

to presume that such a product is worthy of a trial in conditions where it is clinically indicated.

No greater an authority upon gynaecological diseases than Sims could be quoted, and from the fact that he prescribed and recommended the use of Hayden's Viburnum Compound in certain gynaecological and obstetrical conditions, is weighty evidence of its therapeutic efficiency and reputation which it enjoyed with the older members in the profession.

That it has continued to serve as a satisfactory remedy since the time of Sims, in the treatment of dysmenorrhea, menorrhagia, metrorrhagia, threatened abortion, rigid os, etc., its increasing popularity with the profession indicates which should warrant it worthy of a trial in these diseases, when they are presented to you.

To those physicians not familiar with the genuine H. V. C., as originated by Dr. Wm. R. Hayden, a sample with formula and literature will be forwarded upon request to the New York Pharmaceutical Co., Bedford Springs, Bedford, Mass.

PREPARE FOR SCHOOL DAYS.

And now the little army of young humanity, after the long vacation, trips back to school to commence the long period of mental and bodily stress and strain inseparable from indoor confinement and long hours of work and study. Is it not the part of wisdom to see that they are well prepared for what, to many of them, is really a serious ordeal?

If the boy or girl (especially the girl at the age of puberty) is anæmic, easily tired, pale and listless, it is certainly a good plan to correct this condition at once, rather than to wait until the condition is more serious. If the young pupil is fortified by the toming and building up of blood and tissue, the prevalent school infections, measles, scarlet fever, and diphtheria, are much more likely to pass them by. Pepto-Mangan (Gude) is especially indicated as a blood tonic and general reconstituent for children, as it is palatable, easily taken, free from disturbing effect upon the digestion, and devoid of constipating action. It can be taken for any length of time without danger of injury to the stomach, and its effect is soon noticeable in increased appetite, improved color, better spirits and increased weight.

READ THIS, DOCTOR.

Hundreds of physicians fell by the wayside in the wide-spread grippé epidemic last spring, and many are due to suffer this coming season. Why?
