

AMONG BUSINESS MEN.

A Healthy State of Affairs Apparent.

THE EXPORT LOG TRADE AGAIN

Vessel Owners Expect a Good Fall Trade on Upper Lakes.

The Vegetable Pack—Advance in Ontario Manufactured Cotton Goods—Large Increase in the Sale of Ostrich Feathers—Failures in the English Dry Goods Trade—Export Flour Trade Improving—Daily Budget of Trade and Financial News.

The wholesale trade has not developed any marked features during the week. The reasonable features previously noted is probably a little more pronounced in some lines. It is the most marked in groceries. In dry goods there is considerable activity, and the volume of business so far this month is larger than for the same period of a year ago. Cotton has been advanced in a yard by manufacturers. The feature of the hardware trade is the buoyancy and strength of copper and tin.

Payments are fairly good, notwithstanding that farmers' deliveries are light owing to the lowness of prices.

Trade continues unsatisfactory. Factories are only buying for immediate requirements, and there is no foreign demand. Flour is quoted at 17c and selected at 18c to 18 1/2c.

Trade is good. This applies both to the city and to the country. The feature of the market is the substantial advance in prices. Bread leaves seem to be in demand and blameth tri-nitrate and quinine are firmer. Payments are fairly satisfactory.

Trade shows some improvement this week. There is a brisk demand for glass and lined oil is in fair request. Dealers seem pretty well filled up with turpentine, tallow, but few buyers. There is a fair demand from the country for white lead, but city requirements are limited.

The travelers are still out, but their orders are small, the continued dry weather having had a bad effect on trade. With the new approach of stock-taking the factories are being run pretty close. Payments continue fairly satisfactory.

Trade continues good. The copper and tin markets are very buoyant. The demand for seasonal goods is fairly good. The market for wool is active and prices are advanced. Payments continue to improve.

In leather business seems to have developed a little more activity during the week. Demand is mostly from manufacturers. There does not seem to be any accumulation of stock; in fact in manufacturing No. 2 and 3 there is a shortage. There is quite a few skins coming in from the West and the market is fairly active. Prices are advanced. Payments continue to improve.

The greater part of the attention of the trade is at present being directed on the fruit market. Business is not so active, owing largely to the falling off in the demand for apples. There are in fairly good demand and prices are very firm. Quite an active demand has sprung up for Hyslop, and an attractive tea is readily taken up. Ceylon teas are up 1/2d to 3/4d from lowest point. Cheapest Ceylon Assam teas cannot be obtained at auction sales in London under 7d. The first of the new season's packings are in this market. Canned goods are quiet and with no material change. Salmon continues scarce and no offerings are being made from coast; prices firm. Canned corned beef are unsettled. Fruits are being taken hold of fairly well by the trade, the market being practically bare of old when the new fruit arrived. The market is reported to be a little stronger outside on Valencia, and some of the shippers have instructed their agents to put their fruit into store rather than sell at present prices. Two or three Montreal consignments have already been put in store, it is said. Coffee are in fairly good demand on the local market, but there are very few choice Rio here. Rice are higher in price and prices have advanced about 1/2c during the week. No. 7 has sold at 15c to 16c in New York, the highest price touched. Three vessels have arrived during the week at New York with 100,000 bags, the most of which has been shipped to Chicago. Total deliveries at New York during the week aggregate 48,776 bags, compared with 51,887 the week before, while the total at all ports was 50,736 against 52,922 the previous week. The only feature in the sugar market during the week was the drop of 1/2c a pound by the refiners. Local wholesalers as a rule quote 3/4c for yellow and 4/4c for granulated, but in some cases prices are being shaded. New Long Island canned peas arrived on this market yesterday. This is the first of the season.

Paying their Debts With Apples. "There has been a large sale of apples this year," remarked Mr. Stephen Caldwell, the well-known wholesale dry goods merchant, to The World yesterday, "which in the sections where this fruit is extensively grown has wonderfully assisted the trade and kept the volume of business up notwithstanding the low price of wheat. I was up to St. Louis yesterday, and the merchants there were not so satisfactory as the biggest day they ever had in that city. Monday was also a busy day. Goshop, you know, is a famous vegetable growing district, and Mr. Caldwell, who is a good deal of a trader, said, "There is a good deal of talk these days," said a wholesaler yesterday, "about the big pack of vegetables and the lowness of prices, but I think the situation is somewhat exaggerated. One or two packers were in here today and they remarked that the pack is not going to be as large as thought. How far they are correct I cannot say."

TRADE AND FINANCIAL GOSSIP.

During the last public auction of ostrich feathers 42,500 pounds weight were sold, realizing \$28,000. The sales are held in London every two months, and the aggregate weight disposed of at the five series of sales held during this year has been 188,048 pounds—nearly 84 tons—which realized a total of \$432,000.

Last year's exports of silk from Great Britain reached the high figure of \$5,178,307, being 14 per cent more than that of 1889 and nearly double as much as in 1890. It now amounts to about 40 per cent of the entire export trade. The United States and France, the largest customers for this article, both took increased quantities last year. The trade in manufactured silk goods reached the amount of \$770,900—an increase of more than £100,000 compared with 1890.

The Draaper's Record of London, Eng., has a critical article in its last number on the failures in the English dry goods trade for the nine months of 1892. It is found that the greatest decline in the amount of invoicing, with some intermissions, since the present Bankruptcy Act came into operation in 1883, received a decided check in 1891, and the down grade has been continued up to the time of the latest returns. The total number of cases for the year ending December, 1891, is 116, with liabilities of £2,162,107. The loss to creditors is estimated at £2,063,796. The reports of the Inspector-General of Bankruptcy do not consider the present increase as otherwise than temporary, and looking at the several causes to which it is attributable rather than to any one cause, the insolvent is not so much to be pitied as he is in some quarters. The insolvent is not so much to be pitied as he is in some quarters. The insolvent is not so much to be pitied as he is in some quarters.

There was another active day's business in local stocks today. Transactions totaled 1700 shares—1074 at the market and 626 shares at the afternoon session. Bank stocks were generally lower. Lower bids are noted in Commercial, Imperial, Dominion and Standard, as compared with yesterday's close. Toronto and Montreal are about fractionally higher. Western Assurance maintains its recent advance and is selling at 1 1/2. Woodhouse's Light is in demand today at about one point advance over yesterday's figures. Commercial Cable was strong, selling at 107. Quotations are as follows:

Table with columns for STOCKS, 13 M, 4 P. M. and various stock names like Bank of Montreal, Dominion, etc.

There is a feeling of despondency, and it is anticipated that when the present depression has passed the greater stringency introduced into bankruptcy administration by the act of 1890 will produce a salutary effect in obliterating irregular business habits and unhealthy trading speculation."

THE EXPORT LOG TRADE.

A Local Dealer says We Will Have to Get Our Lumber from the States in Another Six Years. Local lumber dealers find these days a demand for the export log trade, and some of them are not at all satisfied at the reported decision of the Government not to reimpose the export duty on logs.

"There is one thing I know," remarked "Fred" to The World, "and that is unless something is done, in another five or six years, the people of this province will have to rely on the States for their lumber. You doubt what I say," he added, "but I'm telling you the truth. That's straight."

"Come this way," he rejoined, leading the way down the street. "I've had a long talk with the men who are in charge of the lumber here, and they are all agreed that unless something is done, in another five or six years, the people of this province will have to rely on the States for their lumber. You doubt what I say," he added, "but I'm telling you the truth. That's straight."
