In 1816 England was, without exception, the state most heavily burdened by the weight of taxation. She is now, in proportion to her wealth, less taxed than France. Thirty years ago England spent £86,000,000 sterling, while France spent but the half. In 1844 England spent £55,000,000, whilst France has expended £57,500,000.

A wife should have nine qualifications, which begin with the letter P. Piety, perseverance, patience, prudence, patriotism, politeness, persuasion, penetration, and portion. That which *should* be first of all, and *most* of all in consideration, which is *piety*, is now-a-days the *least* of all, the *last* of all, and with many *not* at all. That which *should* be the *last* of all, and *least* of all in consideration, which is *portion*, is now become *first* of all, *most* of all, and with some *all* in all.
