ADVERTISE IN THE JOURNAL

Making the Soldier A Civilian

EARLY in the war, the Government realised that the returned soldier would need one of three things.

- (1) If he was ill, he would want to be made well.
- (2) If he was so disabled by service that he could not follow his old occupation he would want an opportunity to recover his power to "make good" as a civilian.
- (3) If he was fit, he would want to be put into touch with employment opportunities.

To help in this three-fold service the Department of Soldiers' Civil Re-Establishment was organized.

The Medical Branch.

The Medical Branch of this Department gives the special after-care that soldiers who have suffered through war service need.

On his return to Canada the invalided or wounded soldier is treated in military hospitals. If the Medical Board decides that his case requires extended treatment in certain diseases, he is discharged from the army and comes under the care of this Department.

The Medical Branch then provides free medical and surgical treatment;
—free artificial limbs and special boots for deformed feet;
—free surgical appliances, eyeglasses, etc.;
—free dental treatment.

At present this service is available not only on the soldier's discharge from the army, but whenever he becomes ill again on account of disease or wounds due to war service.

The Vocational "Re-Training" Branch.

Some soldiers have so suffered on war service that they are prevented from working at the trade or occupation they followed before enlisting. This branch of the Department arranges for such men

Col. R. W. Leonard of this city has contributed \$5,000 to Queen's University endowment fund.

The Joint Committee from the Collegiate Institute Board and City Council met last night in the Council Chamber to consider sites for the proposed new Collegiate Institute.

His numerous old friends in this city will learn with regret of the death of Mr. W. Flaherty of Niagara Falls, Ont., which occurred yesterday. The deceased was in his 83rd years and was considered the oldest Free Mason in Ontario. In his early days he was a conductor on the Great Western R. R. and later on the G. T. R. For many years he was proprietor of the American Hotel at the Falls and was well known and highly respected by many throughout this province.

Mr. Wallace, the St. Paul Street jeweler launched a fine 30 foot gasoline speeder, last evening. It is equipped with a modern powerful engine and a speed of 30 miles an hour is expected from the boat. Owing to the O. T. A. there was no champagne at the christening.

POLICE COURT NEWS

A fast and furious ride on Welland avenue cost two motor cyclists \$10 and \$11 cash in the Police Court this morning.

A man appeared before the Court to answer to a charge of assaulting another in the Y. M. C. A. The too-ready use of his hand cost the aggressor \$8.25.

Three canines wandered the streets at large and their owners were assessed \$2 each while two bicycle riders who prefer the sidewalk to the road for riding on also paid \$2 each for the privilege.

CAN TRANSPORT LIQUORS THROUGH DRL STATE IN U.S.

Washington, April 15.—Transportation of intoxicating liquors for beverage purposes through a dry State is not prohibited under the Reed prohibition amendment, the Supreme Court held today in an opinion interpreting that act.

JAPS ARREST MISSIONARIES

San Francisco, April 15.—Four American missionaries in Seoul, Cap-

the Japanese in connection with the revolution, have been arrested by Korean revolutionaries, according to information received here today by Rev. David Lee, General Manager of the Korean National Association Branch here.

NEW CHIEF ENGINEER

Winnipeg, April 15.—A. H. Dixon has been appointed Chief Engineer of Western Lines, Canadian National Railways, to succeed the late A. T. Fraser, who was killed recently in a snowslide at Mount Robson. This announcement was made today by A. E. Warren. Mr. Dixon was formerly district engineer of the Pacific district, with offices at Vancouver.

SON USES WEED

SO IS CUT OFF

London, Ont., April 15.—Because he used tobacco, which, says the testator, "I despise", Frank Atwood, son of Squire Adolphus Atwood, who died recently at his home in the township of Lobo, is disinherited. Squire Atwood's original will, which has been entered here for probate gave the son named an equal division with other sons and daughters. A codicil however, calls attention to the objectionable use of the weed, and supplants the son by a grandson, Carlton Robb, as beneficiary.

Advice to Legatees

The Squire, in addition to dividing his estate of \$17,250, gives to the legatees the following advice:

"I desire to leave my legatees four words which I have proved myself to be the key to success: Wisdom, Perseverance, Justice, and Economy, and in addition, I give this advice: Never buy what you do not want, and never buy on credit, unless you have reasonable grounds for knowing you will be able to honor the obligation when due."

Colin E. Tait of the local Collegiate Institute received honorable mention for his Victory Loan essay in the recent competition.

This, surely, is reasoning backwards. In our opinion every member of the Council might well be on the finance Board. If this were so there would be an infinitely better understanding of the chief responsibility of the Council—namely the administration of money.

Householders Waste Natural Gas, Too

WEATHER

Fresh northwest winds; cloudy and cool, with occasional rain.

One important phase of natural gas conservation is its proper use in the home. Present methods are largely wasteful. Government experts say, and they have arranged for instruction in the public schools in proper methods of cooking by natural gas that its use may be prolonged. A recent publication says:

"Better results can be obtained with pressures in the neighborhood of one ounce than at four ounces or higher, if the vessel is properly placed over the shorter flames resulting from the lower pressure. A burner with a large number of short flames will give better results than with long flames. This is such an important feature that practically twice as much gas will be required to cook with four ounces of pressure as would be required for pressures of from one to two ounces."

Although Natural Gas is Cheap, do not waste it—the Supply is not Everlasting.
