CLAIMS IRELAND MOST PROSPEROUS NATION IN WORLD AT THIS TIME
NEW YORK, Dec. 29.—S. S. McClure, the publisher, arrived on the Mauretania here after having travelled through seventeen countries, studying industrial conditions. He said that Ireland is the most prosperous country abroad today. That he had investigated the financial status of Irish farmers and finds they have more than \$5,000,000 in banks, and Ireland really is overflowing with prosperity. He would not comment on the internal strife in Ireland.
"In 1913 Great Britain imported 5,000,000 head of cattle from the United States and Argentina," said McClure, "and half of that went to Ireland. The prosperity of Ireland is phenomenal."

EASY TO DARKEN YOUR GRAY HAIR

You can Bring Back Color and Lustre with Sage Tea and Sulphur.

When you darken your hair with Sage Tea and Sulphur, no one can tell, because it's done so naturally. Preparing this mixture, though, at home is messy and troublesome. At little cost you can buy at a drug store the ready-to-use preparation, improved by the addition of other ingredients called "Wyeth's Sage and Sulphur Compound." You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. In morning all gray hair disappears, and, after another application or two, your hair becomes beautifully darkened, glossy and luxuriant.

Gray, faded hair, though no disgrace, is a sign of old age, and as we all desire a youthful and attractive appearance, get busy at once with Wyeth's Sage and Sulphur Compound and look years younger.

SCIENTISTS INTERESTED

IN FORMATION OF ROCK UNCOVERED AT THOROLD

THOROLD, Ont., Dec. 29.—The discovery of the rock formation at Thorold while excavating for the construction of the new Welland Ship canal is causing no limited amount of comment among the scientists of Canada and the United States. It was first thought to have been a second Niagara Falls which was lost ages ago.

Further evidence of the study that a continental glacier once covered the Niagara peninsula—in fact all of Canada—and destroyed the once Niagara range of mountains, discloses that the main ice current moved in early a north and south direction. Scratches of a small section of harder limestone about the opposite end of Vine street ran in the same direction as those above the Niagara St. Catharines and Toronto railway bridge. The rock above the so-called cascade is very hard and durable while that below consists of a softer limestone overlying a layer of the cement rock. These rocks weather badly, and the scratches and grooves soon are obliterated. This soft rock wore away rapidly leaving the higher rock projecting above. The ice current striking this harder rock at an angle was deflected to the southwest.

A PRISONER BY AIRPLANE

The practice of conveying prisoners to jail by airplane was begun in San Francisco recently when Ivan Gates, police aviator of the San Francisco department, flew across the bay to Alameda and returned with James M. Kelley, who had been sentenced to six months in jail. Kelley, who was brought across with no handcuffs on, says he enjoyed the trip across the bay, though it was rather short—less than five minutes. The airplane went up 5,000 feet. Chief of Police White says: "Think what a saving it will be if we can send a plane to Reno or Los Angeles for a man and have him back here in a few hours. Now there must be

This is proved by the scratches on the rounded face of the cascade, steps running crosswise. It was this combined upward and sideways motion of the ice current which cut the rounded steps and rounded projecting parts underneath.
