millions in film. They, with tartar, are the chief cause of pyorrhea. That is why that trouble is so common.

The problem solved

Dental science set out to solve that problem, and two ways were found. One acts to curdle film, one to remove it, and without any harmful scouring. Able authorities proved those meth-

ods by many careful tests. Then a newtype tooth paste was created, based on modern research. Those two great film destroyers were embodied in it. That tooth paste is called Pepsodent.

People of some 50 nations now employ it daily, largely by dental advice,
