HUN INTERESTS HANDED OVER TO GOVERNMENT

An order issued by Justice Rose at Osgoode Hall yesterday at the request of C. C. Robinson, acting for the department of the secretary of state for Canada, places the administration of the German Development Company of Canada and certain interests in the Broseau and Rocky Mountain Colonies in the hands of the minister of finance and receiver-general of Canada, who will appoint a comptroller at an early date, as well as other officials to look after the properties. The order gives the officials to be appointed the right to sell, mortgage or otherwise dispose of the companies concerned. The order has been issued to allow the business to be carried on under Dominion control so that it cannot be used by the enemy.

PEOPLE ARE URGED TO FILL COAL BIN

If They Do Not Get Coal in Now It is Not Fault of Dealer.

"Because people can see the sun now on both sides of the fence they forget what we went thru last winter," said M. A. Harrington of the fuel controller's department. "At the same time we must acknowledge that the coal is not coming in as it should." Mr. Harrington explained that if people did not get coal it was not the fault of the dealer. He was there to sell coal, and if he could get it he would likely be glad to sell it to his regular customers. For those who had no regular dealer it would be a sad lookout unless they could see to it that they were sure of the coal in the bin before winter. It was entirely up to the United States fuel administration, now called the contracts committee, said Mr. Harrington. He said that allotments for each of the states and Canada were made and would be out the first week of July. The amounts would be for the months of July, August and September. "Toronto burned 75,000 tons of coal during April, May and June," said Mr. Harrington. "They were extra cold months, but people must now remember that there is now that much of our year's allotment gone. Every time a cold day comes there is no need to rush to the coal bin. People must realize that it is not 1915 and use substitutes." If the amount of coal coming into

Canada was the same as it was during 1916 and 1917 Canada should get during July, August and September approximately 1,064,195 tons, said Mr. Harrington. But for 1918 the tonnage for Canada is one million tons short, and the sooner the public realizes the fact the sooner conservation of coal will take place. The fuel controller is doing all in his power to help, as is shown by the late order-in-council, where industrial consumers are forbidden to use rut, pea, egg or stove coal for heating or power purposes without special consent from the fuel controller. "There is no need to be panicky, however," said Mr. Harrington. "It is a matter of not resting until you are sure of your own supply. Coal will undoubtedly advance to at least \$11 a ton after July 1. It can't help it with the increase in freight and wages and everything connected with handling it. Even at that the dealers are not taking advantage of the offer of the fuel controller, which allows them a net profit of 50 cents a ton."

Y.M.C.A. BOYS LEAVE TODAY FOR PINECREST

Today at 1.30 p.m., a party of 125 boys between the ages of 12 and 14 leave on the Canadian Northern for Muskoka. Pinecrest is the camp of the city-made Y.M.C.A., and is situated on Clear Lake, two miles from Bals. The boys go to Torrance station, and have two miles to walk or sail over to the camp site. This is the first year the "Y" has had a camp at this place, going previous years to Couchiching, under separate "Y" auspices. This year all the city branches have combined for one large camp. Only boys not

eligible for farm work are taken. The camp will be open during all July. For four weeks the price is \$24, and for two weeks \$12 covers all expenses, railway fare included. The boys are under the charge of C. F. Watson, Central; T. H. Addy, West End, and H. J. Walker, Broadview. The camp is arranged in sections, with six boys and a leader in each tent. One large dining-tent accommodates all. The camp is provided with a baseball diamond, athletic track, eight canoes, two war canoes, a launch, a dinghy, and many row boats. Cooks are supplied, but the boys take care of their own tents, and wash their own dishes. This "housework" is done on a point system, and each day a pennant is given to the tent which has kept the tidiest place and the best discipline. On the "out" week, which is spent on hikes, the boys sleep on the ground, and do all their own work, cooking over camp fires. Special services are held for devotion, the morning watch and the evening quiet hour being daily occurrences, while for Sunday, some special speaker is supplied, who speaks outdoors under the trees to the whole assemblage.

W. Mallon.
