## WEATHER GUIDE.

The following Table (the result of many years' actual observation) is attributed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
	Between midnight & 2 A. M.	Fair.	Hard Frost unless wind be S. or W.
	" 2 and 4 A. M.	Cold with showers.	Snow and stormy.
	" 4 " 6 "	Rain.	Stormy and rainy.
	" 6 " 8 "	Wind and rain.	Stormy.
	" 8 " 10 "	Variable.	Rain if wind W. Snow if E.
	" 10 " 12 "	Showery.	Cold and high wind.
	At 12 Noon, and to 2 P. M.	Very rainy.	Snow or rain.
	Between 2 and 4 P. M.	Variable.	Fair and mild.
	" 4 " 6 "	Fair.	Fair.
	" 6 " 8 "	Fair if wind be N. W. Rainy if S. or S. W.	Frosty if wind N or N. E. Snow if S or S. W.
	" 8 " 10 "	Ditto. Ditto.	Ditto. Ditto.
	" 10 " midnight.	Fair.	Fair and frosty.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of the changes happen, the more foul and wet will be the weather that will follow.
