specific is not announced as a
 general specific for all human ills. It is
 merely commended as a desirable treatment
 for nervous disorders of a certain sort,
 which may be readily effected by the con-
 cord of sweet sounds. Its advocates regard
 it only as "one of those intangible but
 healthful properties through the nervous
 system." Harmony is designed to be used
 in such cases simply as a tonic,
 to strengthen the nerves and in-
 vigoiate the overworked brain. Good
 music would doubtless have a very salutary
 general effect as a preventive agent.
 Judiciously administered to the public it
 may well form one of the sanitary pre-
 cautions of every city, tending to soothe not
 only the savage breast but the harassed,
 careworn and discontented one.

The effectiveness of the new mental
 tonic in the treatment of insanity has been
 well tested with good results in the
 London Asylum for the Insane. During
 last year no less than 55 evening entertain-
 ments were given at that institution, of
 which dances and concerts formed the
 greater part. The average attendance at
 these entertainments was 254—about 28 per
 cent. of all the patients. There were also
 summer evening band concerts on the
 lawn in front of the main asylum. The
 beneficial effect of such innocent pleasures on
 minds diseased, though difficult to esti-
 mate, cannot be doubted.

PETROLEUM.

Statistics of the petroleum in
 the United States are interesting.
 Petroleum last year was produced in
 Canada, namely, Pennsylvania,
 New York, Ohio, West Virginia,
 Colorado, California, Indiana, Kentucky,
 Missouri, Kansas and Texas. The total
 production is shown to be 34,820,306
 barrels, valued at \$26,554,052. Of the
 total produced, 109,891 barrels were dis-
 posed of for lubricating, 12,350,813 for
 fuel, and 22,478,602 for illuminating
 purposes. Nearly the entire amount
 produced in California, Indiana and Ohio
 was used for fuel, while nearly
 the entire amount produced in Colorado,
 New York, Pennsylvania and West Vir-
 ginia was used for illuminating purposes.
 The production of States was as follows:
 New York, 1,450,000 barrels; Pennsylvania,
 1,450,000 barrels; Ohio, 1,450,000 barrels;
 West Virginia, 1,450,000 barrels; Colorado,
 1,450,000 barrels; California, 1,450,000 barrels;
 Indiana, 1,450,000 barrels; Kentucky,
 1,450,000 barrels; Missouri, 1,450,000 barrels;
 Kansas, 1,450,000 barrels; Texas, 1,450,000 barrels.
 In Canada, petroleum is produced in
 the Northwest region of the Northwest
 Territory, and in the Northwest Territory.
 It is produced in the Northwest Territory,
 and in the Northwest Territory.

SYSTEMATIC TREE GROWING.

According to the late United States
 census, the United States leads Michigan
 and Wisconsin in amount of standing pine.
 The Wisconsin cutting down of timber
 on both sides of the border, is, it seems,
 continuing. By and by, the last timber lands
 will be removed from present cities.

CODKING REFORM.

The well-known writer on economics,
 Edward Atkinson, described some time ago
 in the Popular Science Monthly an entirely
 new system of cooking that he has made in the
 art of cooking. By means of a peculiarly con-
 structed oven over a hearth he has been
 able to cook, boil and stew his daily food,
 not only far more economically than by the
 ordinary methods, but also more whole-
 somely and appetizingly. His oven has
 been since adopted in various parts of the
 country, and in several charitable institu-
 tions, with satisfactory results. As under
 the new system a satisfying lunch for one
 can be enjoyed at a cost of only 2 cents,
 this movement toward cooking reform may
 be regarded as the most important, from a
 philanthropic point of view, that has arisen
 during the last quarter of a century. A
 lunch given by Mr. Atkinson some months
 ago, of which three persons partook, con-
 sisted of a meat pie, a lemon pie and a cup
 of coffee, each perfect of its sort, and all
 costing exactly 7 cents. Another practical
 test of the new method shows that a num-
 ber of growing boys in a charity school, fed
 on food prepared in the new oven, have
 grown strong and healthy under the Atkin-
 son system, and at comparatively small
 expense.

If it is now common, as Mr. Atkinson

says, for the workman to spend 75 per
 cent. of his income for food, and under his
 methods this great outlay may be reduced
 to 10 per cent. of his earnings, it is obvious
 that the gain to health, comfort and morals
 would be incalculable. Crime and vice are
 diseases which may be traced often times
 to a generally supposed to be badly prepared
 food. Properly cooked and appetizing
 dishes, on the contrary, are a prime factor
 in lifting the people to higher moral and
 social planes, and it can be demonstrated
 that the poorly-paid classes can thoroughly
 nourish their bodies and satisfy their ap-
 petites at an expenditure of only a small part

of their earnings, the temptation to steal

and to drink will be greatly decreased.
 Not wage-workers only, but all classes will
 be directly benefited by economic and
 wholesome cooking. As Prof. Youmans has
 said, our kitchens, abandoned to the con-
 trol of raw servants, are the fortified en-
 trenchments of ignorance, prejudice, irra-
 tional habits, rule of thumb and mental
 vacuity, and the consequence is that we are
 suffering from wasteful, unpalatable, un-
 healthy and monotonous cookery. In
 England there is no general acquiescence
 in this state of things. It is opposed by a
 number of excellent training schools of
 cooking. When will our Canadian women
 make a scientific study of that practical art
 which is a daily necessity in the health and
 life of every household?

WHAT THE "ADVERTISER" THINKS

ABOUT IT.

SEVERAL eastern heavy editorial writers
 have become all tangled up in a contro-
 versy on woman's sphere. The definition
 is short. It includes the whole of
 creation. (Grand Rapids Democrat.)

Yes; though woman is not a man and
 a brother, yet she is an indispensable aid
 to the male creation. Why should her
 sphere be restricted?

+++

If the barriers between this country and
 Canada were cast down good land would
 not go begging, for the Dominion would
 be as attractive to the immigrant as
 nature intended it to be. (Detroit Free
 Press.)

Our contemporary hits the nail on the
 head. If our new settlers all along the
 line had opportunity to buy and sell to
 best advantage they would increase in
 the next ten years by millions instead
 of by thousands.

+++

The New York State officials are to have
 a great killing match next week. Six
 murderers are condemned to death in the
 State Prison, and of these four have been
 sentenced to die during the week beginning
 next Monday. They will be
 disposed of by means of electrocution,
 and only one chair will be pre-
 pared for them. The wholesale slaughter
 is sickening to contemplate. It is to be
 hoped that there will not be a repetition
 of the first experiment at Auburn, the
 terrible details of which were tele-
 graphed to the press, despite the ex-
 istence of a statute forbidding the publication.

PARADOXICAL MR. FOSTER.

(Hudson Sentinel Review.)

Mr. Foster is now being unmercifully
 criticized for declaring that he did
 not believe in the power of woman. He
 is a man of great ability, and his
 opinions are of great value. He is a
 man of great ability, and his opinions
 are of great value. He is a man of

A MAN'S LIFE SAVED

I WOULD not be doing justice to the afflicted if I
 withheld a statement of my experience with
 jaundice, and how I was completely cured by using
 Northrop & Lyman's Vegetable Discovery.
 No one can tell what I suffered for nine weeks, the
 third of which I was confined to my bed, with the
 least medical aid I could obtain in the city trying to
 remove my affliction, but without even giving me
 temporary relief. My body was so sore that it was
 painful for me to walk. I could not bear my clothes
 tight around me, my bowels only opened when tak-
 ing purgative medicines, my appetite was gone,
 nothing would remain on my stomach, and my eyes
 and body were as yellow as a guinea. When I was
 turned on the street I was stared at or turned from with
 a repulsive feeling by the passersby. The doctors said
 there was no cure for me. I made up my mind to die,
 as I had lost all my chance. One day a friend
 called to see me and advised me to try Northrop &
 Lyman's Vegetable Discovery. I thought if the
 doctors could not cure me, what is the use of trying
 the Discovery, but after deliberating for a time I con-
 cluded to give it a trial, so I procured a bottle and
 commenced taking it three times a day. I was
 anxious at the expiration of the third day to find
 my appetite returning. To my surprise I found it
 and I persevered in following the directions and tak-
 ing Hot Baths two or three times a week until I had
 used the fifth bottle. I then had no further need for

the medicine, and had saved my life—that had
 stored me to health—as I was radically cured. The
 natural color of my face replaced the dingy yellow, I could
 eat three meals a day, in fact the trouble was so
 cured that it will not recur.

(Signed) W. LEE, Toronto.

WHAT IS IT?

This celebrated medicine is a compound extracted
 from the richest medicinal herbs, roots and herbs. It
 is the production of many years' study, research and
 investigation. It possesses properties purely vege-
 table, chemically and scientifically combined. It is
 Nature's Remedy. It is perfectly harmless and
 free from
