Missionary Anniversary.

BRUNSWICK STREET CHURCH.

Brunswick Street Church on Monday night the ness in many families sensibly affected the attendance. After the opening services by Rev. J. McMurray, M. H. Richey, Esq., was called to the chair, and addressed the meeting.

The missionary spirit had been an essenti characteristic of Methodism ever since John Wesley declared "The World is my parish." It was chiefly the conviction that this agency was under the blessing of God, accomplishing widespread good for the human family, that poverty for wealth, a simple for an elaborate ritual. Cushioned seats, charming music and elequent cratory might attract the luxurious worshipper, but our glory would be departed and the day of dissolution near. There was in by gone days in Canada, where he listened made by John Sunday when pleading for Missions. In those times the burden of the the truth may enter in."

The Rev. J. A. Clark, read the report which, in addition to the information usually given, contained some very interesting details with reference to the work in certain parts of the Mission field.

\$100 from an anonymous friend as a " Thank to send the men who were ready to go out into offering for success in business."

Rev. Mr. Milligan announced the first instal-

Rev. J. Read, who moved the first resolution, owed his present position, his Christian happiness and his hopes of everlasting life to the labours of this society. The report shewed that we were still a working church Our glory lay not in the triumphs of architecture, music or eloquence, but in our reflecting that shines on Zion's hill." He referred to the exercises by Rev. Mr. Milligan, the Hon. S. L. Missionaries who had finished their course Shannon was called to the chairthe church would be crowned with success.

when the evangelization of the wide world was Almighty for the furtherance of the Gospel. the object, the Church must arise in her united The motives of the actors in these revolutions strength. It would be useless to speak of what might be more than questionable, but their might be, if there were such a union, if in one doings were overruled for good. A despatch to the British Minister announces

The Beauties and Mysteries of Ne-

The times are pregnant with startling even's; old isms, theories, and fallscies are fast disappearing beneath the gigantic wheels of progresion and human development. Change is written, with the iron finger of time, upon all matter, seen and unseen, material and spiritus. --The mighty, omnipotent power that fashicned the stupendous ords that revolve in the immensity of space, created all things in wisdom and purity. The majestic ocean, the deep blue sea, the beautiful earth and all things therein con- ta, and tained, were planned and created by virtue of fected, that universal law of harmony, whose power Disholds sway over all. Intelligence is manifested f the n all created things, both great and small—the post tiny insect, the beautiful butterfly, and God-like man, are each endowed, according to their kind, with that instinct or intelligence ordained by disca Him who " doeth all thir gs well."

Wisdom, justice, and love are the three great when c standard-bearers whose sumptuous hands mete en con out to each individuality the measure of Divine, universal law, designed by that mighty mind loar. who fashioned alike a neble man in his own medy to image and all lesser created things. The beauties and wonders of nature never cease to the progressive human mind. Eternal progression written with the unerring finger of Deity chre upon all. The theme of human life is laden with the sweet incense to all who, like angels of mercy and goodness, are ever busy, ever ready to device means for the alleviation of human woe and the prolongation of life. The unceasing march of individual and national progress is alone due to the bold and fearless thinkers and actors upon the stage of mundane life .-The stern exigencies that confront and imperit the gigantic minds of all countries cannot awe or swerve them in the path of duty and power sonding Disease and death now hold carrival throughout the land; suffering humanity calls loudly for the "Balm of Gilead," whose subtle, mystic power can heal and save from wreck and ruin. saving and skillful hand may be found, ready to administer to the suffering at all times, in Prof. Hamilton, at his old medical emporium, where thousands, from all countries and all climes, have received the healing balm for

In Harper's Monthly Magazine for February, 868, may be found a Life of PROF. R. LEO-NIDAS HAMILTON, M. D., whose discoveries

medical world, and whose success is carrying joy and restored health to thousands.

His well-attested cases of liver diseases, lung diseases, blood diseases, and diseases of the YARMOUTH ELECTION.-The writ for the kidneys, bladder, spine, stomach, and other organs are now well known all over the United Mexico, Sandwich Islands, and in many of the commercial and missionary settlements in every part of the world.

For the benefit of the sick who may wish to know positively when they have derangements of the Liver, of more or less severity, a combination of the usual symptoms found in such cases will be found below :

SYMPTOMS OF LIVER COMPLAINT. A sallow or vellow colour of the skin, or yellowish-brown spots on the face and other parts of the body : dulness and drowsiness with fretite; sour stomach, with a rising of people are so poor that they can give nothing to Wednesday week a led nine years old son of which is often attended with pains and tenderpeople are so poor that they can give nothing to

Mr. John Beharrel, Amberst Head, had his thigh breast, and about the shoulders; colic pain and soreness through the bowels, with heat; constipation of the bowels, alternating with frequent hearted and well-known friend Goodison, were to devise liberal things toward the rebuilding of the church in "Twillin gate Newfoundland," or were to forward a boxful of standard works to attacks of diarrhes; piles, flatulence, nervous-

> DISEASES CAUSED BY LIVER COM-PLAINT.

The Human System, the most perfect of all the works of the Creator, is so constituted that, to be entirely healthy, it must throw off the waste, worn-out, and poisonous materials, as fast nourishing and healthy blood principally through the offices of the stomach, liver, and lungs, The worn-out materials are mostly excreted by the liver, lungs, and kidneys; but all medical men have heretofore failed to recognize the vast of BILE which should be manufactured by the liver and poured into the intestines each day is two and one half pounds. All persons interested to know this fact, and the experiments to prove it, may consult Verdaungssæfte and Stoffwechsel, Leipzig, 1852, or they may see a resume of these facts in Prof. Dalton's Physiology. Remember one thing more: The bile is something more than the natural physic of the bowels, as has heretofore been taught by eminent medical men. The bile is mostly made up of the waste matter of the blood-effete, wornout, and injurious materials. If the liver does not make this bile and pour it into the intestines daily, it remains in the blood as a poison. It poisons the blood itself, and circulates, as irritating and poisenous matter in the blood, to every organ in the system.

The blood, poisoned with the daily accumulated excess of bile, returns from the liver to the heart, and the nerves of the heart are affected. and we have an oppressed feeling at the heart, and palpitation; and if this cause is long continued, we get chronic irritation, undue excitement, and morbid nutrition of the heart, de-

Just so with the Lungs. The bile-poisored blood goes from the upper and right cavity of the heart to the lower cavity, and thence directly to the lungs, circulating all through those most delicate organs. The lung tissues are poisoned and irritated, and they invite the scrofulous humors of the blood because they are thus irritated. Hence Consumption which is local scrofula, so defined and proved by Lugol and all the most scientific authors. The lungs try to. oxygenize and purify the blood, and they do it. in a great measure; but they are overworked and irritated, and you smell the blood-po'son matters in the man's foul breath. Caterrh, Bronchitis, Asthma, Nervous Cough, and Consumption itself are the results. If the Liver had done its duty-made and excreted that BILE -the Lungs would not have been diseased.
