

from six to ten drachms, Castile soap one drachm, Spirits of wine one drachm, syrup to form the ball. If mercurial physic be wanted, add from one half a drachm to one drachm of colomel.

Previous to physicing a horse, and during its operation, he should be fed on bran mashes, allowed plenty of chilled water, and have exercise. Physic is always useful; it is necessary to be administered in almost every disease. It improves digestion, and gives strength to the lacteals by cleansing the intestines, and unloading the liver; and, if the animal is afterwards properly fed, will improve his strength, and condition, in a remarkable degree. Physic, except in certain cases, should be given in the morning, and on an empty stomach; and if required to be repeated, a week should intervene between each dose.

Before giving a horse a ball, see that it is not too hard, or too large. Cattle medicine is always given as a drench.

No. 64. *Physic for Cattle*.—Cape aloes, four drachms to one ounce, Epsom salts four to six ounces, powdered ginger three drachms. Mix and give in a quart of gruel. For calves, one-third of this will be a dose.

No. 65. *Tonic for Horses and Cattle*.—Sulphate of copper one ounce to twelve drachms, white sugar one half ounce. Mix, and divide into eight powders, and give one or two daily in the animal's food.

No. 66. *Cordial for Horses and Cattle*.—Pow-
