

The Weekly British Colonist  
AND CHRONICLE.

Tuesday, October 15, 1867.

## Italy.

The condition of affairs in Italy is alarming. The recent abortive attempt of Garibaldi to invade Rome appears to have breathed new vigor into the Liberal party, and, notwithstanding the measures adopted by the Italian as well as the Papal Governments to prevent an outbreak, the inhabitants in the Papal province of Viterbo, imbued with the revolutionary spirit of the great Liberator, have broken out into what has thus far proved successful revolt against the temporal rule of the Pope. Serious riots, attended with loss of life, are reported to have occurred in most of the large cities of Italy; and Garibaldi, having refused to give his parole, remains a close prisoner in a military fortress. The Italian Government last year guaranteed the integrity of the Romagna, and bound itself to use the forces of the country to prevent the invasion of the States by its subjects. Should it fail in this, France is bound to dispatch an army to the protection of the Pope. Already we hear that a French force has concentrated at Toulon, prepared to embark at a moment's notice for the Eternal City. Italy is a constitutional Government, modelled after the British system, and one can easily see that should popular pressure be brought to bear upon the present Ministry, it must either recede from its present policy and release Garibaldi, and allow the revolutionary movement to work out its own salvation, or resign and suffer a new ministry to take office. In either case the terms of the treaty will be broken and Napoleon must either throw his army into Rome and precipitate a conflict with the Garibaldians at the risk of a rupture with Victor Emmanuel, or wash his hands of Italian affairs, and tacitly acknowledge that his Italian policy is as sad a failure as his Mexican policy. A rupture between France and Italy would be destructive to the Eastern policy of both France and Great Britain, for the reason that Prussia, a protestant government having no sympathy in common with the Pope, and anxious to destroy the supremacy of Napoleon in continental matters, might ally with Italy against France, and Russia could then quietly take possession of the "sickman."

Tuesday, Oct. 8th.

## The Mission at Metlakatlah.

We are happy to learn that this mission is flourishing both temporally and spiritually. On Sunday September 8th, ninety-six adults and seventeen children were baptized by Dean Cridge. The examination of the former occupied several days, and developed on the part of the candidates a knowledge of Christian truth not very common even among white people. A remarkable feature on this occasion was the number of elderly persons that presented themselves, twenty-six of the number being over fifty years of age, and not a few of them over threescore and ten. About four hundred natives attend the services.

The trade is in a flourishing state. Almost every convenience and comfort can be obtained from the shop, which is plentifully stored with goods. This facility is largely embraced by the villagers, and powerfully conduces to their complete separation from their former modes of life.

The profits of the trade are spent in the erection of public buildings and in other undertakings for the common weal; and are thus productive of the future advantage of furnishing employment to many of the inhabitants; who are now trained to follow their daily toil, more in the steady manner of the English labourer, than with the fitful disposition of the Indian. A sum of \$3000 has been already thus spent, and \$2000 more are in hand for similar uses.

A new building, 90 feet by 30 (built out of the profits of the trade) is nearly completed. The smaller portion is designed for a Court house; the larger for village assemblies, and a market house; also for the accommodation of Indians from other parts, coming often in considerable numbers to trade. These parties, instead of being scattered over the village, will here be comfortably housed, and thus afford a valuable opportunity of preaching the gospel, another important benefit of the trade. Barely a Sunday passes but there are strangers in the congregation thus brought within the sound of the word of life. One of these from a camp 200 miles up the Skeena river told Mr. Duncan the other day, "you have opened our eyes by what you have done at Metlakatlah. We shall not be long in coming over to you. All around know that your heart is good towards them."

There is a plentiful supply of provisions in the mission house; game, fish, &c., besides what is imported. A flock of geese yield a profusion of excellent milk; there are poultry and eggs, and the mission garden yields an ample supply of vegetables. The large frame building of cedar, 64 by 32, contains 72 apartments on the ground floor, besides outbuildings; also a spacious dormitory for the boarders upstairs. In this building is the suite of apartments designed for the exclusive use of the married missionary with common use of remainder; all these circumstances leave little to be desired for those who may be destined to this station.

The interior of the mission presents an aspect of neatness, order, and activity. Here are in training for Christian wives

and mothers fourteen boarders, who, besides scholastic education, perform all the work of the establishment, not as menials, but as pupils of industry. They are cheerful and contented. It is curious to mark, when the time comes for the settlement in life of a mission boarder, the struggle which takes place between the natural desire to enter into the married state, and regret to leave a spot which has been a happy home. Mr. Duncan has great art in blending authority with kindness. The pupils brighten at his approach. At the same time they regard him with thorough respect, and their obedience is prompt and hearty. This institution is regarded by the Metlakatlahs as one of their best treasures; and well did the Bishop remark in the deeply interesting report of the visit last year, "This is the successful experiment of Metlakatlah."

The school, which the fishing being nearly over, is filling again, contains when complete about 120 pupils. The progress of the pupils in the branches of a plain English education is remarkable, a very interesting token of which is afforded by the number of letters which come down by every opportunity to friends and well wishers at Victoria.

Dean Cridge spent about seven weeks at Metlakatlah, during which time several interesting meetings took place; e.g., an exhibition of the magic lantern with slides kindly lent by the Bishop; a wedding and other feasts, a tea meeting, and parties at the mission-house. To show the feeling entertained by the officers and the pupils in the employ of the H. B. Co. at Fort Simpson, we may mention that last spring, on Mr. Doolan's visiting them to baptize some children at the Fort, he was, on leaving, presented with \$25 subscribed in aid of the mission.

Mr. Cridge with Mr. Owen also visited the Naas mission, where a Christian village has just been auspiciously commenced, mainly through the self-denying and faithful labours of Mr. Doolan, aided more recently by Mr. Tomlinson. Mr. Doolan has come down in the Otter, en route for England, in consequence of a family bereavement. Through this much regretted event the sole charge of this interesting mission devolves on Mr. Tomlinson, who is devoting himself to the work with thorough earnestness. He left Metlakatlah the other day in command of the sloop Endeavor, freighted with goods for the establishment of a branch store at Tienacalee (the name of the new village), to be kept by a Naas Christian. Mr. Owen, of the Church Missionary Society, has also rejoined his family in Victoria.

The trip on the Otter, through the kindness of Capt Lewis, was very agreeable, and the party never enjoyed more excellent health.

THE FIRMEN'S ELECTION.—Yesterday the members of the Fire Department held an election at the Union Hook and Ladder House for Chief and Assistant Engineer. The voting was by ballot. Considerable interest was manifested by the firemen, and several carriages plied with postcards advising voters to deposit their ballots for one or other of the rival candidates were kept running during the day. The greatest good humor was observed throughout the contest, and upon the announcement of the poll the fire-bells struck up a merry peal in honor of the successful candidates. The poll, which was announced at 4½ o'clock, stood as follows:

FOR CHIEF.	
Kelly.....	54
Holden.....	51
FOR ASSISTANT.	
Kelly's majority.....	3
Kriemler.....	56
Hicks.....	49
Majority for Kriemler.....	
7	

In the evening the friends of Messrs Kelly and Kriemler were hospitably entertained at the Tiger Engine House by the successful gentlemen.

A CASE OF KIDNAPPING.—The daughter of Squire Lewis, who we reported last week as missing, has returned to her home. It appears that on Friday evening, the child was engaged drawing a pail of water from the river, when some Indians approached and threw a blanket over her head, and then, placing her in a canoe, paddled away. After being brought to their ranch, a quarrel ensued between the savages regarding her, and at length it was determined to return her to the neighborhood from whence they had stolen her. With that end in view, they brought the child back to within 600 yards of her father's house, from whence she made her way home.—Seattle Intelligence.

SUGAR MONOPOLY.—Honolulu, S. I. advises us that the commercial agent of the San Francisco and Pacific Sugar Refinery, now at Honolulu, has had several interviews with planters, with a view of securing the sugar crop of the Hawaiian Islands, for two years, to be made into refinery grades between Nov 11 and 12. At last accounts, negotiations were still pending. The prospects of the speedy inauguration of a reciprocity treaty between America and the Hawaiian Islands, made planters rather chary of entering into any such contract as proposed. In the meantime, under limited contracts with some of the planters, liberal supplies of refinery grades will continue to be received.

FROM BARCLAY SOUND.—Mr. Fisher arrived from Barclay Sound yesterday and informs us that the British brig Rona, Capt. Hayes, sailed from the mills two or three days ago for the Feejee Islands. She took in a cargo of lumber and salmon. All hands on the brig were well. The Indians at the Sound continue saucy and overbearing in their demeanor towards the whites, and complaint is made that Government has failed to redeem its promise made six months ago—to send a gunboat to the Sound to overawe the natives.

ADMIRAL HASTINGS, we learn, will sail for New Westminster in H.M.S. Sparrowhawk on this evening or to-morrow morning. Owing to the shifting of the sands at the mouth of the Fraser, it is feared that the Sparrowhawk, a very light-draught vessel, will be unable to enter the river, and that she will be compelled to ascend to the head of Burrard Inlet, whence communication with New Westminster, we believe, can only be had by means of a road.

THE MAILS.—The Panama steamer reached San Francisco at 5 o'clock on Thursday last. Her mails for this port are doubtless on board the California, which is supposed to have sailed for this port from San Francisco on Friday.

THE STEAMSHIP SIERRA NEVADA in running down Columbia River one night last week ran into the revenue cutter Joe Lane. Both vessels sustained some damage and a passenger on the steamship was seriously injured.

FREE SCHOOL.—At a public meeting held in the town of Seattle, the *Intelligencer* says it was resolved to establish a free school and to provide for the support of the same by levying a special tax of three mills on the dollar upon real estate in the district.

DEPARTURE.—The steamer Isabel, with His Excellency the Governor and Mr. Seymour, sailed yesterday for New Westminster. A part of the furniture from Government House went forward by the same conveyance.

THE NEW WORLD reached her wharf at 7:30 o'clock last evening. On her way across she landed 230 sheep at San Juan Island.

THE EVENING GUN.—The evening gun will in future be fired from H.M.S. Zealons at 8 p.m. on Tuesday and Friday of each week, instead of at 9 p.m. as heretofore.

FROM KOOTENAY.—A despatch from Yale yesterday announces the arrival there of Charles Oppenheimer from Kootenay with later news.

SEATTLE INTELLIGENCE.—A squad of U. S. soldiers have been dispatched to drive the Northern Indians that congregated about the mills back to the side of the line.

FROM THE SOUND.—The steamer Eliza Anderson arrived from Puget Sound at six o'clock last evening with twenty-five passengers, an express and freight.

PAID OVER.—The Government, through Mr. Young, has paid to the Treasurer of the Fire Department \$500 towards the support of that institution.

THE gunboat Forward yesterday conveyed the officers of the San Juan garrison to the island.

THE rumors of the establishment of an opposition steamship line to Panama are renewed.

We are indebted to Mr. Crosby, purser of the New World, for late Portland papers.

The ship Day Dawn will sail from the outer harbor to-day for Melbourne.

THE WONDERS OF THE MICROSCOPE.—We

understand it in through the agency of this marvelous instrument that Dr. Ayer has at length succeeded in finding the PALUDAL Miasm and determining its character. Of its effects we in this section have abundant evidence in the Fever and Ague which it alone produces when absorbed through the lungs into the blood. If has long been held to be a vapor or something in the vapor of water from decayed and decaying vegetation. Under a great magnifying power, the Doctor has found this vapor to contain distinct organisms or living bodies, corresponding precisely with those found in the blood of Ague subject. They are 13,000 times less than visible to the naked eye, but have distinct character and form.—He thinks they are reproductive in decaying matter or in the blood, and hence their long continued life or the remote effects of them in the system. He maintains that they resemble in character the other fermentative poisons, or such as the virus of rabies or of a dead body, &c., all of which are known to reproduce themselves with great rapidity, like yeast in moistened flour, so that the slightest quantity impregnates the whole mass. Yeast through a powerful magnifier is seen to be a forest of vegetation which grows, blossoms, and goes to seed in a short time. Miasm is not so distinctly vegetable, but has more the appearance of animal life, although its motions cannot be perfectly distinguished. What the Doctor claims to have settled is that it is an organic substance and he has further found and embodied in his "Ague Cure" what will destroy it.—[Leader, St. Louis, Mo.]

HONOLULU'S PILLS.—The Perfection of Medicine.—Nothing can surpass this restorative of the invalid; let the malady be what it may, or be seated where it will, these pills, purifying Pills will address themselves to its removal and speedily accomplish their purpose. They cleanse the blood, and by that means not only prevent the deposit of unwholesome materials, but stimulate the absorbents to remove all corrupt or worn-out substance. Thus have Holloway's Pills won their way to public estimation, which is obtainable and retainable alone by what is intrinsically good. The significance of these remarks will be appreciated by thousands who took these Pills as a last resource, and derived from them renovated health, after hope was almost abandoned.

A Card for the Dressing Room.—Ladies, your attention is invited to the special advantages of Murray & Lanman's Florida Water over every other perfume. It is manufactured from fresh floral extracts, not from unwholesome chemical combinations intended to counterfeit their odors. Besides being the most delicate and delightful of floral water, it has important sanitary recommendations. Its aroma relieves headache, prevents fainting fits, promotes sleep, and soothes the nerves. Infused into the bath it renders it more invigorating and refreshing. Combined with water it retains its fragrance so long after contact with the atmosphere.

For sale by all Druggists.

DISEASES OF THE KIDNEYS.—It is said that two-thirds of the civilized inhabitants of the world are afflicted more or less with disorders of the kidney and liver. Unquestionably kidney diseases have of late years become more frequent and unmanageable, especially in hot climates. Nothing seems to produce such a marked effect upon them as BRISTOL'S Sarsaparilla. When the urine and lithic acids are in excess in the urinary secretion—and this is the cause of most of the class of diseases in question—the alkali properties of the Sarsaparilla quickly stop the progress of the trouble while its tonic operation strengthens the relaxed organs and restores their natural action. BRISTOL'S Vegetable Pills should be used at the same time with the Sarsaparilla, so that the bowels may assist the kidneys by carrying off the vitiated matter set free in the system in the later medicine.

For sale by all Druggists.

## THE LEADING PERFUME OF THE AGE!

From Fresh Called Flowers.

## MURRAY &amp; LANMAN'S

CELEBRATED

## Florida Water.

This exquisite Perfume is prepared direct from Bloom ing Tropical Flowers, of surpassing fragrance. Its aroma is almost inexhaustible; while its influence on the SKIN is most refreshing, imparting a Delightful Beauty to the overtaxed Body and Mind, particularly when mixed with the water of the Bath. For

Fainting Fits,  
Nervousness,  
Headache,  
Debility,  
And Hysteria.

It is a sure and speedy relief with the very ELITE Fashion; it has for 25 years maintained its ascendency over all other perfumes, throughout the West Indies, Cuba, Mexico and Central and South America, and is confidently recommended as an article which, for a delicate flavor, richness of bouquet, and permanency has no equal. It will also remove from the skin

Roughness,  
Blotches,  
Sun Burn,  
Freckles,  
And Pimples.

It is as delicious as the Otto or Rosa and lends freshness and beautiful transparency to the complexion. Diluted with water it makes the best dentifrice, imparting a pearly whiteness to the teeth; it also removes all smarting or pain after shaving.

COUNTERFEITS.  
Beware of imitations. Look for the name of MURRAY LANMAN on the bottle. Wrapper and ornamental label.
