Haying Machinery

What about Hay Cars, Track, Hangers, Pulleys, Rope, Forks, Slings, etc.? We carry a very complete line for steel or wood track. We also have in stock at present, Mowers, Rakes and Loaders, and strongly advise our trade to move quickly as many lines are very scarce.

Cream Separators

Are moving freely; we have the finest assortment in the country and are quoting in some instances less than wholesale cost today—we supply parts for the leading lines.

OILS

Are very high in price. We had our stock bought before the last big advance and can give the best value in guaranteed lines of Motor, Machine, Separator and Tractor oils. We are also quoting Axle Greas at close prices.

Ten Commandments That Should Be
Remembered.

The Canadian Reconstruction Association urges observance of the following "Ten Commandments for Canadian Trade" as a means towards a safer trade situation and the development of Canadian resources:

1. Buy Canadian products. In doing so, you develop the home market, encourage factory expansion, provide employment for new populations, and create bigger and better markets for all kinds of farm produce.

2. Import only necessities, and then only if similar Canadian articles or substitutes are not available.

3. Produce to the limit in field and factory. Increased production means new wealth, and is essential to the success of any effort to reduce imports and promote export trade.

4. Co-operate, conserve, specialize, standardize. These are the means to maximum production of high quality going at minimum cost.

5. Develop export markets. Foreign business gives stability to trade. It reduces unit costs, benefits domestic consumers, gives employment to factories and workers in times of depression, and corrects adverse exchange by improving the trade balance.

6. Utilize Canadian services. Ship by Canadian carriers through Canadian ports. Patronize Canadian railroads, Canadian steamships, and Canadian banks. Place insurance in Canadian companies. Employ Canadian architects, engineers, scientists, and other experts. Spend vacations in Canada.

7. Manufacture raw materials to final stages in Canada. Hundreds of millions of dollars are lost annually to the Dominion, and especially to Canadian wage-earners, by the exportation of raw materials and semi-manufactured products.

8. Use science for the determination and development of natural resources. Industrial research will reveal new wealth, improve industrial processes, and help to relieve our economic dependence upon outside sources for fuel, iron and other essentials.

9. Make quality the hallmark of Canadian products. In return for public support of the home market, Canadian manufacturers should provide products that compare favorably with imported goods, and Canadian workers should recognize good workmanship and maximum production as their standards.

10. Be fair to capital. Canadian money should be encouraged to invest at home, and foreign capital attracted to promote Canadian industrial expansion.

Ontario's Minerals.

A drop of \$25,000,000 in Ontario's metallic mineral production during 1919 is the feature of preliminary report for the year issued by the Bureau of Mines. The value of metals produced during the twelve months amounted to \$41,510,000, compared with \$66,178,059 for the preceding twelve months. A scrutiny of the details of the statement, however, shows that the reduction is accounted for almost entirely by the small production of silver, nickel and copper matte, and the reduction in the market value of the latter metals. The falling off in the output of silver was compensated for to some extent by the high prices, but even at that, the value of the mines' output was, roughly, \$4,500,000 below that of 1918.

Metallic nickel was produced to a much greater extent and provided an increase of nearly two million dollars in value.

While silver production in Ontario continues to decrease, even with the treating of low-grade ores made possible by high prices, the gold mining industry continues to grow. The 1919 output of 505,963 ounces, worth \$10,451,688, was the largest to date. Ontario is rapidly becoming a great gold producing province, the output last year being greater than that of any other province or any state of the American Union, with the exception of California.

EAGER'S WATERDOWN

Boots and Shoes

Our advice is to buy your fall boots out of the present stock of shoes on hand. You will save money by so doing.
