THE RE-MIGRATION

IN TIMES PAST DOMINION SUFFERED LOSS.

Expatriated Sons and Daughters of the Maple Leaf Invited to Return to Native Land.

It is perfectly apparent from the low rate of population increase as illustrated in the census figures just pub-

in the past years, before Canada and surferer.

In any respect attained the status she occupies now or possessed the same dition due to poor, watery blood or dition due to poor, watery blood or watery blood or ber's and her people's to-day, the close liams Pink Pills now, and note how thatr, whose legs were set in the past years, before Canada and surferer.

If you are suffering from any condition due to poor, watery blood or watery blood or dressed herself and eat down chair, whose legs were set in the past years, before Canada and surferer. proximity of the thriving industrial re- your health and strength will improve gions of the New England states to the Maritimes acted as a powerfully attracting influence to the young peo-sent by mail, post paid, at 50 cents a ple of those provinces and to those box or six boxes for \$2.50 by The Dr. who felt cramped in Canada with its Williams' Medicine Co., Brocky!le, limited opportunity. Prosperous times in these industrial areas witnessed a sale exodus from the Maritimes and in most cases the emigrants did not come back. It has been said that there are more Nova Scotians and their descendants in the New England States than the total population at

Always French-Canadian at Heart. These same influences worked in very similar manner upon the agriultural districts of Quebec province and the proximity of such areas offer ing them kinds of work at good wages which Canada could not, drew the French-Canadians, from the land in great numbers. They have remained there and increased. They have established little Quebecs in the midst of the Great Republic, towns and villages that are as French-Canadian in character, spirit, language and religion in every essential, as any in old Variations—Siddens, Sidden, Sidden, French Canadian of the New England states, it is claim-

dians in the New England states have might not be so obvious to you in view prospered exceedingly and have made of the changed spelling. their native land known through the times, in fact, been argued that had they brought into play, in their native provinces, the energy and determina-tion which they felt was necessary for

then state of development, onered a limited diversity of opportunity, but the Welsh differed from the other returned which has elapsed since then has wrought wonderful changes, and to-day there is no justification for furble the day there is no justification for furble the family names from clan names.

Children and Scott would seem to indicate possession of some Danish or Norse blood along with the Gaelic. He was surnamed the "Gamhnach," a word difficult to ranted in encouraging her expatriated sons to return to their native country Canada has developed to a phenomenal extent in every phase, her industries are great and expanding yearly, whilst more adequate development is taking place in her great variety of natural resources. Canada to-day has need of all her sons; a most pleasing feature of her immigration tide would be the inclusion of these lost sons drive

away by circumstances.

Whilst many of the descendants of these emigrant sons of Canada are not Canadian in character or spirit and all their sympathy and loyalty is for the land of their fathers' adoption. tainly the older people have never lost their regard for Canada as the home-land which merely circumstances caused them to leave. To the French-Canadian there is ever only one real home, the province the settlers from old France first settled. It would seem only necessary to bring home to these people the transformation that Canada has undergone in recent years and to profer an assurance of equal chance in it, to commence a migration on a substantial scale.

Canada Calls Them to Return.

The governments of Quebec and Nova Scotia are alive to the situation and have taken an advantage of a decline in New England industrial pros-perity to further the claims of the mother country. In the year 1921, 542 settlers, worth in excess of \$181,000, came to Nova Scotia, though it is not came to Nova Scotia, though it is not possible to say what proportion of these come from across the border. In the same period, however, 302 French Canadian families returned directly from the New England states to Que-

TOO LITTLE BLOOD

OF CANADIANS The Cause of Nearly All Every Day Ailments of Life.

> Too little blood is what makes peo-ple look pale and sallow and feel lan-guid. That is what makes them drag along, always tired, never real hungry, unable to digest their food, breathless light exertion, so that it is one even to go up stairs. Docafter slight exertion, so that tors tell them they are anaemic—the plain English being too little blood. If plain English being too little blood. If you do not relish your meals, if you are easily tired and frequently despondent, and small matters irritate powerless to free themselves. pondent, and small matters irritate you, it is a sign that your blood is thin and watery, and that you are on the

rate of population increase as illustrated in the census figures just published that the Maritime provinces of Canada have not succeeded in keeping the population which the natural increase and immigration have added to it. Whilst a goodly proportion of the missing population is to be found in the Western provinces, engaged in building up another section of the Dominion and therefore in the strictest sense not lost, there remains the fact that much of this migration took place before there was a developed West for it to migrate to.

In the past years, before Canada had in any respect attained the status she occurred any respect attained the status she occurred any respect attained the status she occurred any respect attained the status she of the mand continued their struggles. The Tragedy of the Forest.

It was near sundown of an October day, says a contributor to Field and Stream, when two hunters heard a pecultar noise, as of a hammer striking wood, echoing through the forest. On investigating, they found a pair of large buck deer, fighting in a clearing.

The deer repeatedly launched them-selves at each other, and their horns clacked with terrific force. After an unusually severe impact, the watchers gasped with astonisment to see that the horns had locked. The bucks tugged and tore; they whirled in innumer

His Hearing Restored.

The invisible eardrum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural ums. A request for information to O. Leonard, Suite 437, 70 Fifth Ave.,

All Upset. "Ethel, can you tell us the shape of the world?" asked the teacher, en couragingly.

"Yes, miss; it's in a pretty bad shape just now,' replied the precoclous child, who had heard her daddy say a few things at home.

Cold Boiling Water.

The recent magnificent attempt to scale the summit of Mount Everest reopens interest in the various methods by which heights can be ascertained. The instrument which is used by the majority of mountaineers is the aneroid. This instrument has no mercury, but depends on a mechanical contrac tion of a thin metal plate for its meth

Ordinary mercurial barometers were also carried by the Mount Everest ex-pedition, and the readings obtained from them were used to check the

figures given by the aneroid.

Another method, which might be described as an unofficial way for a party to discover their altitude above sea level, is to determine the temperature at which water will boil. Water, ow ing to a curious phenomen of the at-mosphere, boils at about one degree (Fahr.) for every 590 ft. climbed. An instrument called a hypsometer,

or boiling point thermometer, regis-ters the boiling point at any altitude reached, and therefore indirectly registers as well the height above sea

The fact that the boiling point of water changes at varying altitudes, leads to many very strange situations. It is possible for the pressure of the air to be reduced by mountain climbing until the boiling point is at the

ing until the bolding point is at the same level as the freezing point.

In parts of South America there are monasteries on the mountain's sides, at heights of 10,000 to 14,000 ft., where water boils so quickly that it does not get hot enough to cook meat, potatoes, or other foods.

Footmarkly at that height human

Fortunately, at that height human beings do not feel the urgent need for food felt at lower altitudes. During the last few days necessary for the final rush to a peak, such as Mount Everest, the mountaineers only re-quire a little soup, chocolate, or bis-cuits.

Growing Umbrella Handles.

Those who are intrigued by the attractive shapes of a wooden umbrella handle and conclude that the tree simply 'grew that way" will be surprised to learn that they are making a great mistake.

Chilitating an umbrella best of the statement of th

Cultivating an umbrella handle a slow and tedious process, often requiring three years of the most care-

ful attention.

At the end of the first year the young tree is cut quite short. From then on, the bark of the sprouts is cut and the wood is carved and twisted into all manner of fancy shapes and the tree, as it grows, swells and en-larges the designs. Great care must be exercised lest the tree die from in-

terruption of the flow of sap.

After cutting, each etick is dried carefully in the sun, and then steamed in a vapor bath until it is soft and

FARMER'S WIFE REGAINS HEALTH

Gives Credit to Lydia E. Pinkham's Vegetable Compound

Fork River, Manitoba.—"I saw in the newspapers where Lydia E. Pinkham's Vegetable Compound was doing so much good to women, and as I needed something I began to take it. I used to be very sick but I am not now. I live on a farm in the homestead district and we have to do all our own work. I tell all the women I see what Lydia E. Pinkham's Vegetable Compound does for me. I think it saves me from going to a doctor and is the best medicine women can take:"—Mas. WM. COULTAS, Fork River, Manitoba.

Lydia E. Pinkham's Vegetable Compound is a medicine for the aliments peculiar to women. It is prepared from medicinal plants, with care and accuracy. It can be taken by women of any age.

Women make a serious mistake in allowing themselves to become so weak and nervous that it is well-nigh impossible for them to attend to their necessary household duties.

Such symptoms as pains and irregularities, all-gone feelings, backache, headache, hot flashes, nervousness, with a general run-down condition, indicate some form of female trouble. The Vegetable Compound has brought relief to thousands of women suffering from such allments. Let the
