

- (b) to construct or arrange for the construction of the works required for rehabilitation on the United States side of the international boundary;
- (c) to provide, as required by the progress of the works, funds for the construction of all works in the International Rapids Section except the following:
 - (1) Power house superstructures, machinery and equipment for the development of power;
 - (2) Works required for rehabilitation on the Canadian side of the international boundary; and
 - (3) Any side canals and locks that may be constructed on the Canadian side of the international boundary.

The Government of the United States agrees further to provide, not later than the date of the completion of Canadian links in the deep waterway, for the completion of the works in the International Rapids Section of the St. Lawrence River, and of the works in the Great Lakes system above Lake Erie which will constitute essential links in the deep waterway to the sea.

ARTICLE IV

The High Contracting Parties agree:

- (a) that they may, in conformity with the general plans adopted for the project in the International Rapids Section, construct or arrange for the construction in their respective territories of such power houses, machinery and equipment as may be desired for the development of water power and at such time or times as may be most suitable in terms of their respective power requirements;
- (b) that, in view of the need for co-ordination of the plans prepared by the Commission for general works in the International Rapids Section with plans for the development of power in the respective countries, the Commission shall arrange with any agency in either country, which may be authorized to develop power in the International Rapids Section, for the engineering services necessary for the designing of the power works;
- (c) that, except as modified by the provisions of Article VIII (d), the quantity of water diverted for the production of power in the International Rapids Section shall be equally divided between the two countries; and, upon completion of the works, the quantity of water utilized during any daily period for the production of power on either side of the international boundary in the International Rapids Section shall
