Complete Protection

A sprinkler system protects a plant completely from damage by fire—but a small fire may be immediately extinguished by the sprinkler, yet the water will be left running all night—to do perhaps thousands of dollars' worth of damage.

A Sprinkler Supervisory System turns in a fire alarm as soon as the sprinkler starts to operate brings a man to the scene immediately to turn off the water as soon as the fire is out.

In addition, it keeps us informed of the height and temperature of water in the tank and of any shutting or opening of valves, so that we know the system is always in working order.

It will interest you to know how this system takes the place of a watchman on nights, Sundays and holidays. How by our service you can procure complete protection and that feeling of security that can be obtained in no other way.

WHEN YOU DICTATE TO

THE DICTAPHONE

You know that your letters will be written exactly as dictated—that your very words are recorded on the wax cylinder, and that your stenographer writes from them.

No difficult-to-decipher shorthand symbols make your letters other than dictated.

No waits, no interruptions or questions to interrupt your train of thought. You merely push the button and get out of your system the phrases and expressions as you would speak them to the man you are writing.

Demonstration in your own office, on your own work, without any obligation on your part.

Reach for your telephone and call Junction 4364—that's "The Dictaphone," and we will do the rest.
