### Your Boys and Girls.

### Some mothers unfortunately have to wean the baby from birth. For such a child, feeding from the bottle a mixture of oatmeal water and milk is very nourishing.

### Use two thirds oatmeal water and one third of milk for a child three months old and weighing eleven or twelve pounds. Weight the baby each week, if she gains from four to six

### ounces a week her bowels move regularly and are of the right consistency, the mixture is perfect.

### If, however, she does not increase in weight each week, you should begin increasing the milk, of course, a very little at a time, probably not more than an ounce in one day's mixture. You should use lime water, as this helps to form bone and teeth, which, of course, bone structure. Add from one to two teaspoonfuls of lime water to each bottle.

### Nuts stored for the winter must be carefully cleaned and kept free from dampness.
