

The Better Feeder

LANGDON IDEAL FEEDER

For Better Feeding

Crank or Rotary
Band Knives

THE successful hand feeder estimated in advance the quantity of grain the threshing cylinder would handle to advantage and governed the feed accordingly. The **LANGDON** governing system, acting on the principal of cylinder resistance, accomplishes this same result with a mechanical precision that cannot be attained by human hands. All that is necessary is for the pitchers to keep it supplied. Grain that will pass through the cylinder freely goes over the governing retarder in like manner. Grain that is tough or wet and will offer more resistance in the cylinder is held back and only the amount the cylinder will handle is allowed to pass, in a smooth, even flow. Without the **LANGDON** governing device, which is controlled exclusively by this Company, no other feeder can feed so rapidly or so cleanly, with so little power.

In the selection of material and in mechanical design, Langdon construction is like Langdon feeding, far ahead of all others.

Never before has there been such great need for efficient mechanical devices for saving labor and grain. Never before has there been so great a demand for **LANGDON** Feeders. Complete information about this feeder cannot help but interest you. The least you can do is to investigate our claims of superiority before making your feeder selection. WRITE FOR FREE CATALOGUE. Society, but in that time we have not been idle, and I think I may say that we have accomplished a very great deal of good. The society is gradually growing larger, and the members becoming more interested.

At our December meeting we were called upon to accept the resignation of our president (Mrs. Thornton) which we all regretted very much; still, we are pleased to have her name on our roll, and hope to have her here in person shortly. At this meeting the officers were elected for 1917, as follows:—

Directors—Mrs. Weidenhammer, Mrs. Jas. Steedsman, Mrs. R. Franklin, Mrs. A. Hainsworth, Mrs. A. W. Riddell, Mrs. R. Price, Mrs. W. Lerryberry, Mrs. J. Rankin, Mrs. P. W. Perry, Mrs. R. A. Johnston.

Officers—President, Mgs. R. A. Johnston; first vice-president, Mrs. Lerryberry; second vice-president, Mrs. P. W. Perry; sec. treasurer, Mrs. J. M. George;

assistant secretary, Mrs. F. M. Turner; auditor, Miss Cowan.

At our November meeting we were asked to donate small pillows to the General Hospital, Winnipeg, which resulted in over 40 pillows, 10 in. by 14 in., being sent in. At this meeting Mrs. Robert Franklin gave us an excellent paper on "The Country Church and its place in our country's development."

In January, we had two short courses, one on "Home Nursing," by Miss Clark, and one on "Cooking," by Miss Atkinson, both very interesting.

At our February meeting, we had a very interesting paper, prepared by Nurse Stewart, on infectious diseases among children. Then, for our March meeting, we listened to two very full and lengthy reports of the convention held in Winnipeg during February, by our delegates, Mrs. R. A. Johnston and Mrs. J. M. George.
