Plenty Water Means More Milk

If you want the maximum milk yield from your cows, water them in the stable. Keep the water before them all the time, so they can take a sip when they want it.

Don't force your cows to drink from an icy spring or trough this winter. That cuts their milk yield in two, because they won't take half the water they require. Much body heat is lost when they have to stand shivering in sleet and storm, and much extra feed is required to make it up.

The Big BT Water Bowl

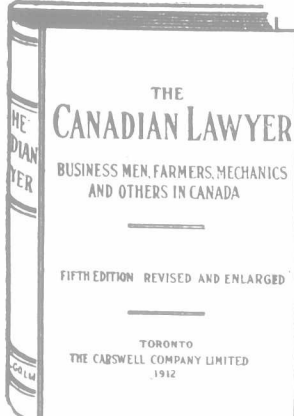

will increase milk production so much and help so much to fatten feeders and stockers, that it will pay for itself this winter. The bowl can be installed in a few hours this fall.

The big BT Bowl holds 3½ gallons, so only one is needed for every two cows. It is made of cast iron, and is so heavy and strong it will give the best service for 25 years. Each bowl can be cleaned in a moment by removing a little rubber plug. The valve is simple and is made of rust-proof aluminum.

Send for Illustrated Booklet

Write for interesting little booklet, "Your Money Back in 90 Days," which tells how one farmer made his water bowl outfit pay back its cost in a single month. Sent free for a post card with your name and address and telling number of cows you keep. Address:

The Canadian Lawyer

OR

How the Farmer Can Keep Out of Law Suits

The "Canadian Lawyer" is a book that will protect the farmer against the sharp practice of agents or any person else, who might like to get him into a tight place. It is just what farmers of Canada have been looking for, for some time. It gives the most important provisions of the Laws of the Dominion and of each of the Provinces. The information is given in simple, everyday language, so that farmers will be able to do a great deal of their own business strictly in accordance with the law, without having to pay each time for a little bit of ordinary advice.

It also gives simple and correct Forms for the preparation of all kinds of legal documents that a farmer would ever have occasion to use. Chattel Mortgages and Bills of Sale are explained fully—how to make them, the law in regard to them, and when to use them. Similar information is given regarding Cheques, Liens, Notes, Land Mortgages, Promissory Notes, Receipts and wills; Instruction as to Exemption from Seizure for Debt; the Law in regard to Line Fences; the use and form of Powers of Attorney; the Law in regard to Trusts and Trustees, and in fact everything else that a farmer would require to know.

The book contains 453 pages, price \$2.00 in good cloth binding, and will be sent, postage paid, when cash accompanies the order. Send your order direct to the publishers:
