The big Hotchkiss guns have spoken—first in the modest elementary language, and lastly in good honest death-dealing shell.

Who ever heard of a cannon shot winging a sea gull? It happened Thursday. It was windy. A clipping breeze whistled through the camp grounds and whipped the bay into roughly curling, frothy furrows.

Indeed, the soldiers had every need of their chin straps to prevent those independent looking little caps from taking a sudden "flip" and gyrating out to sea. The wind was everywhere. It moaned into the dark throats of the guns, shook the tents, and even tickled the ears of the

the threshold of their premises, and immediately stiffened into motionless attention. For the camp commandant and his officers were about to enter.

The party comprised Licent-Colonel Wilson, commandant; Licent-Colonel Fages, tamp quartermister; Gaptain Thacker; camp adjutant, and Sergeant-Major Bridgeford.

A scriptiny of brusque intenness, a brisk prodding with a light bamboo cane into all suspicious appearing places and the commandant had left the cook-house, and was stepping along between the lines of tepts, treating the entrance of each to a sharp glance, and wooden track has been laid along the brink of the southeastern side of the fort of rag that lay across his path.

The six-pr. and 12-pr. guns are mounted, shender oily, evil, well-groomed looking barrels thrust their mouths bay ward, as if watching for them to talk, one would expect to see them swing around to the gunners and, with demoniacal grin, ask spitefully: "We don't want this babyish elementary—give us something real!"

However, the guns are safely subordinate, and shot with faithful accuracy. A wooden track has been laid along the brink of the southeastern side of the fort of rag that lay across his path.
