ing of evil shadowed my heart; I tottered to the doc-two mes, whom I knew to be his intimate friends, were bearing him to his own room, not a corpse, but a loathaome insbriate! How long a time intervened, I knew not; but on returning to my consciousness, I repaired to his room. There had fast-tears of shame, of humbled pride. He rose in the morning with feelings of heart-felt penitence, and carneatly resolved that the offence should noire the vipeated. But the shame of discovery was past; its dread no longer kept him within the bounds of propriety as it had ence dome. Of a social nature, and convival habits, he could not resist the temptation of the glittering wine-cup, nor the pleading of friends-associates, I should say. He fell, and, holy angels west over his ruined hopes. Night after night was the same heart-ressing access repeated, and Alfred Wentworth, the noble, the glittering wine to the sine out of the glitter in the should be and the state overth, was fast becoming a-shall I, can I, write it? But why do I wish you to remomber me at all I. Throw not, I seek not to analyze my foelings. I only know that we are separated.— Dean, Dean Paris to my now decolate home. Pity and for-give the workthout the worl 'Atracto' I was lying in my own room ; the curtains were could dear my mother's voice ; but its tones were to entry any mother's voice ; but its tones were to entry any mother's voice ; but its tones were to entry any think she will recover, doctor f Antificial Production of diamond powder. M. Despretz has made two communications to the Academic des Science, upon carbon. In these he states that placing at the infe-rior pole of a voltaic battery, a cylinder of pure charcoal (its purity being secured by preparing it from crystallized white sugar candy) and at the superior pole a bundle of fine platinum wires, so arranged that the charcoal was in the red portion of the elec-tric arc, and the plantinum in the violet-he found the carbon volatilized, and collec-ties arc, and the plantinum in the violet-he found the carbon volatilized, and collec-ties arc, and the plantinum in the violet-he found the carbon volatilized, and collec-ties arc, and the plantinum is the violet-he found the carbon volatilized, and collec-ties arc, and the plantinum is the violet-he found the carbon volatilized, and collec-tied on the plantinum wires in a changed state. In these experiments the current has been continued a month in activity and found to be sufficiently hard to polish rubies with great rapidity, and when burnt it left Have I obtained crystals of carbon which I can separate and weigh, in which I can determine the index of refraction and the Nave simply produced by the electric arc, and by weak voltaic currents, carbon crys-talized black octohedrons, in colorless and by weak voltaic currents, carbon crys-atiniar result has been obtained by de-omnosing a mixture of coloride of carbon and alchol, by weak galvanic currents. fatal." I comprehended it all now; and, as I marmur-ed, "Mother!" the flood gates of mamory were opened. I will not dwell on the weeks of con-valescence that followed, nor how slowly they passed.

A similar result has been obtained by de-composing a mixture of coloride of carbon and alchol, by weak galvanic currents. The black powder deposited was found to possess equal hardness with that which was sublimed and rubies were readily which he is polished by it.

From the Paris Journal des Debats,

THE SUNBEAM. DEW-DROP AND ROSE. A dew-drop hung trembing like a timid thing apon the soft velvet leaf of a rose. It sparkled and flashed, each time the breeze wooed the rose buds with myriads of brilliant huee, till it seemed as if a rainbow had been imprisoned within its crystal bosom, and was struggling to escape. Now the rose beheld its beauty, and thought she had sever seen so lovely a creature; so she spoke to it genity, in a voice that seemed like the essence of a summer wind "Beautiful dew-drop!" said the rose, "I love you. You are like the stars that I see looking down from heaven on me when the wind wakens me at night; but I love you more than I do them, for you are near me, and they are far away. Come dwell with me ever, sweet geen of the murning, and to thee will I unlock all the fragrance of my bacom." The rose as he spoke, unfolded her delicate leaves, until the dew-drop held the eimson depths of her heart, glowing with love and passion. Just then a siy sunbeam peeped out from be-hind an embroidered cloud, and as with dew-drop, which was quivering with emotion at the declara-The Tarkish States receive principally from England cotton goods, hardware, and iroamon-gery; from Trieste sugar; and from France, as from Austria and Germany, woollen and ailk goods, farniture, millinery, and wines. Wednesday, January 4, 1853. THE ADDRESS TO MEMORY. MACOOWAN AND N'SACENY SEQUENC. We hope to have made it manifest, that the Con-missency of which the above gentlemen are the missency of which the above gentlemen are the intensity of the area of the approximation of the intensity of the assessment of these who gave their votes for Meases. Macgowan and M'Egeben, of the two-has a tight to dictate in what manner the who would update them, or a combination of the two-has a tight to dictate in which manner when the who would update them, or a combination of the two-has a tight to dictate in white manner the above and one of the assessment and the assessment form either portion, contained the boan fide ex-tension of the sentiments of such portion, and that board the signatures themelores gention. Now, the Address to Mears, Macgowan and Me-ker of these particulars. Is the first phe-site of the sentiments of the Constitutency, the whole is the production of Edward Whelen, whilm Cooper and John McInton; seither of who believe, have the impudence to term Public Mea. in the District; but who have had the anparalelled audacity to get up, on false statements and protences, what they have the impudence to term Public Meet-ings of Electors, held in kitchens long after the time appointed and attended, with that powerful stimulant, technically called "white eye" otherwise American ram. Some of the scenes at which, we are informed, were of the most ladicious character and would have been worthy of the pencil of a Cruickshank or a 'Phiz.' But that is not the worst feature in the case though bad enough and sufficiently degrading. The most shameful means were, we are well advised, resorted to to obtain eignitures, whole pages of paper are signed in the same band writing, and we are told, and have no reason to doubt the fact, that the means of whole fami-lies have been inscribed though not ene of them were reason to doubt the fact, that the means of whole-fami-lies have been inscribed through not one of them were entitled to vote. There is nothing easier in the world than writing down the name of McDenald, and it is a matter of little consequence whether Donald John or Angus be prefixed, as no man can tell who the name is intended for, unless the soubriquet which usually attached to the name is added; and the same may be said of McPhee and McIanis. There is also, nothing easier in the world, than getting signatures to papers, when the parties who get them up, are un-scrupulous mer, who stick at no kind of deception, and who hesitats not to give the most solean asse-rances of the truth of their assertions, men with whom the lie is a matter of daily occurrence, and perjury familiar. Mr. Macgowan and Mr. M'Eachen are both well aware of this, and they have hitherto, we find from Whelan's Gazette, treated the Address or Remosstrance, not with contemnt, bat with that John or Angus be prefixed, as no man can tell who

rge of his duty which the Court peculiarly reorked on at account of the greater gravity viewed in comparison with a c harge when

charge when viewed in comparison with a common much. The remaining 11 came were larcenies. And the Court explained the antars of the law is such came The Court then allosied to the Licence Act 9 Vin. Cap 36 and explained that it was the daty of the Grand Jury to hear evidence on both sides and that it was an exception to the general rule which had infers here pointed out The Act 16 Vie. Cap. 10 was also mentioned and it was with much pleasure and satisfaction, that we heard the Court prass upon the Jury the necessity of keeping in view the objects intended to be obviated by Status, "the preamble to which marks as strongly as language well can, the notives which influenced the Legislature in passing it, and you will do well, remarked the Chief Justice to bear in mind the lan-guage of that pressuble which declares that the act-regolating the sale by licence of spiritoous and other liq opinous is greatly evaded and abused, and under coler of such act, many persons keep houses for the rotail of spiritous liquors without the accompassion for investing in the way attensary for public accompa-detion. but rather were serie to societ, and semitravellers prescribed, and many of such licensed houses are in he way necessary for public accommo-dation, but rather mere ceris to society, and again the language of the 13th section of the Act which enacts 'that it still be deemed a remedial Act, and shall in all respects be construed liberally with the view of "supplying and countenancing the evils and immorality arising from the evasion, abuse or misuse of licences granted or to be granted for the retail of miritmose linener."

liquors." * Thus in the printed copy of the Laws of 1858. qu. suppressing ?

TO THE EDITOR OF HASSARD'S GASETTE

To THE EDITOR OF HASEARD'S GAZETTE, SIR; A correspondence between certain gestlemen re-cently in the Commission of the Peace for Queen's County and His Excellency Sir Alexander Banner-man, has been published in your paper and in the *Islander*, relative to the appointment of this Hos, Edward Whelen to the Commission of the Peace for thet County, after having offered, as it is alloged, in their hearing a gross insult to the Public Nesting that was held in consequence of the calamitous less of the Fairy Queen. of the Fairy Queen.

of the Fairy Queen. A farther correspondence subsequently appeared in the columns of the same newspapers, between the Rev. Dr. Evans and His Excellency, originating in certain reaarks advanced by His Excellency with a view of palliniting Mr. Whelan's conduct at that meeting, which remarks the Rev. Dr. Evans con-ceived reflected upon him in his sacred calling as a Christian Minister. Christian Minister. We believe there are few in this community who

We believe there are few in this community who would venture to question the veracity of any one of the fourteen gentlemen whose names are subscribed to the communication addressed to His Excellency on the 27th October last. We, therefore, do not consi-der that the truthfulness of their statement regarding the impropriety of Mr. Whelan's conduct upon the occasion referred to requires our confirmation; never-balance are uncer streament at and maximilate scheme. occasion referred to requires our construction; never-theless, as we were present at and were close observ-ers of the proceedings of that meeting, we do not deem it out of place thus publicly to express our con-viction that the circumstances under which Mr. Whe-lan committed himself are faithfully narrated by the Rev. Dr. Evans, in his letter to His Excellency of the Rev. Dr. Evans, in his letter to His Excellency of the 23d ultimo; and we also affirm, that the justly merit-ed rebuke administered by the Rev. Dr. Evans to Mr. Whelan was the effect, and not the cause of Mr. Whelan's contemptuous observation, that "neither he nor the Government cared a pin for the Resolu-

ions,'' or words of similar import. E. L. Lydiard Job Bevan William Tanton William Lowe G. W. De Blois John Brecken J. Mackieson Henry Palmer James Purdie Charles Weish James E. S. TRADE AND COMMERCE OF TURKEY.

Just then a sly sumbarn peeped out from be-hind an embroidered cloud, and saw the dew-drop, which was quivering with emotion at the declara-tion of the rose. "Heed not that foolish flower, sweet dew-drop!" oried the sunbarn : " she woold never love you as I can. Be mine, and I will bear thee up amongst the highest stars of heaven, and when I look at thee thou shalt outshine wheen ell." The dew-drop was bewildered, and knew not what to say. It would gladly have reigned in the golden heavens, and been the queen of the stars, but it feared the fierce arder of the sunbeam : and then the roise kept whisparing such sweet things to it with its mossy lips, that it could not help loving its genile voice. So it thought a little, and then replied to the sunbeam thus— "O, golden sunbeam ! who gazest at me with thine eyes of splendour ; thou art far too great for me to love thee. What would I,a poor, timid dew-drop, do, wedded to such magnificence as thine ? At thy first embrace, I should meit away and vasih like the moraing mis npon the bills. But the sweet rose I love dearly. Her kisses are laden with perfame, and from her bosom steals forth all the fragrance of love. O fond and beas-tiful flower ! in thy rosy chalice I will dwell far ever and be happy!" So saying, the dew-drop slid gently down into the glowing besom of the rose, and nestled among her velve leaves. Sensible dew-drop ! well didst thou know that it is not the love that dazzles most which brings ithe gratest peace. The love of the sunbeam would have been fastal te thee, while that of the rose gave thee happings and contentment. Love, like the skylark, though sometimes soaring to
