Are We to Lose the Park? tor World: In The World of June 28 a short but stirring appeal was made on behalf of what is happily called the "instural park" north of the university. In the same paper of July 1, an account is given of an interview with Mayor Clarke in which the statement is made that Dr. Hoskin informed the Mayor that \$25,000 per annum would be the stuntal asked by the university authorities, and that being too high there was no course but to drop negotiations. Sooner or later Mayor Clarke or his successor will learn that the citizens will not be satisfied with such an excure for neglect of duty. When a reasonable offer has been made on behalf of the city and has been declined it will be time enough to say that negotiations should be dropped. So far it seems plain that there has been no negotiating. CITIZEN.

In the matter of the new Drill-shed site there is every reason to believe that it is at last approaching completion. Unavoidable delay has occurred on account of legal technicalities placed in the way by some of the owners of the various parcels of land expropriated. All these, however, have been now overcome. Mr. J. A. Macdonnell, Q.C., agent of the Minister of Justice, acting under instructions from the Government, which was desirous of having the matter closed at the earliest possible moment, over a year ago investigated the titles of the various parcels of landsome 33 in number—and some time since delivered to Mr. Macdonnell, who is now engaged perusing them, and it is hoped that he and the City. The answers of these requisitions have been delivered to Mr. Macdonnell, who is now engaged perusing them, and it is hoped that he and the City Solicitor may be able to close up the matter within the course of the next few days, when the land will be formally handed over by the city to the Government.

Cholera morbus, cramps and kindred compaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarred from eating these tempting fruits, but they need not abstain if they have Dr. J. D. Keilogg's Dysentery Cordia, and take a few drops in water. It cures the cramps and cholera in generalable manner, and is sure to check every disturbance of the bowels.

BREAKFAST

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Locca, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy dioctors' bills. It is by the judicions use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."
