

A CEREAL FOOD
different from all others

because it contains the natural
 digestives—Trypsin and Amylopsin.

It is used regularly in Hospitals, Sanatoria, Nursing Institutions,
 etc., throughout the world, and prescribed and recommended by
 leading physicians in practice and in many standard medical works.

The outstanding feature of Benger's Food is its power of self-digestion, and
 milk modification, due to the two digestive principles contained in it. This occurs
 during its preparation with fresh new milk and is simply regulated by allowing
 the Food to stand from 5 to 45 minutes; it is stopped by boiling.

Benger's Food

FOR INFANTS, INVALIDS AND THE AGED.

*A physician's sample with analysis and report will be sent post
 free, upon application to any member of the Medical Profession*
