Yet Cheap.

The Scales Drop From an Ontario Man's Eyes When He Visits New Brunswick.

Confession of a Cornwall Newspaper Writer as Recorded By Himself in Forest and Stream - Always Use

C. W. Young of the Cornwall, Ont., Freeholder has the following article in good as we need can be got in any city Forest and Stream of July 5: for 25 cents each. Forrests at 75 How much does it cost to kill a

and got a pointer or two. At 6 o'cock I took an accommodation train a few west of Flat Lands, hailed a fatherely old fellow, Wm. Delaney, caretaker of the Montgomery, and Suction Water, and stated the case.

William had a cance, but no other the case of man was presently available, so we two went out alone. The water was practically free, a nominal retal of \$1 a day being charged per rod. There was perhaps half a line of the altogether, and the Restigouche River altogether, and the Restigouche River in being unusually high no pools were in We pulled out a few yards from shore, and dropping a stone for an anchor, cast to right and left, choosing a Durham-ranger fly of rather large pattern. The second or third cast brought a nice fellow to the top, a little short, however, and a few minutes later another, short, likewise.

"Black salmon," said William, "and o good anyway." These kelts or lack salmon are fish that have wintered in the river, and are lean, lanky fellows, not fit for food, but liable give you as good a run as any other first victims may or may not have been kelts; the guides are goodnatured fellows as a rule, and pathetic, and William may have been letting me down easy.

GOOD SIZED FISH TAKES THE FLY.

The stone is pulled up, and we drop down a few yards further, and after a while, with a moderately short cast, good-sized fish takes the fly, turns over, and then trouble begins. Right out into the river he goes, the ree screaming with delight, one could almost imagine then an eruption in the water, and three or four feet of glittering silver is in the air for a secon or two, Another run and then a sulk bottom, with a steady chug,

"and look out when he goes again." A few minutes of suspense, then another rush and another jump and away he races up the centre of

"A Metapedia salmon bound for the club-house for sure." But towing a canoe was a pretty heavy drag, and soon there were signs of distress. The fish led somewhat more steadily, he was reeled up and ran out severa times, each rush a little less vigorous All the time the canoe was being worked nearer shore, till at last I was able to get on the gravel. Fifty fee out the fish was lying almost exhausted on the top of the water and was coaxed in till a stroke of the gaff im-paled him and he was kicking himself on the gravel, when a blow from stick straightened him out. A Meta-pedia salmon he was, deep and chunky, only a day or two from salt water,

bright and shining, and on the scale a few hours later weighed 22 pounds.

They were not specially keen in the afternoon, one or two short rises, a rim for a few minutes and a lost fish, and just as we were preparing to sus pend operations a good stiff strike. This fish did not jump, but sulked for perhaps half a hour, then a wild rush or two. In vain we tried to guid him to a snug harbor, he would make for the south shore, where there was for the south shore, where stiff no chance to land. A rather stiff rapid intervened, and in the trouble navigating it with one man, the fish said good-bye, taking with him the fly and half the leader. It was near-ly train-time again, and reluctantly we

wound up operations for the day. Going up on the train next mornin I found that two other parties had arranged to fish the Montgomery and Suction Waters, so Delaney and I betook ourselves elsewhere, on water of his own, with fair success.

TENDERFOOT'S GOOD CATCH. One of the men had only a trout out fit and a shaky one at that, a weak reel with worn-out mechanism, and a line that broke easily between the fingers. He had never seen a salmon in the water, but with the proverbial luck of a tenderfoot hooked one early in the day, and, being blessed with two guides—Micmac Indians—humored and nursed him for an hour and a quarter, never daring to trust the line, out allowing the fish to have his own way till he was practically dead and offered no resistance to the gaff. Forty pounds and a little over, the scales said, and the record fish of the sea-

A heavy wind prevented easting the third day, and there being no signs of any let up after dinner, the two Indians whom I had engaged ran down the river to get a few trout. It was between the seasons, yet by dint of hard fishing we got a dozen or so, several of four pounds or over. At times the river is alive with trout of large size. The smells come up from the sea in immense shoals, and the trout follow them, afterward going away up the river to the spawning grounds at the head-waters.

Now for figures. There were three inches days good fishing. Leaving the rail-days.

Incidentals.. 2 00

For tackle, one can please himself. A good strong salmon rod can be bought for \$10 to \$15; mine is 15 feet long, a Scribner of St. John, N. B., that costs \$13, but I have had it 16 years, used it for all kinds of fishing, and it is still good for a lifetime. A good sale reel costs from \$3 up; mine cost \$4; it has a click, but does not multiply; has has a click, but does not multiply; has also been used 16 years. A good water-proof silk line costs \$4 for 100 yards, but this year I used an Abbey and Imbrie, No. 6, hard linen braid, cost \$1.10 per 100 yards—a little light, perhaps, but answering the purpose. In files one can be as extravagant as he pleases—there is something wonderfully tempting in a tackle shop—but as good as we need can be got in any city. cents are prettier and neater, but no

salmon?
Well, that depends. If you are anyway, Durham-ranger, silver-doctor, member of the Restigouche Club your bill may run up a thousand or more, but ordinary mortals could do it for a good deal less.

I dropped off at Campbellton, N. B., on a mid-June morning, and looked up Billy Sproul of the Royal Hotel, and got a pointer or two. At 6 o'cock cheap ones and bad dear ones 75 cents is a fair price. They should test 7 to 9 pounds dry. Your guides will

REACHED

Practically all the salmon fishing in Canada is reached by the Intercolo-nial Railway. The Restigouche, with its tributaries the Metapedia, Causapscal and Upsalquitch, are the nearest to Montreal. The I. C. R. fellows the Metapedia for almost 50 miles, to where it empties into the Restigouche at Metapedia Station, 8 miles above tidewater. The Causapscal joins the of total abstinence. In this connection Metapedia 35 miles above Metapedia the following form of pledge is sug-Station

The Causapscal is owned entirely by the Restigouche Club, who also con-trol most of the Metapedia, and a good and to discountenance such use deal of its Restigenche.

The Upsalguitch has been reserved by the New Brunswick government, and is leased at \$2 per day per rod. There is a great deal of good water, not be in each other's way. Fishing in the Restigouche and Metapedia is good from May until August, the Uption of electoral organization to be salquitch is at its best in July. The prepared for the dominion elections

out this convention's resolution;
That a campaign fund of \$10,000 be raised to be administered by the executive committee, the funds to be apportioned among the electoral districts according to population, and that the local organization undertake the responsibility of raising their research. sponsibility of raising their respective shares. Also that a special appeal be made to church organizations, Sunday schools and young people's societies to contribute to this fund by collection, such amounts to be credited to each constituence.

constituency. WORLD'S LARGEST TREE

FRESNO, Calif., Aug. 1.-What undoubtedly is the largest known tree in the world has been discovered on the government reservation far up in the Sierras, in this county, Six feet from the ground it took a line 154 feet, eight inches long, to encircle the tree, making it over 51 feet in diameter.

alks to the Star. Hon. Arthur Peters, premier of Prince Edward Island, who with Mrs. Peters has been in England and who emained over in St. John for a couple of days, left for Charlottetown by the noon train Saturday.

In conversation with the Star Premier Peters said that he did not think the conference of premiers in London would be productive of any decided results. The main conference, that of the colonial premiers, was almost negatived on account of the illness of the king, and by the late injury to Hoh. Joseph Chamberlain, without whose presence very little could be done. The

presence very little could be done. The other conference, that of the provincial premiers, was practically abandoned on account of the confusion re sulting from these same causes, but at the somewhat unsatisfactory meeting which did take place Hon, Mr. Chamwhich did take place right per did the deminior

thong argument in support of his claim for at least a return to the former representation from that province.

He stated that at the conference of provincial premiers to be held in Quebec in September there will be two subjects brought up of especial interest to the people of the maritime provinces. One of these is the proportionate distributions. ate division of the fisheries award among the three provinces and Quebec and the other the question of transferr-ing the absolute control of the fisheries to the dominion government.

Of the five and a half million dollar.

which composed the fisheries award, one million has been given to Newfoundland, and the premiers of the four Atlantic provinces will, at the proposed conference, put in their claims and arguments for the amounts which, they believe should be received. hey believe should be paid to asses sums will do much towards as sting the provinces in their financia ifficulties, and in addition to this

WILL GO WITH MR. BLAIR. Dr. A. B. Atherton, says Thursday's redericton Gleaner, leaves upon the 10 C. P. R. express this afternoon for New York, there to join Messrs. Blair, Thompson and Whitehead and will accompany them to Europe. The party sails on the Minniehaha from New York on Saturday, the return passage being booked for Sept. 15th.

SMALLPOX IN KENT CO.

(Moncton Times.) Two new cases of smallpox have broken out in the Gaudet family at Buctouche, Mrs. Gaudet and her son. A case of smallpox has broken out in St. Paul, and two houses have been quarantined by the board of Health.

Stomach and Liver Troubles

Indigestion and Severe Headaches Resulting From a Sluggish Liver.

Dr. Chase's Kidney Liver Pills The liver is responsible for more ills and suffering than is generally sup-

posed. Once the workings of the liver are disordered the blood is not properly filtered and foul impurities are odged in all parts of the system Much of the success of Dr. Chase's Kidney-Liver Pills is due to the fac that they act directly on the kidneys, liver and bowels, making them active and regular.

Mr. B. Knowles, broommaker, 586

Main street, St. John, N. B., writes:-"For years I suffered from kidney and liver disorders. I had severe pains in the back and they caught me especially when I stooped over. I was also troubled with indigestion and severe headaches.

"Il began using Dr. Chase's Kidney-Liver Pills and cannot speak too high-ly of this medicine, for it has done me a world of good. The back pains and

SCOUTS" FOR THE NAVY. A New Type of British Man-of-War

Another type of warship is about to be added to the fighting squadrons of he Empire. Its particular function is evealed by its name—"Scout." Every rear the specialisation of war duties in the navy increases. This remark applies equally to officers and men and to the material they control. In the old days all officers received the serve of the material they control. In the id days all officers received the same raining; they were all sea-dogs, and hey sailed in line-of-battle ships, frightes, and sloops. Now navigation, furnery, the torpedo, engineering, flectricity, wireless telegraphy, or signalling claim careful, and to some extent exclusive study by those who go nt exclusive, study by those who go own to the great waters in the King's hips. Is it realized how this tendency s adding to the long array of ships, with different powers and different duies, which are included in His Majes-

y's fleet. We have now: Battleships of various types, Coast defence ships (old), Armored cruisers, Protected cruisers, Unprotected cruisers (pld), Sloops, Gunboats, Torpedo gunboats, Torpedo-boats, Torpedo ram, Torpedo-boat destroyers,

bmarines,
espatch vessels, etc.
here is also a fast-growing list
dillary ships—colliers, hospitals,
dring vessels, torpedo depot shi
ad distilling ships—all specially fil
ad distilling ships—all specially fil the peculiar work expected from the peculiar work expected from the kind. The last new craft is tild of the Whitehead torpedo, apon which when first introduced a speed of seven and a half known and a half known and a half known are the peculiar work.

en destroyers were first designed it was not contemplated that they would be frequently used otherwise than as working from a fixed base.

Experience, however, has shown that ressels with greater sea-keeping power are required for service with fleets and accordingly the board have decided both materially to strengthen the types of future destroyers and also to create a new class altogether, to which the name Scout has been given. It is proposed not to initiate a design for this new class at the admiralty, but to invite the private shipbuilders of

the country to give the navy the be-nefit of their creative ingenuity by

submitting designs to fulfil certain stated conditions. It is now announced that from the Clyde, and probably also from the Yarrow and Thornycroft shipyards, designs and tenders have been submitted for these new boats. The ne-cessity for a stiffer class of torpedo vessel was revealed by the investiga-tions of an admiralty committee which was appointed after the disaster to the Cobra. The new "scouts" are to be much longer and stronger than any "destroyers" hitherto built, which will be able to remain at sea in ordinary weather for more protracted periods than either "destroyers" or torpedo boats. It was at first feared that the increase in the size and strength would lead to a great falling off in speed, but there is reason to be-lieve, from the opinions of skilled en-gineers, that the "scouts" will have a reliable rate approaching thirty knots an hour. In the estimates for the present year only £29,435 has been take

by the admiralty for the four craft of this type included in the programme

The annual Sunday school convention of Albert county opened in the Metho-dist Church on Monday evening, July 28th, with Vice President W. M. Burns

in the chair. Forty minutes were spent in cheer ful praise and in Bible reading design ed as a preparation for the work of the convention.

The convention was welcomed by the pastor, Rev. J. K. King. Rev. A. M. pastor, Rev. J. K. King. Rev. A. M. Hubly, president of the provincial convention, and delegated by the executive of that body, responded. The field secretary said a few earnest words coupled with announcements.

The nominating committee met in the early morning, and the second ses-

sion opened at 9.30, with worship led by Rev. J. K. King. The county secretary read his report, which was followed by a conference on county work, and the remainder of the morning was spent in instructive conferences on home department and teacher training work, question and answer, testimor and comment were well calculated to arouse interest.

The third session opened at 2 p. m. a world of good. The back pains and headache have been entirely cured, and my digestion is good."

Dr. Chase's Kidney-Liver Pills, one pil a 10se, 25 cents a box at all dealers or Edmanson, Bates & Co., Toronto.

The third session opened at 2 p. m. of May I was able to start work again in the shop and I have never been sick or off work a day since.

"I am sure I owe my life, health and strength to that great remedy, Dodd's Kidney Pills."

and after the session met the primary teachers, when they organized a county primary teachers' union, with Mrs. G. S. Turner as president, and Miss M. Smith as secretary.

Miss Marjery Matthews reported the temperance department. The walls were adorned with temperance cards, and many questions were asked about the work. The following officers were elected: President, W. M. Burns, Albert; vice president, W. A. Trueman, Albert; sec. treasurer, A. W. Leeman, Five Points, Coverdale. Department superintendents-Primary, Mrs. G. S. Turner; n home, Rev. R. H. MacPherson; normal, W. Burns; temperance, Miss M. Matthews.

Vice presidents in the parishes:-Alma, Thos. Matthews; Harvey, Jas. B. Turner; Hopewell, H. A. Turner; Hillsbore, J. J. Blake; Coverdale, Chas. Smith; Elgin, Mrs. A. Colpitts. Additional members of executive:-H. H. Finley, Mrs. A. McLellan, Rev. J. K. King.

The final session opened at 7.45 with a praise service, after which Rev. A. M. Hubly spoke for thirty minutes on Plans and Purposes of the Provincial Sunday School work. The resolution committee gratefully acknowledged the help of provincial in sending Messrs. Hubly and Lucas, and expressed their own deep sense of loss in the death of Wm. A. West dur-

ing the year. closing address was by the field secretary. Facts and figures, encouragements to workers for another were given with many illustrations. singing "God be with you," and the offering of prayer, the convention

ANOTHER PROFESSOR FOR

SCHOOL OF MINES.

(Halifax Chronicle.) In addition to Messrs. Poole and Mason and Dr. Woodman, recently appointed Professor of Geology and Minerology, Dalhousie has appointed to the staff of its school of mines, H. C. Bownton, to take charge of the Me-

tallurgy and Mining. Mr. Boynton took his B. A. degree with "great distinction" from Harvard in 1900, and the degree of M. Sc. in 1901. He has held an Austen Teaching Fellowship and an Assistantship at Harvard. He is now Assistant in Me-

tallurgy at the university Mr. Boynton has been work for the geological survey in Vermont and in New Brunswick. He has done considerable work in the Lake Superior regions searchiny for lematite and magnetite. Mr. Boynton comes with the highest testimonials, and gives great promise of doing good work in the new school of mines.

AN AFFECTING INCIDENT.

(Montreal Star.) The blue ribbon for pathes belongs to the New York Journal. In a report in yesterday's issue describing the visit of a dozen Boers from Bermuda to the Waldorf-Astoria hotel on Saturday, the following paragraph

hotel on Saturday, the following paragraph occurs:

"In the art room they came across a handsome bust of George Washington. An immediate, quietness fell on the group and the conversation died away. All gazed on the bust in silence. It was the bust of the hero of a glorious cause won, welling up terrible memories in the hearts of living heroes of as glorious a cause lost. Wessels wept. So did young De Wet, the son of the most remarkable campaigner of recent wars."

The sight of Brother Wessels and young De Wet (aged twelve) blubbering over a bust of George Washington must have been truly affecting. There has been nothing to equal it since Mark Twain shed tears over the alleged tomb of Adam.

HE WAS PARALYZED

Unable to Walk or Raise His Hands to His Head.

More Unfortunate Case Could Scarce ly be imagined Than a Husband and Father in this Wretched Condition

of construction, but at Glasgow it is stated that the construction of ten is now contemplated.

ALBERT S. S. ASSOCIATION,

OSHAWA, Ont., Aug. 1.—(Special.)—

The experience of Mr. Joseph Brown, an employee of the Oshawa Malleable Iron Works, should be a lesson to every sick person.

Some five years ago, Mr. Brown, who is a head monthly to a less of the construction of ten is a less of the construction. who is a hard working, industrious, and sober man, began to feel a stiffness and soreness in the calves of his legs. This gradually increased till he had lost all power in his limbs and arms. He could not have raised his arms to his head to save his life and for over four months he could not stand or walk alone a single step. All the doctors treated him and gave him up. Then he consulted a Bow-manville doctor who told him he could do nothing for him and advised him to go to the hospital in Toronto where they might be able to help him a little. To the hospital he went in January, 1898, and remained under treatment for over four weeks. Twelve doctors told him he could not recover and that nothing could be done for him. He was getting worse every day and when reworse every day and when removed to his home in Oshawa was like a baby unable to move.

His father-in-law, Mr. John Allin,
had heard of Dodd's Kidney Pills and

suggested that Mr. Brown try them. He did and he says: "I used altogether twelve boxes of Dodd's Kidney Pills and by the first Very Wordy White, Han Judge Wed
