

## Pulverizes Three Times Spreads Seven Feet

That's the kind of service you get from the "Nisco" and "New Idea," the spreaders that have specially patented features you can't find on any other spreader in the world.

The double cylinder and the special steel distributor are responsible for this. The double cylinder thoroughly pulverizes the manure and the Steel Distributor spreads it 7 ft. wide. Covers two corn rows at once instead of one. Saves wear and tear on man, horses and machinery. Spreads an acre with a half mile less travel than any other spreader.

Both machines built low down for easy loading. The "Nisco" is only 41 in. to tops of sides yet has 19 in. clearance under conveyor. The "New Idea" is 42 inches at rear wheels. This machine tracks and is a favorite with dairymen in hilly sections.

Forty points of  
Unquestioned  
Superiority

**NISCO**  
The New Idea

Takes Three  
Whacks at the  
Manure

The wide wheels on both machines, which afford ample traction power, and our perfect pulverizing mechanism, insures light draft machines that can be hauled ordinarily by 2 horses, or at most 3 on loose ground.

Strong braces at the top and sides prevent cramping of the bearings. The "New Idea" has a steel sill with bearings bolted to it.

Both machines are built for durability and simplicity. Only the best material and workmanship. Two levers and a foot latch operate the machine, giving six changes of feed or throwing the machine entirely out of gear.

### Special Feed Mechanism and Steel Distributor Found Only on the "Nisco" and "New Idea"

These two features alone are enough to make these spreaders unquestioned leaders. They are patented and cannot be used by anyone else.

**Axle Feed.**—The rear axle turns with the wheels when going forward but is stationary when backing. One end moves the pulverizing cylinder and the other operates the feed. Absolutely smooth spreading and no ratchets clicking to annoy horses.

**Steel Distributor.**—Another special patented feature. Gives a 7 ft. spread so even it looks as though it were sown. Cover two corn rows at once instead of one. Saves time and labor and wear on machinery.

### AGENTS Wanted Everywhere in Canada Money-Making Offer for Right Man

Here is the biggest opportunity in history for you to make profit selling spreaders to Canadian farmers. War conditions have forced intensive farming so the farmers can raise twice as great a crop this year as before. This means a record breaking sale of spreaders.

We have built a Canadian plant for prompt shipments. Get lined up now and share the profits. Write for details or if you want a spreader only for your own use send us the name of your regular agent.

## The Silo For Canada

Known as the one staunch preserver of sweet succulent silage through fiercest winters and driest summers, needing no repairs, no painting, no adjustments, the Natco Everlasting Silo is recognized as the silo for the Dominion. It is made in Canada for Canada. It's weatherproof, decayproof and fireproof, convenient and attractive and will add as nothing else to your feeding profits. The Natco will be the most valuable addition to your farm buildings—a structure that you'll be proud of. The

### Natco Everlasting Silo

"The Silo That Lasts for Generations"

is built of hollow vitrified clay tile, whose glazed surfaces are impervious to air and moisture and whose double air compartments prevent freezing. The door frames consist of special timber. Doors are of galvanized steel. The greatest convenience. Double doors. Built of steel and reinforced with this strongest of all silos. No blowdowns—therefore a taller silo with smaller diameter can be built—exposing less silage on top. No sagging can take this giant of green feed and silage. Send today for list of Natco owners in your province and our Catalog 4.

# Ideal

True to Its Name

It is actually the IDEAL Fence, ideal in every way. Every wire—line wires, the uprights and the locks are hard, springy, full-gauge No. 9 heavily and evenly galvanized. Every lock is on, and every roll goes up straight and true—no long wires to make the Fence sag, and no short wires to take up all the strain and then break. The spacing between the uprights is accurate and exactly as our catalogue states.

Rod for rod Ideal Fence weighs heavier than others. Extra weight means extra strength, extra life and extra value. Do not forget this when you buy Fence, and do not forget that our catalogue No. 4 contains valuable information and tells all about Ideal Fence and Gates and Ideal Fence Posts. It only costs you a postal card—Write for it to-day.
