

which would cause nausea, and distress by your food. It also weakens the brain, destroys the memory, creates pain and dizziness and various affections in the head. It produces great difficulty in breathing and swallowing. Sometimes fainting and fits will ensue, also bad breath, restlessness and great loss of strength. If not immediately attended to the blood will carry the disease through the whole system and death will end the work. From two to five of these Pills a day will keep the digestive organs in a healthy condition, unclog and carry away all impure matter and thoroughly restore and cleanse the stomach, at the same time the Pills so purify the blood as to drive all manner of disease from the system.

**WORTH THEIR WEIGHT IN GOLD.**

Broughton, Que., Dec 31, 1887.  
 MY DEAR FRIEND,—I have sold your DR. MORSE'S INDIAN ROOT PILLS for several years. My customers prefer them to all others, saying that they are "worth their weight in gold," I have

used them in my own family and found them all that they are recommended to be.

Your Friend,  
 MRS. C. J. HALL.

**Worms.**

In a quantity of corrupted matter there is always to be found a nest of worms, they cannot, neither will they stay anywhere else. Weak stomachs and bowels are subject to them, as they have not sufficient power to digest their food. Hence, a large heap of matter is lodged and worms must be the result. A few doses of these Pills will disturb them in their nest and drive them out of the system.

It should be remembered that an occasional dose, when in health, especially after taking cold, will prevent the disease from forming in the body.

**Diseases of the Liver.**

By this disease we understand an inflammation either in the membrane or substance of the liver, known by dull pains in the right side, the stomach always disordered, the yellow tinge of the skin, dry cough, tongue coated, costiveness, high colored urine, and of a thick nature, severe weakness and severe pains in the head.

The quantity of corrupted humors in the region of the liver causes a defective secretion of the bile. The liver, when healthy, serves as a filterer to the blood, to separate all impurity from it or refine it. When diseased it cannot purify the blood, which, when sent to the lungs,
