Buried In a Sap.

APRIL 13th, 1916.

The got submit to the trustees my second annual report:

The best thing I can say about our school is that our Roll of Honor compares very favourably with that of any other institution in the city. It is probably over the century mark by this time. Sometimes it almost appears to me as if the school register was but a stepping stone to the Roll of the Newfoundland Regiment.

The number on the school register at present is fifty-two, but some pupils included in that number have The number on the school register at present is fifty-two, but some pulpils included in that number have volunteered during the past week or volunteered during the past week or classes might be held at the same tide of life ebbs from the veins. God! To the listening men in that terrible darkness it sounded as their own The school should be open for two death knell, or the footsteps of grim reaper himself stealthily stealth was not needed for these me

their torture too soon, The school should be open of two periods of thirteen weeks each, each assigned to each electoral district per period, so as to enable the pupils from

"Let us wait patiently for our mine to explode," said one. "If it makes a big enough hole we can dig through to Advantage might also be taken of safety."

> In the awful silence of waiting they ould hear all the sounds of battle above them, for the earth is a good onductor of sound. Keenly noting the character of the various sounds the anxious men listened for the vi brations which should follow the ex-Finally it came, and they rushed for ward through a wave of hot air. ace," says one. "It reached my lips struction, so that we may be able to and I recognized the taste of blood.

> seening through the earth above, we ould not be for from the surface. "With renewed hope we set to work again but rather clumsily, for ve started a fall of earth which near-

"We were all injured. Bernard's leg being broken, Jean's head cut, and my left arm broken. Despite the pain we continued our efforts and after a while we came on a number of dead bodies of Germans which had colled to the bottom of the crate

"After an hour of digging and rawling among these corpses we got ut into the open air. Both my com ides were so exhausted that they fainted. I watched over them, being sheltered from shells and bullets by the steep side of the crater. After eight hours' waiting, ambulance attendance found us and by that time we had little life left."

DIANA PICKING UP A TRIP.—On Saturday night last a wireless was eccived by Messrs. Jas. Baird, Ltd., om Capt. Martin, of the Diana. The nessage intimated that the steamer had picked up 1,000 old seals, which, though plentiful, were hard to get, owing to bad weather. The Diana's catch is said to be now 8,000, the weight of 12,000. A few more days ke last Saturday, would soon fill her.

ARCHBISHOP'S HEALTH IM-PROVED.—The community generally and the R. C. people in particular, will rejoice to hear that the health of His Grace Archbishop Roche has improved wonderfully at New York where he now is and likely to be for some time ret. Rev. Dr. Whelan, who arrived by the Stephano Saturday from

war, these three men being entombed periods of three weeks each, each period to form a complete short course in fishery matters.

One scholarship of \$50.00 should be assigned to each electoral district periods. The enemy showed a disposition to attack and according to orthe outharbors to maintain themselves ders, the three of them, with a charge

I have only given suggestions. There might be many difficulties in the way that I know nothing of which would make such a scheme impracti-cable. The want of money should not Rushing forward they found the narrow passage full of gravel and realized the horrible truth. They were position. It is a business proposition walled up, an enemy shell having lass, the word-work Class, and two type country a high rate of interest with the money expended on it.

The great war has shown that the horizon found their worst experimental Sciences are the found. Experimental Sciences are the foundation stones on which a nation's progress rests. If we continue to neglect Technical Education it will ultimately means director to any neglect. timately mean disaster to our several ness—ah, God of mercy, what a fate!
