Westco Tankless Water System

Means Water for the Farm Kitchen

What could be more convenient than running water in the kitchen of a farm or rural home? Turn the faucet over the sink—the pump starts, and at once you have a vigorous flow of fresh water right from the cistern or other source of supply. Turn the tap off, and at once the pump stops!

For farms and rural homes with electricity available, whether from farm light plant or from central station the Westco is unquestionably the most economical to buy, install, maintain, and operate.

It requires no storage tank, and has no belt, no valves, no gears. The pump has only one moving part, is self-lubricating, vibrationless, noiseless. Write us to-night for particulars.

Made in larger sizes for special requirements.
