Croup Is The Terror of Thousands Klondikers

Of Young Mothers, Because Its Approach Is So Insidious, and Its Outbreaks So Agonizing and Frequently Fatal.

Croup usually commences with a cough, more or less fever, alternate hot and cold spells, flushed face, watery red eyes and restlessness at night. Not a moment should be lost, whether the case be common cold or not; it may develop into true croup. If you live in the country or on the outskirts of a town or village, it is a very wise and necessary precaution to have a good croup remedy at hand, especially in the Fall, Winter and early Spring months.

Shiloh's Cough and Consumption Cure

acts like magic in cases of croup; it is soothing, loosening, expect-orant, pleasant to take and perfeetly harmless. Thousands of mothers will recognize the picture conveyed in the following extract from a letter to S. C. Wells & Co., Le Roy, N. Y., from an old lady whose grandchildren have been cured by Shiloh's Cure :-

"Never shall I forget the agony I experienced that night, so many years ago, when little Tom was taken with the croup. It was midnight and snowing. Our house was a mile from the nearest village; I had no one to send for the doctor. I had given Tom nearly a bottleful of syrup of ipecac, without effect. He was suffocating! Frantic with fear, I pulled him out of the bed, and, as a last recourse. made him turn round and round; in fact, I whirled him until he grew nauseated and suddenly threw up a quantity of phlegm; his life was saved! When the strain was over and Tom safely tucked in bed, I collapsed. With dear old Shiloh at hand, nowadays, we have no such terrible scenes to contend with, for
