**What
Price do
You Pay?**

The question of price enters largely into the purchase of toilet soap. Some people think that unless they pay extravagant prices they cannot get good, pure soap. This is wrong, for Ivory Soap costs only five, ten and fifteen cents a cake yet it will do for your skin all that the most expensive soaps can do. Just try Ivory Soap next time, you will not only be surprised at its high quality, but what will surprise you most will be the amount of money you can save by buying this economical, pure soap, Ivory at all stores.

Wedding Bells.

BREWER-SAINTHILL
A quiet but pretty wedding was solemnized recently at the home of the bride's brother, R. B. Sainthill, 387 Glenlake Avenue, Toronto, when Mildred Pauline, daughter of Mr. and Mrs. R. T. Sainthill, of North Sydney, N.S., became the wife of Gordon Wilson Brewer, of Chicago. Rev. Dr. Hincks officiated. The bride, who was given away in marriage by her brother, was becomingly attired in a navy traveling costume, worn with small French hat and gray squirrel neck-piece. Her corsage bouquet was Opheelia roses. After a dainty supper was served, Mr. and Mrs. Brewer left for Chicago, where they will reside.

Obituary.

JULIA ROBERTS.

The sympathy of the community will, we feel sure, be extended to the well-known planter at Wesleyville, Mr. Peter Roberts, on the death of his beloved wife, who passed away at 2:30 on Sunday at Wesleyville after an illness of ten months. Mrs. Roberts was the daughter of the late John Kean, who together with his five sons was lost at sea some years ago. She leaves to mourn a husband, five sons, EMU, studying for the Methodist Ministry at Hillview, T.B.; Roland, Caleb, Maxwell and Edward; two daughters, Mabel, wife of Bert Hann, and Alison; also one sister and two brothers. Her grandson, Gendron Hann, also died on Saturday. Mr. Roberts, who was in the city when the sad news was telegraphed, left by "Prospero" this morning for home. —W.S.M.

Steamer Sackem to Load Cargo Here

(Halifax Chronicle, Nov. 17).

The Furless liner Sackem, Captain Furbush, arrived yesterday morning from Boston and went to Pier 23, South End-Terminals, to load cargo, and will move to the North Side of Pier Three this morning, to take on additional cargo. From Boston the Sackem brought three passengers for Halifax and ten for St. John's, Nfld. Those for Halifax were Mrs. Jean Lightening, Claude Noonan and Miss Ethel Rodway. For St. John's the Sackem has Miss B. Hartley, Mrs. A. Mead and four children, Miss J. Major, Miss E. Reid, Miss K. Stamp and Sir M. Winter.

After taking on passengers and cargo here, the Sackem will sail late on Sunday or early Monday for St. John's, Nfld., and Liverpool.

**Ninety-Eight Out of
Every Hundred Women**
who have tried Lydia E. Pinkham's Vegetable Compound for ailments peculiar to their sex, have been benefited by it. What a marvelous record for any medicine to hold! Over 50,000 women replied to a questionnaire recently sent out by the Lydia E. Pinkham Medicine Co., of Cohasset, Ont. 98 per cent. of whom definitely stated that they had been benefited or restored to health by this old-fashioned root and herb medicine. This is a most wonderful record for efficiency, and should induce every woman who suffers from any ailment peculiar to her sex to give it a fair trial.

Suggests Reducing Period of Training for Nurses

CALGARY.—(Canadian Press)—"Some Phases of the Rockefeller Report on Nursing," was the title of a paper read by Miss E. Johns, R.N., of Vancouver, before the annual convention of the Alberta Association of Registered Nurses.

The Rockefeller Report, according to Miss Johns, recommends that the time of training be cut from three years to twenty-eight months when the candidate has already obtained a matriculation standing in the high schools.

Miss Johns pointed out that viewing the situation from the nurse's point and from the standpoint of education to the nurse there was a great deal of routine work that could be done away with in order that this reduction in time might be made.

Another phase of the report deals with the suggestion that a subsidiary nursing group be formed. It was pointed out that those making the report had found by investigation that 25 per cent. of the time of the graduate nurse was spent in needless attention to the patient and that the duties performed at that time could be performed by a person who did not hold all the graduate qualifications and consequently would not cost the patients so much.

Instrument That Measures Growth

A remarkable discovery has been made by a famous Indian biologist recently through the use of an ingenious instrument he has invented, which shows the rate of a plant's growth by drawing an ink-line on a piece of paper wrapped round a revolving drum.

When the plant jogs along its life in the ordinary way the instrument draws a more or less straight line, showing an uneventful, uninterrupted life story; the growth changes from day to night, because, as we know, sunlight is trapped by the plant cells, and made to help in their assimilation of food taken in from the moist air.

By being able to watch the rate of oxygen production of the plants which takes place at the same rate as the absorption of the carbon dioxide and water vapor from the air, the Professor has found that very tiny traces of impurities in the air affect the plant enormously, changing its power of "light-digestion" two or three times. Nitric acid present in the air to the extent of only one part in 2,000 millions actually doubles the rate at which the plant can take in food from the air.

Only recently we read how another professor has succeeded in copying in the laboratory the process carried on by plants of turning water and carbon dioxide into food through the agency of direct sunshine.

The first product formed in this wonderful process is what is called formaldehyde; and it has been discovered that one part of this in a thousand millions nearly doubles the plant's production of oxygen.

The new instrument will map out the life story of the plant's growth like the recording instruments which set out the consumption of gas or the changes of the barometer; but it deals with quantities almost infinitely little.

It shows very effectively once more that our study of the great things of Nature depends on the measurement of quantities and forces which a hundred years ago would have been far too small for man to discover.

German Crowds Courteous

TO FORMER CROWN PRINCESS.

Berlin, Nov. 18.—Former Crown Princess Cecilia and her four sons were among the visitors to the recent Berlin automobile show.

The first members of the former imperial family came to the show as the guests of the makers of a well-known motor car and returned home in one of the model cars of this firm. The former crown princess is always recognized by Berlin crowds, which pay her great courtesy. Even the most rabid of the anti-monarchists seem to have great admiration for the dignified wife of the exile at Wieringen. She lives in a small villa at Potsdam, with her five children, and moves about as unostentatiously with her children as any other well-bred German woman. Occasionally she appears at the opera or the theatre, and it is not unusual to see her shopping in Berlin.

Washing the children in IVORY Soap is many a mother's most pleasant duty, for the little ones love to wash in this pure, soothing soap. Ivory is the ideal soap for children.

What Novelists Earn

Contrary to popular belief, novelists as a class are both hard-working and poor. Not one published novel in every ten earns its author \$50.

As a matter of fact, only a writer of peculiar and special gifts can make a good living from his pen. Mere "cleverness" counts for little. The ability to tell a story is rare, but it is only the tellers of stories that command a large public.

What does a "best-seller" make? Like all sensible authors, he contracts with his publisher on a royalty basis. On every copy of his novels sold he gets 25 per cent. of the published price. On a 7s. 6d. book he receives 1s. 10½d. If he sells 30,000 copies he nets just under £3,000.

But this is only a part of his earnings. There are, in addition, the American sales, the serial rights, film and dramatic rights, and cheap popular editions.

It will go hard with a best-seller if he does not clear £5,000 from a single novel. If he is industrious and productive he will write two a year, but there are very few novelists who make £10,000 a year. Nevertheless there are from 30 to 40 who make considerably more than £1,000. Many of the remainder earn scarcely a living. George Gissing, now regarded as a classic, was glad for many years to receive £50 for each of his long novels.

Still, in the vast majority of cases genius and even talent quickly get their reward. A writer of stories must be either very great or very small who cannot earn £700 or £800 a year.

With a salad made from green vegetables serve cream cheese dressing.

"I Know Better Now"

LIKE other women, you may have been amazed at the persistence of so many women for Kirkman's Soap. Probably you believed that this was just a "notion" that Kirkman's did better work, that it was harmless to the hands.

When you realize the facts, you, too, will say: "I know better now!"

Thinking women now realize that the selection of a PURE soap for all household purposes is quite an important matter.

For the sake of their delicate hands, they wish to be certain that their soap is free from anything injurious.

Because only the finest materials are used to make it, Kirkman's Soap is not only the most efficient and economical soap for every household and laundry purpose, but it is as *absolutely harmless* as the most exquisite toilet soap.

IN fact, members of the Kirkman organization often use it for bathing purposes, because they know how it is made.

Kirkman's Soap is boiled nine times, so as to insure perfect blending of all ingredients. It is absolutely sterile, free from germs of any kind, and always a "safe" soap.

It is free from lye that roughens and coarsens the delicate skin of your hands. And its economy makes it less expensive to use than ordinary soap.

Therefore, for the safety of your hands, insist on Kirkman's as thousands of other women are now doing.

Without Question or Argument

Kirkman's Soap is sold to you with the distinct understanding that it satisfies YOU to every way. Your grocer will return your money without question or argument, if you are not pleased with results. You alone are the judge.
