GOLD 7-30 LOAN.

A profitable and secure Investment THE Northern Pacific Railroad Companyoffers to the public an investment security which combines the ready negotiability, the convenience, and the high credit of a first-class Railroad Bond, with the solidity and safety of a Real Estate Mortgage on Land worth at least twice the amount loaned.

Troffic. As officially reported, the gross earn ings of the present Pacific Railroad Union and Central) for 1871, the second year of through business, (December earnings estimated) reach Seventeen Millions and a Quarter. Of this, 65 per cent. is from Local business, and, it is stated, fully 55 per cent, or nearly Nine and a Half Millions, are net over operating expenses An equal traffic on the Northern Pacific Road will pay a dividend of more than 9% percent, on its total cost. With its great and unquestioned advantages in distance, grades, climate and triutary fertile country, the Northern Pacific is the outset, with a large increase for the future.

The Value of Land Grants. The average price

ssured of a vast and profitable business from at which the twenty-six leading Land-grant Railroads have thus far sold their lands, is \$7.04 r acre—the highest average of any grant being per acre-thenignest average of any grant being \$18.98, and the lowest \$3.07. With few exception: the average selling price has steadily increased from year to year. The lands of the Northern Pacific Road are admitted, by all who have seen them, to be better and more salable than those of most other grants, but, sold at the general average of \$7.04 per acre, they will yield more than \$161,000 per mile of road—more than

three times the possible cost of construction and equipment; or, at the lowest average of any grant (\$3 (7), they will produce more than \$70, 000 per mile. These facts regarding Pacific Railroad carnings, and the market value of Railroad Lands, as shown by actual sales to settlers, show the three-fold security of North-ern Pacific R. ilroad Bonds. Construction. The road is now completed

peross Minnesota, (255 miles); work is progressing westward through Dakota, and 65 miles are under construction on the Pacific coast. In-cluding purchased lines, the Northern Pacific Company now has under its management 575 miles of finished track. Contracts are let for the onstruction of 635 miles more, to be finished before the close of 1872.

The 7-30. Gold Bonds. The first mortgage

The 7-30 Gold Honds. The list mortgage bonds of this company, which, after full investigation, we strongly recommend as a reliable and unusually profitable inpestment, and which now stand among the solid and favorite securities of the country, have the following leading features;

Ordinary Life Policies, Endowments, and all other desirable

asso on a band trant which on the completion

mile of track.

3. They are at all times receivable at 10 per
