

come in the near future, there need be  
no delay in starting.

I realize, of course, that my appointment  
is primarily a research one but I believe  
that a little teaching is very desirable for a  
research worker: and moreover it helps to  
stimulate interest in the subject among younger  
people and to secure a future supply of  
research workers.

Yours sincerely

Thomas W. M. Cameron.

To Dean Warner
