

## 2. Permanent Television Coverage.

Detailed cost estimates will be provided by the project team when the permanent installation requirement is known.

Nevertheless, the project team provided an approximate figure of 1/2 million dollars per committee room.

The stages would be:

### Stage 1

Rooms 308, 371 West Block with upgraded permanent lighting and audio, plus 3 cameras and portable control console.

### Stage 2

Rooms 308, 371 West Block, plus two 3 camera units.

### Stage 3

Rooms 308, 371, and two or three other rooms possibly in renovated East Block plus permanent or portable control units.

N.B.: A single control room for several committee rooms could be more efficient by Stage 3, because some technicians could handle output (for instance, sound and maintenance) of more than one room at the same time.
