

THE NEW CANADIAN NORTHERN TUNNEL AT MONTREAL

The above map shows the entrance of the Canadian Northern into Montreal by means of a tunnel under Mount Royal, and which was referred to in a despatch to The World some weeks ago in connection with the way the company financed it. The map shows over six miles of the distance, a little over three of which is made up of tunnel.

The station is at the right and near the end of the tunnel and in the heart of Montreal, in the neighborhood of DeLoach Street. A mile to the right of the station the line is on the level of the city leading down to the harbor and along the line is what is called "back of the mountain," and it is here where the company made their big purchase of land—about 5,000 acres—which they are now about to sell in order to finance their tunnel and station scheme. This land was supposed to be beyond present-day requirements because of having to go round the mountain, but with the three mile tunnel and one mile on the level a double-track suburban service will be given from the portion minutes in time and never interfered with in any way by the snow or the weather. As a consequence fine residences for the rich, as well as cheap houses for the workmen, will rapidly be erected behind the mountain because of the actual access to the centre of the city at the new station above Dorchester Street. In fact, the Canadian Northern will have the best entrance into Montreal and easily the fastest because of its location underground.

But the railway merits of the tunnel are its greatest. They give a central station, central freight sheds and sidings, and immediate and extensive access to the Harbor Commission's tracks and docks.

FOSTER AGAIN WANTS A NEW ENGINEER

Proposed Reorganization of Works Department Discussed at Great Length, But No Action Taken—Dr. Hastings Opposed to Civic Model Dwellings.

After another lengthy discussion of the proposed reorganization of the works department the board of control yesterday came to no decision as to what should be done and the matter was laid over until to-day. The controllers agreed that a competent executive head should be placed over both branches of the works department, and the name of Property Commissioner Harris was suggested as a suitable man.

This idea, however, was opposed by Controller Foster, who wanted the new head to be an engineer. Controller McCarthy thought that Mr. Harris was too valuable in the property department. The matter was finally left over for to-day's meeting.

The board of control had a private conference with Captain Midford yesterday morning, when the sum of \$1000 was offered him for his services in connection with the intake pipe. The captain was engaged over a period of 66 days, and hence this sum represents nearly \$30 a day. He will notify the board to-morrow whether or not he will accept this amount.

Radial Terminus.
A letter was read to the board from Andrew T. Dunstan, who has proposed the terminus of the Sunnyside-Humber-radial be moved to Bathurst-street, and the line run along the lake-front.

In answer to this query a letter was read from the corporation council to the effect that in view of the contract with the Toronto Street Railway it was doubtful if the tracks could be extended to Bathurst-street.

Improvement Committee.
The civic improvement committee met yesterday afternoon and elected the following officers for the ensuing year: President, Sir William Meredith; vice-president, K. J. Dunstan; honorary secretary, E. C. Dilworth.

The widening and extension of Teraulay-street was the only subject which the committee discussed at their meeting. They were not at all in sympathy with the recommendations of the works committee, which provided for a width of 66 feet and two jogs in the street. A motion was passed asking that the council refer the matter back to the works committee for further consideration.

The committee thought that in view of the fact that Teraulay-street would become a business thoroughfare it should be widened to 87 feet. It was argued that it would be advisable to make the improvements now before the land had risen in value. Some of the members thought that the works committee had not given the matter serious consideration, and they believed that the council should refer the matter back until more data could be secured.

Oppose High Buildings.
At the meeting of the fire and light commission yesterday afternoon a communication was read from the Civic Guild, advocating that no buildings should be allowed to be built at a greater height than one and a half times the width of the street upon which they fronted. The letter said that Toronto was not a congested city, and that very high structures interfered with the light and air, besides being dangerous in the event of fire. The matter was referred to the city architect.

Another letter was read from J. H. McKnight of the McKnight Construction Co., suggesting that 87 feet be the height of buildings. The letter said that the committee should take no action regarding the 112 feet which they charged for the initial inspection.

Playground Association.
The Playground Association met yesterday afternoon and appointed a committee to nominate the officers and arrange for their annual meeting, composed by J. J. Kelly, C. J. Atkinson, Frank G. Beer and Miss Curlette. It was announced that \$3000 had been spent by the committee this year, which

left a deficit of \$11. Their annual meeting will be held on Feb. 29. More Marriages.

The figures of the city clerk indicate that the young women of Toronto are taking advantage of leap year, since there were 81 more marriages in January, 1912, than in the same month, 1911. The figures show that there were 457 marriages last month as compared with 356 for January last year.

The number of births has also increased. January, 1912, there were 874, while the same month last year the figures show 825. There were 691 deaths in January, 1912, as compared with 528 in January, 1911.

The report of the parks department for December, 1911, showed that there were 704 trees sprayed and cleaned, 295 trees pruned and 132 trees removed during that month.

To look over the situations regarding the proposed extension of the street to extend Hastings-street and to remove the obstructions on John-street the works committee left the city hall in a body at 2:30 yesterday afternoon. The committee took no action in regard to any of these matters.

Overcrowding.
Dr. Hastings, M.H.O., is not in favor of the city erecting model dwellings as a means of alleviating the overcrowding in certain sections of the city. The doctor was of the opinion that improved transportation facilities is the only feasible way to solve this problem.

Examine the Reservoir.
In order that the engineers appointed by Judge Winchester in connection with the filtration enquiry may make an examination of the clear water reservoir in an empty state the filtration works and the John-street pumps will be closed down on Saturday night. The city will receive its supply of water on that night from the reservoir on Summit-street, where there is a depth at the present time of 15 feet.

Caused by Currents.
City Engineer Rust stated yesterday that the scouring on the intake pipe may have been caused by the currents resulting from the opening of the new cut at western gap. This scouring, he said, was not in evidence before the new gap was cut thru, and he was of the opinion that this was responsible for some of the changes in the current.

First Census Volume.
The first volume of the census of Canada for 1911 will appear shortly, according to a communication received by the city health department from A. Blue, census commissioner at Ottawa. This volume will contain a comparison of the population of the electoral districts as well as comparison of the rural and urban populations of the Dominion. Statistics regarding migration, religions and nationality will also be included.

QUEEN'S THEOLOGICAL COLLEGE

Old Arts Building Will Be Used—Two Hundred Thousand Dollars Voted.

KINGSTON, Jan. 31.—(Special.)—Representatives of the university trustees and commissioners of the General Assembly at Queen's decided that the old arts building is to become the property of the theological faculty. They met to consider a bill respecting constitutional changes whereby the university is to become a national and the theological faculty is to be known as Queen College.

Commissioners present were Hamilton Cassels, Rev. J. D. Edmonson, John Lawden and Rev. Alex. McGillivray (Toronto), D. H. McLean, K.C. (Cornwall), Rev. Dr. Louis (Quebec), James Wallace (Lindsay), G. M. Macdonnell (Kingston) and W. P. Nickle, M.P., who is representing the bill in parliament.

The proposal was that the university would undertake the facility of theology by erecting a new building for it within five years. The assembly commissioners, however, held out for the possession of the old arts building, and finally succeeded in being granted this edifice, which will henceforth be known as Queen's College.

Several matters in connection with the bills were arranged satisfactorily to both parties. The faculty of theology will receive \$200,000 in shares of the university endowment fund and bills will now be reprinted and parliament will be asked to sanction them.

Remote Caused Suicide.
Retreat and remorse thru having lost his position with the Massey-Harris Co. by his drinking habits, led George Guilfoyle, a machinist, to take his life with the aid of gas. His landlady, Mrs. Hannan, at 831 West King-street, yesterday morning found his body on a bed, half clothed. The gas jet was turned on full. The coroner deemed an inquest unnecessary.

HOT CAMPAIGN IN MONTREAL

Discredited and Semi-Discredited ex-Aldermen in Battle—Many Libel Suits.

MONTREAL, Jan. 31.—(Can. Press.)—Polling to-morrow will bring to a close one of the warmest municipal election campaigns that Montreal has ever experienced.

Altho to-morrow's elections only decide the membership of the city council, and the occupant of the chief magistrature's chair, the members of the board of control having two more years in office, the latter have become involved in the struggle thru the candidature for seats in the council of members of a reactionary group, opposed to the power of the controllers and eager to see it weakened.

The reactionaries consist for the most part of ex-aldermen, either directly discredited by revelations made by the royal commission investigating municipal finances and administration in 1909, or open to attack thru having been members of a clique of 23 aldermen in the 1909 council who consistently voted the city's money to high tenderers for public works to the great profit of certain middlemen. These aldermen were unable to hold their seats in the elections of 1910, but have since been campaigning in preparation for the present election.

The Blacklist.
The Citizens' Association has drawn up a blacklist and is calling upon the voters to cast their votes against the following: Giroux, Gallery, Levesque, Seguin, Martin, Marin, Lariviere, Lamoureux, Saubagau, Judge.

The mayoralty fight is thought to be a close one, Aid. Marcel and Aid. LaVallee both having campaigned hard, and both having clean civic records. Libel suits aggregating nearly \$200,000 have up to the present time, been filed in connection with the campaign. The first action is that of ex-Aid. Giroux for \$10,000 against an afternoon paper for alleged defamatory libel. Two actions of \$50,000 each have been taken by Alf. George Marcel against

A Cat That Puzzles Men.
A black and grey Persian cat has just performed a feat a wisest man is unable to explain. It was sent from its birthplace, Glastonbury, to Kingston-on-Thames over 133 miles. The cat's hate to change their homes, and this was no exception. But how could the matter with it? It had been sent from Glastonbury to Kingston in a packing-case, which had holes in it large enough to let the cat breathe, but how did it get away? The cat disappeared from its new quarters in finding its way back to Somersetshire. It was lost soon after its arrival in April; in September it returned to its birthplace at Glastonbury, starving, but delighted to be home once more.

Told in a Pharmacy.
Clerks in a Broad-st. pharmacy were digging up anecdotes of stupid customers. One man came in one day with a prescription for a medicine to rub on bruises. I put it up according to directions, but the patient might have saved the doctor's fee, as ordinary arnica would have done just as well. The customer looked at the label and said, "I have an impatience: 'Here, young man; you haven't labeled this right.' Why, what's the matter with it?" I asked, "well, said he, 'it doesn't tell whether the stuff is to be used before or after meals.'"

Dead Men
The man lacking in the vital power nature gave him, debarred by weakness from functional enjoyment of his most important functions, merely a burlesque upon strong, robust, virile manhood, is, in a sense:

A Dead Man
Life has lost its zest, the gold of enjoyment is absent, it is not worth the price of the pain it cost to live. Every weak man knows this is true. Thousands of men in all walks of life restored to full manhood. Do not delay, but consult me to-day.

CHURCH UNION VOTE IS TAKEN

Balloting Shows That Sentiment is Largely in Favor of the Amalgamation.

At this week's meetings the Presbyterians are balloting on the general question of church union, and the additional question of the acceptance of the basis of union submitted by the inter-denominational committee.

It is estimated that 19 Toronto congregations will vote in favor of union, nine against, while eight are regarded as doubtful. From out of town points the votes in favor of church union are: St. Andrew's Church, London, 200 for, 38 against; Halville, in the Presbytery of Brockville, 121 for, 12 against; Knox Church, Saskatoon, 239 for, 9 against; Harvey Church, in the Presbytery of St. John, N.B., 200 for, 1 against; Moncton Presbytery, New Brunswick, 198 for, 17 against; North River Presbyterian Church, Nova Scotia, 183 for, 9 against; Harford Presbyterian Church, Nova Scotia, 33 for, 4 against.

Up to date the only places heard from voting against are Bayfield, Woodstock, N.Y.; Knox Church, St. Catharines. The church at St. Catharines is to take another vote, the one taken being unsatisfactory. The Methodists will take their vote during the next 12 weeks.

LAUGHS WITH JOY! NO MORE INDIGESTION

Montreal Man So Ill, Thought He Would Die of Stomach Disorders.

Just read what Mr. Larose says of the curative powers of Dr. Hamilton's Pills:

"I suffered from dyspepsia and indigestion for several years, and much that I could hardly attend to my work. I was weak and lost all courage to follow my treatment. To my great surprise I immediately began to feel better. I am now using the second box of Dr. Hamilton's Pills and I feel so well that I want to tell you that I owe this great change to your famous Pills. I recommend Dr. Hamilton's Pills to every person who is suffering from dyspepsia. Your grateful servant, R. Larose, 338 Joliette-street, Montreal, P.Q."

Economics.
Knicker—Doesn't you understand the purchasing power of a dollar?
Bocker—Yes; what troubles him is the purchasing power of his wife.—New York Sun.

The trouble with the dead beat is he never does understand the purchasing power of a dollar.

Never tell a man just what you think of him unless you are bigger than he is.

TO BUILD RAILWAY TO POPocatepetl's Summit.

From the City of Mexico to the top of Popocatepetl in two hours. From balmy air to a temperature of 20 degrees below zero in 120 minutes. It sounds like a dream, says The Mexican Herald, but Dr. F. S. Pearson is now planning a railway to the snow-crowned crest 17,500 feet above sea level, which will make the dream come true. Not only that, but a trolley line from the capital to Puebla will be constructed which will be able to carry passengers over in two hours and a half.

Dr. Pearson says that the final survey on the Mexico-Puebla and Mexico-Hidalgo routes has been completed. He is estimated that 19 Toronto congregations will vote in favor of union, nine against, while eight are regarded as doubtful. From out of town points the votes in favor of church union are: St. Andrew's Church, London, 200 for, 38 against; Halville, in the Presbytery of Brockville, 121 for, 12 against; Knox Church, Saskatoon, 239 for, 9 against; Harvey Church, in the Presbytery of St. John, N.B., 200 for, 1 against; Moncton Presbytery, New Brunswick, 198 for, 17 against; North River Presbyterian Church, Nova Scotia, 183 for, 9 against; Harford Presbyterian Church, Nova Scotia, 33 for, 4 against.

The Foal That Knew Its Mother.
A Welsh judge has just had to decide which of two ponies was the mother of a foal. There were two ponies on a Welsh mountain belonging to different owners. Each had a little foal, but when the owners went they found that one foal was dead, and both the ponies were acting as mother to the little one that lived. The two men quarrelled as to whose the living foal was.

One of the men took his pony away, and the foal with it. But the other man went down to the farm leading his pony. There was no need to do so. The second pony, in the farmyard, with soon as it saw the other pony the foal neighed to it, and tried to get thru the gateway to it, while the other pony took no notice of it.

The judge himself did not know to which of the ponies the foal really belonged, but he thought the foal knew its mother, so he ordered the man who had the dead foal to pay the other man its value.—Little Paper.

Not a Bad Precedent.
Some of the beauties of ancient Rome had marble busts sculptured of themselves, on which were placed different wigs corresponding to the changes of style and coloring. If modern women followed suit there would be fewer atrocious coiffures.

A mirror should reveal unbecomingness, but it does not seem to do so. A bust of oneself, bedecked with chains, garters, Greek coils or the present day gaudy type of decorations, could not fail to be a convincing proof of ourselves as others see us.

The greatest beauty cannot afford to trifle with her hairdressing. It is only the plain woman who boldly defies looks to be in the style.
