in the criminal code,' ventured the Magistrate, 'and you know it is the criminal code we go by here.'

'It was agreed the case should stand to a later date, but before leaving court the alleged bigamists submitted their defence as contained in a Bible marked at Deut. 24, verses 1 and 2.

For the benefit of those who have not their Bibles handy, they are reproduced:

produced:
"When a man hath taken a wife volcanoes.

These are the strange and inexplicable eruptions in which prevail largely hydrogen, helium, calcium, iron, barium and other elements, all refuced to a state of incandescent va-

"When a man hath taken a wife and married her and it come to pass that she find no favor in his eyes because he has found some unclean-ness in her, then let him write her a bill of divorcement and give it in her hand and send her out of his

his house she may go and be another man's wife."

cuced to a state of incandescent vaor.

Little by little they cover a larger
part of the sun, and sometimes they are observed in the direction of the
poles of the solar body. They form then immense aigrettes, quite analogous to those which discharge
themselves from the negative poles of the
electric machines.

During these intervals the condensation of the sun continues by successive degrees of impetus, and the
three pulsations, so to speak, of
phenomera of another kind appear in
the polar regions. his house she may go and be another man's wife."

The complainant in the case is Thos. Worsley, of Fenelon Falls, and it comes to a Toronto court by a circuitous course. Three years ago Worsley found his wife with one Mo-Fadden, and gave his wife an order of separation, as well as her legal third of the property and family. A third of the family represented two. Shortly after she married the said John McFadden, but he died. On September 5, 1903, she again married John Prentiss, of Toronto. He comes under the statute, because he is alleged to have known that the woman he married had another husband at the time. It is alleged the children have not been properly cared for in the city, and in this way the case came to the notice of the authorities.—Telegram.

phase of this character occurred in 1870, and it is expected that its recurred and it is expected that its recurred and it is formed that its recurred and it is further a remarkable fact that these magnetic disturbances are all grouped together in the years which occur about one year before the maxima of sun spots.

These disturbances throughout the periods of thirty-three or thirty-five years are interrupted each successive period of three years or more. Thus there will probably be magnetic displays during 1904, 1905 and probably 1906.

Then the solar fever will decrease and greater atmospheric calm will-probably prevail on our globe. Our meteorology itself proves this, and it is certain that the seasons will progress more in accordance with a normal standard. The pulse of the sun finally will assume a more regular beat, and natural order will be restored—for some years.—Abbe M. Moreux, Observatory of Bourges, France. Bringing Fars to Cauada.

Bringing Fars to Canada.

At first glance the idea of Russia exporting a large quantity of furs into Canada each year would appear almost incredible, in view of the fact that the Dominion is to-day, and has been ever since the days of La Salle, one of the world's chief sources of supply.

At the present time there is in Montreal a tail, distinguished looking Russian, a member of one of the big Moscow fur trading firms. When seen at the office of the Imperial Consul for Russia, M. Peter A. Swaeschnikoff, for such is the Moscow gentleman's name, stated that the trade with Canada was a very valuable one in such furs as Persian lamb, grey lamb, astrachan and taluppen, which is the Russian name for a cheaper lamb skin which goes into the making of moderate-priced overcoats.

overcoats.

First in importance in the importation of Persian lamb skins which amounts to some five hundred bales per year. As each bale contains two hundred skins the sum of all some state.

per year. As each bale contains two hundred skins, the sum total comes to no small figure. The importation is worth between three and four hundred thousand dollars per year. The astrachans which come out of Russia each year to Canada have a value ranging between \$150,000 and \$200,000. Taluppen is imported into the country to the extent of \$50,000, and another fur called Crimea will amount to another \$50,000.

Mr. Swaeschnikoff stated that the Persian lambs skins imported into Canada came from the Bokara district of Central Asia, which was a Russian possession. The astrachans come from Russia's northern territogies. A sum total of the value of furs sent from Russia to Canada each twelve months will run in the neighborhood of three-quarters of a million dollars, and this does not take into consideration that most costly of all furs, the Russian sable. Of these, however, there are no great quantity imported.

M. de Struve, Russian Consul, who was present, gave some figures relative to the large business which his

was present, gave some figures relative to the large business which his country is doing in the raw sugar trade. Of beet sugars the Russian Empire ranks third in the world's production; the figures for 1902-03 being 1,183,000 tons.

Canada's Librarian.

Mr.; Martin J. Griffin, the Parliamentary Librarian at Ottawa, has returned, with Miss Griffin, from a two months' trip to England and the Conbinent. Mr. Griffin was the guest of Senator Power in Halifax, on his way back. During his presence in London, The Canadian Gazette said of him: "Mr. Griffin, after completing his university course, studied law and was called to the bar of his native Province, Novà Scotia. He has had much experience in journalism, and was for some time managing editor of The Toronto Mail. He was secretary to the civil commission appointed to inquire into the working of the Canadian civil service. Upon the death of the late Dr. Alphaus Todd, Griffin was appointed to his present position. He is proving in the late of the present position. He is present position and the present position present present position and the present position present Canada's Librarian. Whether at home or abroad, the happiest are those who have helped someone else to be happy. Each morning determine to be profited that day, and you will not be disappointed, for "the will is more than half the man."

HOW IT SPREA

went to a small town in the State of Nebraska.

It made the cure of a case of Piles that was considered hopeless.

The news spread and afthough this was only two years ago the demand prompted Dr. J. S. Leonhardt, of Lincoln, Neb., the discoverer, to prepare it for general use. Now it is being sent to all parts of the world.

It will cure any case of piles. There is a month's treatment in each box.

Sold for \$1.00, with absolute guarantee.

antee Sold by C. H. Gunn & Co., Central Drug Store, Chatham.

The Earl of Leicester.

The Earl of Leicester on Jan. 2 attained the age of 81 years. The story of his life affords a fascinating study to those who are interested in agelinks. His father, the first Earl, was born 149 years ago. In the interval the British throne has been occupied by six monarchs, including King Edward. The grandson of the fourth Duke of Marlborough. Lord Leicester has seen that title change hands four times. Between the first marriage of his father and his own second marriage exactly 100 years, less three months, elapsed.

The first Earl married at the age of twenty-one; the present Earl married, for the second time, in 1875. The fact is so remarkable that when it was mentioned to Queen Victoria

The fact is so remarkable that when it was mentioned to Queen Victoria some years ago, she could not believe it until she had seen documentary evidence in proof. The late Earl was eighty-eight when he died; there seems every likelihood of his successor eclipsing his record. He lives a simple, healthy life, gets about his estate like a youth, cats his lunch of bread and cheese and onions seated beneath a hedge, and himself supervises the wonderful game preserves which make Holkham famous.

WHY DO WOMEN SUFFER

Such pain and endure the torture of nervous headache when a quarter buys a bottle of Nerviline, which never fails to relieve. Just a few drops of Nerviline in sweetened water cures nervous or sick headache, re-lieves heart palpitation and makes you feel better immediately. Ner-viline can't be beaten for quickly curing stomach and bowel troubles and should be kept in every home. It's good to rub on for external pain and excellent for inward use. Sold in large 25c. bottles.

An Irish Compliment. When Earl Spencer was lord lieutenant of Ireland the people of Dublin called the beautiful countess, one of the lovellest women of her time, "Spenser's Faerie Queene."

But when their excellencies were about to return to England Irish gallantry was shown in a characteristic way. At the farewell banquet in their honor an Irish gentleman got up and said, with much fervor and many

Contentment is the best cure for

Birth-marks which mark and mar the outside of the body are a grief to every mother whose children may bear them. But for every child who bears a birth-mark on the skin there are many who bear an indelible birth-mark on the mind. Nervous mothers have nervous children and many a man and woman ever an irritable and despendent temperament to those days of dread when the mother waited the hour of her maternity. The use of Dr. Pierce's Favorite Prescription strengthens the mother for her trial. With strength comes a buoyancy of spirits and quietness of mind, which is one of the happiest gifts a mother can bestow on her offspring. By giving viger and elasticity to the delicate womanly organs "Favorite Prescription" practically does away with the pain of maternity and makes the baby's advent as natural and as simple as the blossoming of a flower. There is no opium, cocaine or other narcotic contained in "Favorite Prescription."
