to obtain a renewal of its temporary injunction. More Mines in Operation.

Reports from agents of the department of justice and from miners and operators showed little overnight change in conditions, except that operators claimed 44 union miners in operation in West Virginia, a gain of 32 over last Saturday. Officers of the union forces, however, claimed 40 representatives of the miners denied these reports and asserted that their own figures showed no crumbling of union forces anywhere in the bituminous regions.

Dismissal of all court proceedings, asked for today by the unions, will make it possible, labor leaders said, for the two sides, thru their full scale committees to negotiate a new wage agreement at once sitting. Refusal and issuance of more drastic orders directing heads of the miners' organizations to resume operations would mean, these officials said, a long drawn out struggle.

Government officials took another look at the stock reports, and while these indicated coal enough to meet immediate needs, the fact stated them in the face that the daily consumption was around ten million tons, while the daily output had been reduced by the strike to about three and a half million tons. It was easy for a man to state, they said, that the stock of stocks would last, assuming that the mines were filled for an average run of 30 days.

New York, Nov. 6.—There are 210 ships in the port of New York admitted by the order of the railroad administration. The central committee of many of these, however, are British vessels, which, it is believed, will be able to proceed to Halifax for coal.

Chicago, Nov. 6.—New restrictions on the use of soft coal were announced today. In some localities orders were more drastic than during the war, but the general situation showed little change. Indiana decreed lightless streets, discontinuance of electric signs and signs.
