for circulation of such a character as shall be useful for Mechanics, Engineers, Decorators and Artists, so soon as in their opinion it shall be practicable to do so; a sufficient and approved guarantee being left with the Secretary for any books so taken out."

This Library is intended to be entirely distinct from the valuable Free Library of Reference now open to the public in the Board Rooms, and will be composed more generally of treatises, or reading books, upon the several subjects indicated, such as Bourne on "The Steam Engine;" C. Wye Williams on "Heat in its relation to Water and Steam;" Wiesbach on "Mechanics of Machinery and Engineering;" Jamaison's "Mechanics for Practical Men;" Fairbairn on "Mills and Mill Work;" Tyndall on "Heat considered as a Mode of Motion;" Mosely's "Mechanical Principles of Engineering and Architecture;" Griffith's "Marine and Naval Architecture;" Howard on "Colour as a Means of Art," &c. &c.

The circulation of these works is not proposed to be limited to this city and neighborhood, but to be extended to any part of the Province, on the necessary guarantee for their safety being given. It is not intended that this Library shall interfere with the circulation of works from the Libraries of Mechanics' Institutes; for owing to the very low fees charged by these Institutions, they cannot afford to purchase for circulation works of the class here proposed, which vary in price, generally, from \$3 to \$12 per volume; and which are also too expensive for working men, with few exceptions, to purchase for their private Libraries, but who would

for the use of such works cheerfully pay a fee of, say, from two to four per cent. per week, on their first cost.

The financial difficulty is the only one likely to delay the organization of this Library, but we expect to be able to announce its commencement—though small it may be—in the next number of the Journal; and we trust that many of the classes for which it is intended will fully avail themselves of its advantages.

TO SUBSCRIBERS.

Subscribers who have not already paid, are urgently requested to forward the amounts due for the present year, as well as all arrears, to the undersigned, either in postage stamps or otherwise. All Subscribers, except those residing in Toronto, Montreal, Cobourg, Hamilton and Whitby, who are in arrears with their subscriptions, will receive an account of the same enclosed in the present No. of the Journal. Where no account is so enclosed, it will be understood the only amount due is for the present year, 75 cents.

Members of Mechanics' Institutes and Agricultural Societies, paying directly to their respective Secretaries, without having to be waited upon for payment, are only charged at the rate of 50 cents per annum.

As the subscription to the Journal is small, and the loss sustained by the Board in publishing it is large, it is hoped that Subscribers will at once attend to this notice.

W. EDWARDS Secretary.
