**F. J. DRAKE** - Belleville, Ont

## THE LEFFEL AND VULCAN TURBINES

possess DISTINCTIVE MERITS which should have the attention of water power owners  
1st—They are strongly and carefully built. 2nd—They are economical in their use of water  
3rd—They develop more power in proportion to the water used than any other Turbine built

Mr. J. D. Flavelle, of the Flavelle Milling Co., of Lindsay, writes us under date March 7th as follows:

"Referring to the two 74" water wheels (Leffels) purchased from you during the past year. As far as we have had an opportunity of testing, they have done their work excellently, in fact are doing more than you guaranteed them for. We took a test of the power they were developing with a head of water of 3 ft. 10 in., and they developed very close to 100 h. p. We are thoroughly satisfied with same."

This letter is but one of many such

—We manufacture also—

**The Lane Saw Mill, 4 styles of Shingle Machines,**

**Lath Machine Edgers, Trimmers, Pulleys, Hangers, Boxes, Etc.**
