Company Summary

Ayerst, McKenna & Harrison, Inc., founded in 1925, set up the first commercially-operated biological laboratory in Canada, which produced the first biologically tested and standardized concentrated cod liver oil. In 1943, the company was acquired by American Home Products Corporation of New York, N.Y., U.S.A. Today, Ayerst, McKenna & Harrison is the world's largest supplier of natural conjugated estrogens, and one of the largest antibiotic manufacturers in Canada. The company's fully-integrated manufacturing plant comprises 50,850 square metres (565,000 square feet) and employs 700 people; sales and distribution centres are located across Canada.

Soft gelatin capsules

Current Export Markets

Europe, Asia, Australia

Company Summary

Banner Gelatin Products (Canada) Ltd. is one of the world's leading producers of soft gels. Established in 1981, the company's modern manufacturing plant includes in-house engineering, research and development, laboratory, distribution and marketing facilities. Totally isolated in-line manufacturing and inspection areas exceed all Canadian guidelines for the manufacture of pharmaceuticals. The company's regulatory affairs department can advise on packaging and private labelling requirements. Banner Gelatin also assists in the formulation of special encapsulated products to meet specific technical, scientific or marketing needs.

Banner manufactures softgels in a wide variety of colours, sizes and shapes including rounds, ovals, oblongs, tubes and suppositories.
