## Queenston Cement

For Building Stable, Silo, and other walls; Cisterns, Stable Floors; Hog Troughs; Road Culverts, and other structures

Basement barn of  
Mr. E. B. Brown,  
Brownsville.  
The basement and  
all inside floors are  
built of

QUEENSTON  
CEMENT  
CONCRETE

Read Mr. Brown's  
testimonial;

ISAAC USHER & SONS,

Brownsville, June 2d, 1898.  
GLENLEIGH.—In answer to your enquiry in reference to your Cement, I am glad to say it has proved in every way satisfactory. As you know, my barns were struck by lightning on May 1st, 1894, and entirely destroyed. I also built a new barn, 20x40 ft., using your Queenston Cement for concrete walls. The foundations were 2 ft. deep, and 1 ft. 3 in. in width; then I built on that the walls 7 ft. high (the walls were 16 inches thick), set on the centre of foundation, finishing 2 in. thick on top to receive sills 2 in. square (the joints were laid on the top of sills), making walls for my stables 7 ft. 10 in. in the clear. The outside face of walls were rough; the inside face of walls were battering 4 in. We used in the foundation and well 50 barrels of your cement. I superintended the construction of the walls personally. I had in my employ four men. We were ten days in building the 9 ft. of wall. We commenced to build on the 1st of June, and finished walls on the 10th. We raised the barn on the 6th of July; a very heavy frame of hardwood timber; posts 10 in. long (tipped roof). On the 9th of July we commenced building in bay, and then grain, as fast as we could harvest it, until I had at least 100 tons in the barn. The walls stood this great pressure; there is not the least crack anywhere. I believe I have a good and perfect wall as it is possible to build, and I am sure it will stand for generations. In October I put in my floor all over the barn, all for cattle manure droppings, stable, etc. In this I used 55 barrels of your Cement, and as a decorative test I used one barrel of Portland Cement. The floors have been in daily use over a year, and I have not been able to see any difference between the Queenston Cement and the Portland Cement. I consider I have a perfect floor, that will last more than a lifetime, and at a much less cost than plain. No horse manure is hot, and stable can be kept clean and sweet with less than half the labor with plain floors.

We have this year built another barn of the following dimensions: 30x50, 12 ft. walls from bottom of foundation, and 12 ft. high walls to higher block at ground line and to ridge under the eaves, which I consider strong enough for any ordinary barn. We used in this structure 55 barrels of your Queenston Cement; and I am satisfied that when your instructions are carried out you will have perfect work every time.

Any further information you desire or your customers may desire I will write cheerfully at any time.

Very truly yours,

E. B. BROWN.

Farmers and others who contemplate building next season, make your plans early, get your supply of gravel and field stones on the ground during the winter, thus saving both time and money, and making your next season's outlay very small indeed.

Send for our Pamphlet containing full instructions, free.  
For price of cement and other particulars, address

## PROVAN'S PATENT Reversible Cars, Fork and Slings...

Have now become a Standard of Excellence with the Farmers of Canada and the United States. At the World's Fair, Chicago, 1893, a Medal and Diploma given to Mr. James W. Provan, Carrier, Fork and Slings, was awarded to, on these implements. Following is a copy of the Judge's award:

AWARD: "Our open trip lock protects the crop; its automatic action, adjustable to ease of road journey; its novel design of trip block, allows perfect control of carriage; no wrench required for locking or letting go, makes it fit all directions; can pull 1000 lbs. weight and turn 1000 lbs. in any position; full protection of load; and a double action; the reversible, the carrier, and the slings; a standard of material and construction."

Manufactured by JAMES W. PROVAN, Oshawa, Ont., Can.  
Correspondence solicited.

There Is No Doubt About the MERIT of DEMORING  
It cuts brush, weeds, trees and shrubs. One trip through the field will do the work of a dozen men.
