Pointers for Pork Raisers.

Mr. Armour, of the Armour Packing Co., Chicago, who visited Ontario some time ago, has written a letter to Mr. Hodson, superintendent of Ontario Farmer's institutes, in which he has the following to say about hogs and hog-rais-

see the splendid condition and fine appearance of the Canadian hogs and we feel very sure that the Canadian system of careful breeding and feeding is the correct one. We have come to the conclusion that the best breed of hogs for the fancy export trade is a cross of a Tamworth boar and Yorkshire sow. The food for the first four months of the pig's existence would make really very little grains. However, from four months up months, we are of the opinion that the use of corn should be discontinued entirely and the animal fed on peas, barley of crushed oats, with a fair proportion of H. E. Goold and Miss Dobson had the green vegetable food. We are also of the management in hand which is enough to opinion that the weight of the hogs should warrant a pleasant afternoon. Tea was not exceed 200 pounds, nor do we think that more than six hogs should be fed toit is necessary that the animal should

be given all the comfort possible." "We have seen some very fine hogs raised in dairy districts, and we believe that Ontario is singularly fortunate in this respect, having such a large number of dairy farms. These always bring good healthy pigs with a very fine quality of meat. The Canadian hog-raiser is away ahead of the American at present, at least in so far as the English market is concerned. The Canadian singed Wiltshires command a very high premium, and rank almost equal with the finest Danish bacon on the London market."

These views of an export pork packer are deserving of attention on the part of Nova Scotia pork raisers in view of the efforts which are being made to establish a pork packing industrial this province.
