

Miscellaneous.

The mortality from Cholera of pilgrims at Mecca at the end of January exceeded 100 daily.

The admiral has purchased the large mail steamer "Menota," building on the Tyne, for a troopship.

A woman at Syracuse, New York, murdered her mother—an old lady of 80—on the 23rd inst.

It is reported that the Rev. Dr. Talmage will leave New York and accept a charge in London, England.

Rome, March 28.—The Pope in his allocution said the loss of the temporal power rendered the free exercise of the spiritual power impossible.

A Chicago firm has purchased a large drove of steers which are to be sent by steamship to the pastures of North Germany for fattening and sale.

From the last reports of the Massachusetts Railroad Commissioners it appears that during the past year not a single passenger was injured sufficiently to justify a claim for damages.

There is great distress in San Francisco. Men are idle on the streets, willing to work, but unable to get it. A call for laborers at \$1 per day drew forth several thousand applicants.

Small-pox has broken out in a serious form in Belfast. The Poor-law authorities are making arrangements for providing increased accommodation for patients.

Mr. Henry Allsopp, M. P., has purchased from the Earl of Beville the short-horn cow Eighth Duchess of Oneida, calved in November, 1872, and five heifers for \$55,000.

New Zealand papers report that the Colorado beetle had appeared at Waitangi, in fields containing potatoes from some American imported ones.

A Washington despatch says it is "reasonably certain" that the President's Message on the Fishery Award will result in the payment of the amount to England, and that it will be taken out of the unexpended balance of the Alabama award.

A Quebec Judge has just decided a case begun three years ago between two farmers, who quarreled about a barrel of apples, valued at \$3,500, and have thus far spent \$1,800 in lawyers' fees and costs.

The Liverpool and London and Globe Insurance Companies makes a fine exhibit for 1877. Despite the St. John calamity (\$97,000) and other losses, the sum of £150,000 has been added to the Reserve Fund, besides paying a dividend of 35 per cent.

Stanton, Virginia, with a population of 10,000, consumes an average of nearly 100 pounds of opium a week. The drug is chiefly consumed by women. A young lawyer of the place is said to drink a quart of laudanum a week, and a bookkeeper a gallon in three weeks.

Miss Thomson, the lady who recently created much comment in Edinburgh by having her horse shod with gold, and who was afterward heard of in Barcelona, Spain, scattered gold coin among the street-beggars, and has been placed in Gartnavel Asylum, near Glasgow.

There are artisan families in India, and we are told, in Damascus, who have worked at the same work day by day for 1,000 years; peasant families who have not only tilled the same fields, but have gone into them and left them at the same hour, according to the season, from a period before the birth of Christ.

A greater monstrosity than Daniel Lambert has appeared in England. He keeps a public house at Newcastle-on-Tyne, and is not yet twenty-two. He stands six feet four inches in height, and weighs 730 pounds. He measures eight feet around the shoulders, seven feet around the waist, and three feet around the calf of his leg.

An old lady—Mrs. Margaret McConnell—died at Glasgow on Saturday last at the age of 92, whose eyesight, almost up to the time of her death, remained so good that she could read ordinary newspaper print without the aid of glasses—in fact, she never used spectacles. Such cases of good eyesight at a great age are rare.—Halifax Chronicle.

Some idea of the extraordinary depression in the shipping trade, and especially in the Atlantic branch, may be required by perusing Mr. Rome's speech at the meeting of the shareholders of the National Steamship Company, limited. Mr. Rome presented a very gloomy picture of the past year's prospects. The freight last year amounted to only \$27,000, and since 1873 there has been a falling off in the income of the company of no less than \$275,000. He mentioned as an unprecedented circumstance that steamers had taken passage to America for nothing for the sake of the essential dead weight.

Telegraphic News.

EUROPE.

LONDON, March 28.—The "Times" prints a despatch from Rostochuk saying: The feeling of dislike between the Russians and Romanians is increasing daily. The latter contrive all kinds of annoyances, especially to civilians carrying Russian passports. The Romanians have also established duties amounting to 15 per cent. on all provisions brought here from Giurgewo.

BERNARD, March 18.—Premier Protiana has started for Vienna to interview General Ignatieff and Count Andrássy. He hopes to avert the retrocession of Bessarabia.

LONDON, March 28.—In the House of Commons to-night Hon. Gaythorne Hardy, Secretary for War, in replying to various questions, said it was necessary to call out the first class of the army reserve, numbering about 13,000, and militia reserve, which were between 25,000 and 26,000. The Queen's message to that effect would be presented probably on Monday.

It is rumored that Bismarck is making further efforts to assemble Congress, and has asked England to forward a precise statement of her demands.

ST. PETERSBURG, March 31.—The Journal of St. Petersburg publishes an article, believed to be semi-official, on England's attitude. Referring to Lord Beaconsfield's speech on Thursday, the article says: "The balance of power in the Mediterranean is only threatened by the presence of the British fleet in the Sea of Marmora; and England's possession of Gibraltar and Malta."

The Press association says Lord Lyons is mentioned as the probable successor of Lord Derby, but nothing definite is yet known.

It is understood that the royal message will not enter into a detailed statement of the causes for calling out the reserves.

LONDON, March 29.—The Standard's special from Constantinople says it is thought that the Russian fleet is to withdraw from the Black Sea, and to be replaced by the Russian fleet.

The Times leader says Russia has adopted an indefensible attitude, and unless she withdraws it may be necessary for us to be prepared to fully assert our rights.

Orders have been received at the Dockyard, Portsmouth, for the immediate preparation of all the troopships belonging to the Indian and Imperial Governments, except the Simoon and Assistance, for transportation in the case of emergency, of an expeditionary army corps.

LONDON, March 29.—It is reported the Russian army in Constantinople is being reinforced. Great excitement in this city and throughout the Kingdom generally over the prospect of war with Russia, and the course pursued by this Government is generally applauded.

Sir Stafford Northcote, in the House of Commons this afternoon, said: "The distribution of the Congress correspondence is delayed, owing to the assent of some of the powers to its publication not being received."

LONDON, March 29.—It is reported the Russian reply, which was read yesterday. He also said he hoped the Queen's message regarding the calling out of reserves would be read to-morrow, and that it would be discussed on the Monday following.

In consequence of the re-establishment of the Catholic Hierarchy of Scotland the Pope desires entering upon diplomatic relations with the British Government, and has instructed Cardinal Franchi, Pontifical Secretary of State, to take steps with that object.

The statements in Parliament yesterday caused a great depression on Stock Exchange this morning. At periods the markets are in a panic. The fall in prices is general and there has been no recovery from the lowest point touched.

LONDON, March 29.—A Daily Telegraph special from Vienna says it is untrue that Count Andrássy has informed Sir Henry Elliot that Austria would remain neutral in the event of an Anglo-Russian war.

Count Andrássy shows no disposition to yield the provision of explanations, not of concessions, to be made by Russia.

LONDON, March 30.—The correspondence submitted to the "Post" and relative to proposed Congress confirm the statement that Austria, 13th March, refused to support the demands of England regarding Congress. Also shows that Gortchakoff, 12th March, informed the British Ambassador at St. Petersburg, that Russia would only accept of Congress discussing these portions of treaty of San Stefano directly affecting Europe.

A special from Vienna says rumors from England brought Ignatieff's negotiations to a standstill. Andrássy will at present listen to no proposal, and would certainly, in the event of an Anglo-Russian war, insist upon concessions which Russia is now indisposed to make.

The stock exchange is quieter and firmer, with considerable recovery in prices.

The Pall Mall Gazette, owned by W. H. Smith, First Lord of the Admiralty, in an article on the new turn of events, says: "We fear it must be assumed, that diplomacy has said its last words, and the advance of the Russian troops to the Bosphorus and Gallipoli will be immediately expected."

Several London correspondents of provincial journals mention that the impression prevails that the motive for Lord Derby's resignation was more serious than the calling out of reserves. They say that the belief is current that some steps for the safe guarding of British interests, like the entry of the fleet into the Black Sea or the occupation of Gallipoli on the shores of the Bosphorus, has been determined upon.

It is a question, however, whether for Canada purposes we want such a Governor. The sum of \$130,000 or even \$100,000 is a high price to pay for a Governor General no matter how good he may be.

It is not possible to get a Canadian Governor who, say for half or quarter the sum of \$130,000, would suit all our wants as well as Earl Dufferin? Well, no, not quite so well, but well enough?

Electricity. Thomas' Excelsior Electric Oil. Worth Ten Times its Weight in Gold—Pain cannot stay where it is used!

It is the cheapest medicine ever made. One dose cures common sore throat. One bottle has cured Bronchitis. Fifty cents' worth has cured an old standing cough.

It positively cures catarrh, asthma, and all other forms of chronic and blood disease. It cures all kinds of rheumatism, neuralgia, and all other forms of chronic and blood disease.

It is rumored that Bismarck is making further efforts to assemble Congress, and has asked England to forward a precise statement of her demands.

ST. PETERSBURG, March 31.—The Journal of St. Petersburg publishes an article, believed to be semi-official, on England's attitude.
