A Brockville Druggist's Case.

BEOCKVILLE, April 24th.—The popular impression is that doctors and druggists seldom take their own medicine. This is no doubt true, but when a doctor takes ill he generally calls in one of his own profession, in whose skill he has every confidence, or when a druggist is in a similar situation he often puts his faith in the preparations of some other chemist which he knows gives good results. Both the doctors and druggists in such cases show their good sense. A case in point happened in this town a short time ago. Mr. F. M. Turner, the well-known and popular druggist, who is wravelling for Parke, Davis & Co., has for a long time been a sufferer from congestion and inflammation of the kidneys. He tried a great many remedies, but without results. His patrons, however, spoke so highly of Dodd's Kidney Fills that he was A Brockville Druggist's Case.

This amendment, we take it, not only has the cordial sanction of the government, but will be approved of by public opinion; (1) because if it were even suspected that government officialsmade use of their knowledge acquired in the departments to promote their own personal interests, public confidence in the integrity of the management of departments would be weakened; and (2) because there is no valid reason why the officials of the mines department should be subjected to such a regulation and the officials of other departments be free from its operation.

Snake in a Horse's Eye.

A remarkable veterinary surgical operation was performed at Sheepshead Bay, L.I., on Tuesday. A snake three and one-half inches long was removed from a horse's eye and it is thought that the animal will survive, although nine times out of ten this operation results in death.

The horse, which belonged to Frederick Gracs, a butcher of Sheepshed Bay, was taken ill several weeks ago. It was noticed that a film had grown over the right eye, and Graes called in Dr. Sheppard, a well known veterinary surgeon living in the village. known veterinary surgeon living in the village.

Dr. Sheppard, after washing the horse's eye with a lotion which removed the film, observed a small live object wriggling about in the pupil. He decided that it was a case of what is known as "snake in the eye."

An incision was made in the corner of the eye near the nose and then Dr. Sheppard inserted a small silver hook. Several attempts were made to catch the snake and after half an hour of patient work the hook seized it and it was pulled out and fell into the hand of an assistant.

The snake measured just three and one-

Prepare for the Worst. DR. JANEWAY'S ADVICE RESPECTING THE COM-In speaking of the likelihood of cholera gaining a foothold in America this year, Dr. Janeway of New York tersely advises every-ING OF CHOLERA. Janeway of New York tersely advises everybody to be prepared for the worst. This may seem at the first glance the talk of an alarmist, but it is reality sound advice. There is no cause for panic, but a systematic preparation in view of a possible epidemic of cholera is really essential. Quarantine regulations need to be observed. The work of the scavengers should extend to every hole and corner of cities and towns. An uncontaminated water supply is essential. The matter of sewerage is important. But there is yet another and also very important consideration. It is an undisputed fact that disease of any kind, and especially such a plague as cholera, will foster most quickly, and with the most deadly effect, upon an already diseased or debilitated system. It therefore becomes the duty of every person to as far as possible secure himself or herself from its rayages, by confronting the dreaded had been deposited with the justice, and if the amount was substantially correct I would not have given costs. They have not done so, and I do not well see that I can refuse costs.

He said the two most conspicious figures before the world's gaze to-day are the two octogenarians, the Hon. William E. Gladstone, Prime Minister of England, and His Holiness Leo XIII. "Mr. Gladstone is the ruler of the nation on whose dominions the sun never sets. Some weeks ago in presenting the Home Rule bill he accomplished a feat which has seldom been equalled and never surpassed. He spoke for two consecutive hours with all the vigor of youthful manhood before one of the most distinguished audiences that ever ney revitatize the blood, stimulate the ingestive organs to regular and perfect action, restore to the nerves that force and strength which they have lost, and remove from the system all traces and effects of debility. No time should be lost in hesitation or to make a choice between remedies; for there is no other agency so sure and so effective as Haw-ker's nerve and stomach tonic and Hawker's Liver Pills. They are within the reach of

all classes, and now is the time to secure the boon of restored health which they place within easy grasp. Arrow Points. BY PASTOR J. CLARK.

Under the ballot, and with the wise provisions of the Ontario Municipal Act, closing the salcons upon polling days, elections are now conducted with almost as much sobriety as a Quaker meeting. Women are not insulted or jostled, nor are they subjected to any kind of rudeness when depositing their ballots. It may be a survival of the conservative feeling above mentioned which defeated the Nova Scotia bill, but if so the measure is only retarded for a few years until public opinion advances to meet it.

About a year later, Scrofula, in the form of White Swellings, appeared on various parts of my body, and for eleven years I was an invalid, being confined to my bed six years. In that time ten or eleven of these sores appeared and broke, causing me great pain and suffering. Several times pieces of bone worked out of the sores. Physicians did not help me and ! Messenger Wilkes is by Red Wilkes, the greatest Wilkes Sire, and is the sire of seventy-three with records from 2.11\(\frac{1}{4}\) to 2.30.

SIR WILLIAMS' dam, Sadie L., is a full sister to Nelson, 2.10. Her sire, Yeung Rolfi, sired Nelson, 2.10; Aubine, 2.19\(\frac{1}{4}\), and others with records better than 2.30.

GRETCHEN, by Gideon, produced Nelson, 2.10; Edna, 2.24; Sadie L. and other fast ones. It is needless to tabulate the list of producing sires and dams with which this fine young horse stands connected, as they are too well known to r-quire further tracing back.

SIR WILLIAM is a dark bay, foaled 1887, bred at Maple Grove Farm, Auburn, Maine. He is very symmetrical and highly finished, with plenty of substance; this, with his very sneedy conformation, gives assurance that he will not only be fast, but that he possesses the power of his ancestors to transmit their good qualities to their offspring, as his colts are beginning to prove. It will be observed that he carries the same per cent of the producing blood that produced Nelson as if he were a son of that noted horse. That, combined with the blood of Messenger Wilkes, 2.23, makes him a very desirable young horse to breed to. In 1891, as an eight-year-old, at the meeting of the New England Trotting Neeting at Mystic Park, Messenger Wilks a obtained his record of 2.23.
