ROBERT EMMETT born 1778. Irish Patriot. Executed when only 25 for planning to seize Dublin Castle. His love for a daughter of Curran is the subject of one of the most touching of Moore's Melodies—"She is far from the Land."

POPE LEO XIII. crowned 1878. A man of culture, he showed himself a Pontiff of enlightened views, while his foreign policy was characterized by foresight and moderation.

GLADSTONE retired from politics 1894. He was then 85, the G.O.M. of England, the first great Home Ruler, his ability as a financier and as a master of exposition has never been equalled.

Masonic Lecture.

It was determined some years ago, by the Masonic fraternity, to have alternate sermons and lectures in connection with the Tasker Educational service, and to-night Past Master C. S. Pinnent, Esq., will begin the fourth Biscuit lecture. Mr. Pinnent is Past Deputy District Grand Master of the English Lodges and it is a rather striking coincidence that the youngest Past Master, Mr. Walter Edgar, delivered the lecture last year. Mr. Pinnent is deeply versed in Masonic annals and history in Newfoundland, and no doubt, a large gathering of the members of the Mystic Tie will assemble to hear the discourse and incidentally help the Tasker Educational Fund which has done so much

Our Outgoing Road Board.

While the new Bell Island Council has had much newspaper space devoted to it, we have seen nothing about the outgoing Road Board. We desire here to speak a word in their behalf. They held a very unenviable position, and were blamed for many things for which they should not have been held responsible. They had little money to do a big work and if they failed to satisfy the public it was principally because they had no money at their backs to make the necessary improvements. And we would venture to say that if the new Council does not receive a goodly sum, for public expenditure, it will also be unable to carry out the many needed reforms.—Wabana Druggist.

B. I. S. Will Not Parade.

The adjourned annual meeting of the Benevolent Irish Society was continued yesterday morning. President Hon. J. D. Ryan, in the chair. Six new members were admitted, and the usual routine business transacted.

The matter of the celebration of St. Patrick's Day was discussed, and it was decided that in view of this day falling on the Monday of Holy Week, which prevented the usual attendance at High Mass, to hold no parade of the body this year.

His Grace the Archbishop, the Patron of the Society, has, however, kindly given permission to the Society's Dramatic Troupe to hold the usual national performance in honor of the festival, on the afternoon and evening of Monday March 17th, and accordingly the Society's recognition of the season of Ireland's Patron Saint, will this year take this form. This being the regular holiday, the Society, will, therefore, not proceed with the proposal to ask for an alteration.

McMurdo's Store News.

MONDAY, March 3, '13. Jergen's Violet Glycerine Soap can justly claim to be a triumph in Glycerine Soap making, such a remarkably fine product is the result of the process. It is a transparent soap, and is thoroughly well dried before being marketed, so that its lasting qualities are remarkable. Daintily but sufficiently perfumed it imparts the odor of natural violets for the toilet, bath and shampoo. There is no free alkali, so this soap cannot injure the skin or complexion. It sells at the very reasonable price of 15 cents a cake, or two cakes for 25 cents, and is worthy of attention from all lovers of good soap.

Tornoid Throat-Ease is an excellent lozenge for hoarseness, throat irritation and sore-throat caused by cold, smoking or the overfiring of the voice. These lozenges are delightfully soothing and cooling to inflamed membranes. Price 15 cents a box.

The World's Iron.

"When will the world run short of iron? The question is suggested," says the Daily Chronicle. "by figures given in a Parliamentary White Paper, dealing with the iron and steel trades during 1911."

"It is estimated that the total actual resources of iron existing in deposits at present that can be worked at a profit amount to 10,192 million tons. This would supply the world for considerably less than two centuries, even were the present rate of output not exceeded. Resources not yet developed are estimated at 63,186 million tons, and very large supplies of iron ore are said to exist in China, Canada, and other countries, but no definite information as to their extent is yet available. The total quantity of pig-iron produced in the world in 1911 may be estimated at about 63 million tons. The world's output of steel may be estimated at between 58 and 60 million tons."
