

Endurance Counts Most

WHEN your sheds are full of machines and one or two are crowded out into the open, which is it that invariably stands

outside, with the sun and the wind beating on it every day, drying and warping the wood, or with rain rusting the iron? It's the wagon. Other machines are stored away, dry and covered, yet many of them work for short seasons only. The wagon works the year around, is always under the strain of heavy burdens, always getting rough treatment. It can't stand the strain of such a life for many years, unless, like I H C wagons—

Petrolia Chatham

It has built into it the utmost of endurance, toughness, and sturdiness. I H C wagons are built of wood without a single flaw, every bit as good as they look. Examine them closely; you find no cross grained, knotty, split, or faulty timber. Every stick—oak and hickory for the wheels, yellow or bay poplar for box sides and long leaf yellow pine for bottoms, is selected from first grade lumber and carefully inspected. Every stick is toughened and seasoned by two or three years of air-drying. No brittle kiln-dried lumber has any part in I H C wagon building.

All steel and iron parts are chosen with the same end in view—greatest durability and longest life. Experts test and verify every part. Before the wagon is ready for you it must pass many thorough inspections. The timber, metal, shaping and fitting, painting, every detail down to every brace and bolt, must be just right.

Buy one now, watch its steady service on your farm, and mark this—your future reliance will be on the I H C wagon. That future order is our ultimate aim. Ask the I H C local agent to show you the I H C wagon best suited to your needs. Get catalogues from him, or, write the nearest branch house.

WINCHESTER

MODEL 1912

20 GAUGE

Light Weight

Hammerless Repeating Shotgun

This new Winchester is the lightest, strongest and handsomest repeating shotgun made. It weighs only about 5 3/4 pounds, yet it has surpassing strength, as all the metal parts are made of Nickel Steel, having about 50,000 pounds more tensile strength to the square inch than ordinary steel. The receiver is free from screws and unsightly pins to collect rust and dirt and work loose, and its solid breech, closed at the rear, makes it extremely safe. It operates and works with an ease and smoothness not found in similar guns of other makes. It is simple to load and unload, easy to take down, being separated into two parts quickly without tools. For pattern and penetration, it is fully up to the established Winchester standard of shooting quality, which has no superior.

Ask your dealer to show you one, or send to Winchester Repeating Arms Co., New Haven, Conn., for illustrated circular.

A 20 GAUGE GUN FROM BUTT TO MUZZLE.

CUNARD LINE

Canadian Service

IMMIGRATION DEPARTMENT

Special Interest to Farmers' Clubs

We secure "Help" for farmers from the country districts of the British Isles.

Requisitions must be filled up. Copies sent on application. Average time to get you "Help," about six weeks. No fee charged. Only regular fare on ocean and rail to pay.

You need not be without "Help" this summer or fall if you send requirements early.

Write for further particulars.
