

SALMON, KENNEDY & CO

TORONTO,

THE GREAT FANCY DRY GOODS HOUSE OF CANADA

AND DEALERS IN DOMESTIC MANUFACTURES.

Our Stock is Complete in Every Department!

AND IS LARGER AND MORE EXTENSIVE THAN ON ANY PREVIOUS SEASON.

We will be pleased to see all our friends who visit Toronto during the Exhibition. Merchants who have not done business with us will find it to their benefit to see what we are doing.

WE MAKE THINGS INTERESTING FOR EVERY BUYER

THE PUNISHMENT OF ARSON.

Urgent Measures Advocated by a Student of Social Questions.

Mr. Goldwin Smith writes as follows regarding capital punishment:

By this morning's papers we learn that eight men have been arrested at Montreal on a charge of arson. Similar news comes to us from Buffalo. The other day in New York City a gang of firebugs were detected just as it was on the point of setting fire to a house in which there were a number of lodgers, and the leader of the gang, whose name indicated his nationality, received a sentence of imprisonment, practically for life. There appears reason to believe that our own city has suffered, and might, but for a fortunate accident of the weather, have suffered to a fearful extent from the same detestable practice.

There are some who object altogether to capital punishment, and no feature of democracy is more undeniably good than the comparative humanity of its criminal code. But arson of a dwelling house, or arson under any circumstances, manifestly involving risk to life, ought surely to be treated as a first-class crime. It is worse than murder committed in the heat of passion or from any other than a mercenary motive. It is morally worse, and it is more dangerous to the community, since the destruction of life as well as of property which it entails, either directly or indirectly, is indefinite. In the case of our Toronto fires there was at least one half-brotherly escape, and two firemen actually lost their lives.

The Conduit Break.

Editor World: Much has been said with reference to the enquiries as to the cause of the conduit breaking, yet our engineers have said nothing on the important question of expansion and contraction or what provision has been made for same, assuming the temperature is only 55 per cent. higher in the day. Now, then, it was in January when the pipe was last repaired; the steel pipe would expand 2 feet 2 1/2 inches in every mile or 1-2 inch every 100 feet. For more than a mile in Blockhouse Bay the difference in temperature is more than that, owing to the pipe being so near the surface, and not being protected from the sun (as it should have been, according to the specifications in the first place). In my opinion expansion was the cause of the trouble in this case. It could not go down or move sideways in Blockhouse Bay, owing to the sand on either side, and the heat from the sun would make the top side expand more than the bottom and raise it upwards. It is absurd to suppose a pipe 3 1/2 by 15 would be strong enough to create a vacuum, the force required to raise the weight of that pipe would be enormous. I think if the pipe was thoroughly inspected, beginning at the waterworks, another leak would be found that has been there a long time. If, as is alleged, weeds were found growing in the pipe near Blockhouse Bay, if the supply, or a large portion of it had come from beyond the latter place, the flow would have been too strong for weeds to grow, and the plank would have broken like match-wood.

WILLIAM ARCHER.

Children like using Odorama, thus forming habits that will ensure good sound teeth the rest of their lives.

The Case of Rex Hooper.

The World met Mr. Joseph Hooper of Port Hope yesterday. He is a very respectable and energetic man, and father of the unfortunate Rex Hooper, now undergoing an imprisonment of 25 years in the Province of Quebec for attempting to drown his wife. The old gentleman is highly respected in Port Hope, and the Mayor and council of that town and all the leading citizens have joined in a petition to the Minister of Justice, praying for a reconsideration of the case.

To remove bad breath from catarrh, bad teeth, etc., use Odorama.

GOLD BELOW THE RESERVE MARK.

The Belmont syndicate Expected to Come to the Rescue Today.

Washington, Sept. 9.—The Treasury gold reserve at the close of business stood at \$97,710,000. The decline was caused by \$1,200,000 in gold being withdrawn in New York for export. In ordinary business the treasury gained \$400,000 in the exchange of notes for gold at the various sub-treasuries. At the Treasury it is understood that the syndicate will make a deposit to-morrow, which will again make the gold reserve intact. Since July 12, the beginning of the gold export movement, about \$2,700,000 in gold has been sent from this country to Europe. It is stated that within that time the Belmont-Morgan syndicate has paid into the Treasury, in excess of bond requirements, about \$11,000,000 in gold.

ROTHSCHILD BOMB THROWER.

The Miscreant a Professed Anarchist of Honorable Family.

Paris, Sept. 9.—The Figaro says that a man named Dailion was found wounded in the street on the day that the attempt was made to explode a bomb in Rothschild's bank, and is now dying. Dailion explains his wounds by saying that he kicked a package he found lying on the pavement in the Rue Rochefort, when it exploded with great force. The Figaro suggests that the package mentioned by Dailion has some connection with the Rothschild bomb.

The Liberte says that the identity of the miscreant who attempted to explode the bomb has been discovered. He was formerly in the employ of the Northern Railway Company and belongs to an honorable family. He is a professed anarchist, according to the Liberte, but was actuated by motives of personal revenge for his dismissal from the Northern Railway Company's employ in his attempt to destroy the Rothschild's bank.

A Village in Toronto's Centre.

"A village of busy people under one roof," aptly describes the mammoth emporium of the T. Eaton Co. On the five acres of selling space are 1300 employees in the 33 merchandise departments, together with 250 more at work in the manufacturing department, making this firm the largest employers of labor in the city. There are 40 miles of steam piping, three boilers of 600 h.p., and three engines, consuming 1000 tons of coal a year. To light this village, 2250 incandescent and 200 arc lamps are necessary; 3000 overhead sprinklers afford efficient fire protection, and 4 1/2 miles of tubing convey the cash from 109 pay stations to the treasurer's office. The organization is as complete as it is possible to make it. Nothing for the convenience of the purchasing public has been left undone, and with so many stores under one roof, each with its wide range of goods at "drygoods prices," it is little wonder that this "busy village" is a constant magnet for the thrifty householder, not only of Toronto, but of the entire Dominion, for the mail order system enables a Manhattan at home to shop here as well as if he came in person.

Very many persons die annually from cholera and kindred summer complaints who might have been saved if proper remedies had been used. If attacked do not delay in getting a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that acts as a fails to cure. Those who have used it say it acts promptly and thoroughly, subdues the pain and disease.

Female Fool Fined \$5.

New York, Sept. 9.—Mrs. Clara McArthur, the first woman to jump from the Brooklyn bridge, was fined \$5 by Magistrate Crane in the Tombs Police Court. She paid the fine.

Sir Henry Irving Enjoying Himself.

New York, Sept. 9.—Sir Henry Irving, Miss Ellen Terry and her daughter, Miss Ailsa Craig, left this morning for the Adriatic, to remain until next Sunday, when they will meet their company at Montreal.

WHEELER & WILSON JOHN MULDREW & CO.,

NO. 9 AND NO. 12

Sewing Machines.

THE PRACTICAL RESULTS OF OVER 50 YEARS' EXPERIENCE

Why buy an inferior machine when you can get the light-running, high arm and noiseless No. 9 Wheeler & Wilson family machine for the same money? See the No. 12 Machine for leather and all heavier grades of manufacturing.

The following are a few of the well-known manufacturers who use Wheeler & Wilson Machines:

Gale Mfg. Co., shirts and underclothing.

Allen Mfg. Co., shirts and underclothing.

H. J. Caulfield & Co., shirts and underclothing.

Minerva Mfg. Co., shirts and underclothing.

The T. Eaton Co., Ltd., white work, clothing, etc.

The Williams Greene & Rome Co., collars and cuffs.

Mrs. J. Philip, late Page & Page, underwear.

Miss Franklin, shirts and ladies' underwear.

A. Bradshaw & Son, clothing.

J. M. Treble, shirts, etc.

W. A. Murray & Co., dressmaking and mantles.

Teller Mfg. Co., corsets.

W. E. Sanford Mfg. Co., clothing.

Beardmore & Co., boots and shoes.

J. D. King & Co., boots and shoes.

W. B. Hamilton, boots and shoes.

Dack & Son, boots and shoes.

John McPherson & Co., boots and shoes.

Beal Bros., boots and shoes and gloves.

Simpson Knitting Mills.

Eagle Knitting Co.

Garland Manufacturing Company, clothing.

Lalley, Watson & Co., clothing.

Manufacturers and others interested in sewing machinery are invited to call at our showrooms and see our power plant.

WHEELER & WILSON MFG. CO., 240

GEO. BARRETT, GENERAL AGENT.

THE DUCHESS OF OXFORD RANGES

MADE IN TORONTO.

The most attractive and satisfactory range ever placed on the market.

OUR PATENT DUPLEX FLUE

Ensures an Oven that works uniformly in all parts and is perfectly ventilated.

THE FIRE LININGS

protected by the draft from the Duplex Flue, last double the usual time.

Only those Stoves that have the word TORONTO on them are made in this city. Manufactured by

The Gurney Foundry Co.'y Ltd.

22 FRONT-STREET WEST, TORONTO.

THE NEW WOOLEN FIRM.

Wholesale Woolen Merchants.

LADIES,

We invite the Ladies visiting the Exhibition to examine carefully the

Dress Goods, Nester Cloths, Golf Cloakings and Costume Cloths

which we are showing there on the Second Floor of the Main Building, at the west end. They are all made in Canada, and are justly growing more in favor every season, as they are the most economical fabrics for Ladies' wear made in the world.

GENTLEMEN,

We particularly invite any Gentlemen having any doubt of our ability to manufacture Tweeds in Canada equal to any produced in any country in the world to examine in the most severely critical way possible our exhibit of high-class Tweeds in the Main Building at west end of second floor at the Exhibition. They are all made in Canada specially for us, and we think are creditable to both our taste and the manufacturer's ability.

Our great Specialties are DOMESTIC WOOLENS

In Both Ladies' and Gentlemen's Goods.

A Few Extra Nobby Things in GENTLEMEN'S SUITINGS just Opened. Samples sent on application.

JOHN MULDREW & CO.

22 FRONT-STREET WEST, TORONTO.

THE NEW WOOLEN FIRM.
