Read What Prof. Thos. Shaw Says About this District:

Speaking of Last Mountain Valley, he writes, after personal inspection: "This rich and beautiful farming section lying east of Last Mountain Lake, embraces one of the finest areas, in the Northwest. The land is undulating in this region, mostly open prairie. The soil is a rich, black vegetable loam, from one to two feet deep, and is underlaid with a clay sub-soil. Frost, to injure the wheat is virtually unknown. Being thus favored so highly by nature, it is not surprising that the production of wheat in this region is phenomenally high; in several instances forty to forty-five bushels per acre have been reaped. Oats, Barley, Flax and all small grains yield relatively as good as those of wheat. Potatoes grow most luxuriously. Two or three years ago, there were not more than thirty-five settlers in the entire area, now there are over three thousand and others rapidly coming in."
